Sumatra Edwin Meyer Loeb,Robert Heine-Geldern,1989 The fourth largest island in the world and home of the orangutan and flying fox, Sumatra has a long, colorful, and not widely-known history. First published in Vienna in 1935, Edwin M. Loeb's fascinating study has served as the only history of the island and its people available in English since William Marsden's *The History of Sumatra* appeared in 1783. Even today, it remains the only general book in English to explore Sumatra as a whole. Remarkably thorough in its coverage, *Sumatra: Its History and People* offers detailed accounts of the economic life, society, and religion of all of Sumatra's regions from Aceh in the north through the lands of the Batak and Minangkabau to Lampung in the south. Loeb provides an insider's view into the societal conditions of Sumatra, including land rights, marriage restrictions, totemism, childbirth, puberty ceremonies, divorce, position of women, cosmology and cosmogony, death and the afterlife, witchcraft, industries, and much more. The book also covers the islands of Nias, the Mentawai group, and Enggano, and includes a separate section on archaeology and art. This invaluable survey of the whole island will particularly appeal to the non-specialist reader in search of reliable information about this exotic land.

Ecology of Sumatra Tony Whitten,Sengli J. Damanik,2012-06-26 The Ecology of Sumatra distills for the first time the information found in nearly 1,500 scholarly works relevant to an understanding of the full range of natural and man-made ecosystems on the island—many of them available only in Dutch, German or Indonesian. It was originally prepared by a team working at the Centre for Resource and Environmental Studies (CRES) at the University of North Sumatra to supplement existing documents. This new version is aimed at general readers and includes a section on recent development on Sumatra, as well as an additional bibliography of recent publications. It contains hundreds of line drawings, tables, maps and photographs. It is hoped that *The Ecology of Sumatra* will prove useful to resource managers, ecologists, environmental scientists and local government personnel, and be enlightening to Sumatra's inhabitants and visitors. It should also be of great interest to anyone wanting to learn about Southeast Asian biology.

The History of Sumatra, Containing an Account of the Government, Laws, Customs, and Manners of the Native Inhabitants William Marsden,1811

The Vegetation and Physiography of Sumatra Yves Laumonier,2012-12-06 Fifteen years ago, approximately half the world population was estimated to live in continental and insular South-East Asia (Burma, Thailand, Kampuchea, Vietnam, Laos, Indonesia, Philippines). Then the region had a population growth of four million people every month, and the problem of malnutrition was acute for the rural population. International agricultural development organisations decided that their primary aim would be to double existing levels of agricultural production and, taking account of population growth, to double it again by the end of the century (Whyte 1976). Today, while global issues have greatly affected the parameters of the problem, the situation remains both serious and difficult. Despite impressive efforts in education and health, Indonesia for example, where population (179 millions) growth eased off only slightly between 1980 and 1990 (from 2.3 percent to 1.9 percent), is having to cope with increasing difficulties in managing natural resources and particularly its evanescent forest assets which, until 1986, were the second largest source of national revenue. Indonesia has the second largest surface area of tropical rain forests in the world (after Brazil) and thus all the problems linked with management and disappearance of those forests. The latest estimate gives a figure of 109 million hectares of forest in 1990, of which 40.8 million hectares are production forests (Anon. -F A0 1990).

A Japanese Memoir of Sumatra, 1945-1946 Takao Fusayama,2010 One of our chief reservations in publishing the memoir lay in the author's description of it as a documentary novel, but we discovered that the fictions in the narrative relate mainly to Dr. Fusayama's dramatization of the action by putting into direct speech his memories of the general tenor of his conversations with some of the major protagonists. As he notes in his Preface, he recorded his recollections immediately after his repatriation to Japan, and it is evident that his rendition of the events he witnessed are true to his perceptions at the time. --

Orchids of Sumatra J. B. Comber,2001 The author describes 139 genera and 1,118 species of orchids occurring in Sumatra and its surrounding islands. The 664 excellent colour photographs are supplemented by 70 superb line drawings. Detailed descriptions of habitat, ecology and geographical ranges will make this work very useful to growers, taxonomists and conservationists.
