📖 **COMPUTER GENIE - STEP 8** SHASHANK JOHRI, 2019-01-01 The eighth book of the Computer Genie series is here. The Computer Genie step-8 will take the child on the final journey in the world of computers as this is the last book in the series. The child will learn not only how to use a computer but also how to be effective with it. As we all know, information technology is the future, and here is the perfect way how a child can get into the future. In this book, the child will learn how some computer software, devices, programming, and other things like that work. Along with all this, they will learn how to work with different versions of windows, so that if the windows change, the child will not get confused about what to do. Besides, the children will also learn remote working, animation, e-commerce, Google Apps, app development, setting YouTube channels, and cyber security in the book. These things are not taught to students in other books but here, they will learn the important things like this. This final book is made for them to become a pro at using computers. Everything we teach in the book is represented with graphical illustrations that are shown to make the child engaged while learning. There are engaging puzzles and quizzes in the book that will help the child to learn actively and be creative at the same time, so that is how we can make the child love with education. Don't miss this amazing book if you want your child's creativity and education both elevated.
