There There Tommy Orange, 2018-06-05 PULITZER PRIZE FINALIST • NATIONAL

BESTSELLER • A wondrous and shattering award-winning novel that follows twelve characters from Native communities: all traveling to the Big Oakland Powwow, all connected to one another in ways they may not yet realize. A contemporary classic, this “astonishing literary debut” (Margaret Atwood, bestselling author of *The Handmaid’s Tale*) “places Native American voices front and center” (NPR/Fresh Air). One of *The Atlantic’s* Great American Novels of the Past 100 Years Among them is Jacquie Red Feather, newly sober and trying to make it back to the family she left behind. Dene Oxendene, pulling his life together after his uncle’s death and working at the powwow to honor his memory. Fourteen-year-old Orvil, coming to perform traditional dance for the very first time. They converge and collide on one fateful day at the Big Oakland Powwow and together this chorus of voices tells of the plight of the urban Native American—grappling with a complex and painful history, with an inheritance of beauty and spirituality, with communion and sacrifice and heroism A book with “so much jangling energy and brings so much news from a distinct corner of American life that it’s a revelation” (*The New York Times*). It is fierce, funny, suspenseful, and impossible to put down--full of poetry and rage, exploding onto the page with urgency and force. *There There* is at once poignant and unflinching, utterly contemporary and truly unforgettable. Don't miss Tommy Orange's new book, *Wandering Stars*!

Book Was There Andrew Piper, 2012-10-12 Andrew Piper grew up liking books and loving computers. While occasionally burying his nose in books, he was going to computer camp, programming his Radio Shack TRS-80, and playing Pong. His eventual love of reading made him a historian of the book and a connoisseur of print, but as a card-carrying member of the first digital

generation—and the father of two digital natives—he understands that we live in electronic times. *Book Was There* is Piper’s surprising and always entertaining essay on reading in an e-reader world. Much ink has been spilled lamenting or championing the decline of printed books, but Piper shows that the rich history of reading itself offers unexpected clues to what lies in store for books, print or digital. From medieval manuscript books to today’s playable media and interactive urban fictions, Piper explores the manifold ways that physical media have shaped how we read, while also observing his own children as they face the struggles and triumphs of learning to read. In doing so, he uncovers the intimate connections we develop with our reading materials—how we hold them, look at them, share them, play with them, and even where we read them—and shows how reading is interwoven with our experiences in life. Piper reveals that reading’s many identities, past and present, on page and on screen, are the key to helping us understand the kind of reading we care about and how new technologies will—and will not—change old habits. Contending that our experience of reading belies naive generalizations about the future of books, *Book Was There* is an elegantly argued and thoroughly up-to-date tribute to the endurance of books in our ever-evolving digital world.

Hello in There! Jo Witek,2013-05-07 From the author and illustrator of the bestselling *In My Heart* This oversized interactive book is a heartfelt look at the wonder and excitement of waiting . . . and waiting . . . and waiting for a new sibling to arrive. The charming protagonist is so eager to step into her role as a big sister that she's starting early She sticks close to her mama so she can sing songs to her sibling-to-be (loudly, of course) and explain all the great things waiting in the outside world (cupcakes strawberries swimming). I'll Meet You There Heather Demetrios, 2015-02-03 If seventeen-year-old Skylar Evans were a typical Creek View girl, her future would involve a double-wide trailer, a baby on her hip, and the graveyard shift at Taco Bell. But after graduation, the only thing standing between straightedge Skylar and art school are three minimum-wage months of summer. Skylar can taste the freedom—that is, until her mother loses her job and everything starts coming apart. Torn between her dreams and the people she loves, Skylar realizes everything she's ever worked for is on the line. Nineteen-year-old Josh Mitchell had a different ticket out of Creek View: the Marines. But after his leg is blown off in Afghanistan, he returns home, a shell of the cocksure boy he used to be. What brings Skylar and Josh together is working at the Paradise—a quirky motel off California's dusty Highway 99. Despite their differences, their shared isolation turns into an unexpected friendship and soon, something deeper.

Anthony Lukas Award Nimble splices together history, science, reporting and personal experiences into a taut and cautiously hopeful narrative.... Egan's book is bursting with life (and yes, death). —Robert Moor, New York Times Book Review The Great Lakes—Erie, Huron, Michigan, Ontario, and Superior—hold 20 percent of the world's supply of surface fresh water and provide sustenance, work, and recreation for tens of millions of Americans. But they are under threat as never before, and their problems are spreading across the continent. Out There Michael Wall, 2018-11-13 In the vein of Randall Munroe's *What If?* meets Brian Green's *Elegant Universe*, a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really out there. We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In *Out There* Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions

that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? Out There is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever./DIV

From There to Here Robert M. Rock,2000-12-20 The stories he tells here were written at random over a period of several months, appearing as layers peeled off a consciousness onion, never knowing which ones would arise next. Eventually they were arranged into a chronology which resulted in a rather unusual autobiographical form. Each story is complete and essentially stands alone, yet together all blend into one encompassing and distinct story. As new stories continue to take shape, and more old ones emerge from the onion, these may serve the possibility for future stories. The acclaim Rock's stories have begun to receive is evidenced by one having already been selected for reading over National Public Radio, June past of this year within only one week of submittal the Striped Pen story.

Here/There Kris Paulsen, 2017-02-24 An examination of telepresence technologies through the lens of contemporary artistic experiments, from early video art through current "drone vision" works. Telepresence" allows us to feel present—through vision, hearing, and even touch—at a remote location by means of real-time communication technology. Networked devices such as video cameras and telerobots extend our corporeal agency into distant spaces. In *Here/There*, Kris Paulsen examines telepresence technologies through the lens of contemporary artistic experiments, from early video art through current "drone vision" works. Paulsen traces an arc of increasing interactivity, as video screens became spaces for communication and physical, tactile intervention. She explores the work of artists who took up these technological tools and questioned the aesthetic, social, and ethical stakes of media that allow us to manipulate and affect far-off environments and other people—to touch, metaphorically and literally, those who cannot touch us back. Paulsen examines 1970s video artworks by Vito Acconci and Joan Jonas, live satellite performance projects by Kit Galloway and Sherrie Rabinowitz, and CCTV installations by Chris Burden. These early works, she argues, can help us make sense of the expansion of our senses by technologies that privilege real time over real space and model strategies for engagement and interaction with mediated others. They establish a political, aesthetic, and technological history for later works using cable TV infrastructures and the World Wide Web, including telerobotic works by Ken Goldberg and Wafaa Bilal and artworks about military drones by Trevor Paglen, Omar Fast, Hito Steyerl, and others. These works become a meeting place for here and there.

continues to struggle with the tragedy of inexplicable human suffering and the endurance of evil. The pressing issue of Where is God? in seemingly godless situations provides the focus of *Were You There?* *Godforsakenness in Slave Religion*. In this book, David Emmanuel Goatley investigates the doctrine of God in relation to the experience of those living under conditions of extreme oppression. In this experience of *Godforsakenness* Goatley finds an echo of Jesus' poignant cry from the cross, My God, why have you forsaken me? *Were You There?* approaches this question through a narrative methodology, particularly by examining the slave narratives as well as the spirituals that were products of the same era. Both these sources provide important ways of viewing the experience of *Godforsakenness* and the problem of God's presence or absence in the extremities and absurdities of human suffering. Using these insights as a hermeneutic, *Were You There?* then proceeds to an interpretation of Jesus' cry of dereliction in Mark.
