  The Comprehension Toolkit Stephanie Harvey,Anne Goudvis,2005 Grades 3-6 Active literacy is the means to deeper understanding and diverse, flexible thinking, and is the hallmark of our approach to teaching and learning. Reading, writing, talking, listening, and investigating are the cornerstones of active literacy. The Toolkit captures the language of thinking we use to explicitly teach kids to comprehend the wide variety of informational text they encounter. Through the Toolkit lessons, we demonstrate how the kids adopt and adapt our teaching language as their learning language. - Stephanie Harvey and Anne Goudvis In The Comprehension Toolkit, Stephanie Harvey and Anne Goudvis have created an intensive curricular resource designed to help students understand, respond to, and learn from nonfiction text. By actively engaging students in reading, talking, and writing about information and ideas, The Comprehension Toolkit provides a foundation for developing independent readers and learners across the curriculum and throughout the school year. Framed around the Gradual Release of Responsibility approach, The Comprehension Toolkit provides scaffolded comprehension strategy instruction. First through modeling and guided practice, then releasing responsibility to students through collaborative practice, independent practice, and application, the Toolkit's lessons teach students to use comprehension strategies flexibly in a variety of texts, topics, and subject areas. Professional Support A series of resources introduce, support, and extend the Toolkit's core lessons. The Teacher's Guide outlines the thinking behind the Toolkit and describes its components, instructional design, and assessment options. The Resources for The Comprehension Toolkit CD-ROM provides an array of print and video resources including a photographic overview of an Active Literacy Classroom, downloadable research articles, templates, assessment masters, and full-colour lesson text. Extend and Investigate helps you extend the Toolkit's comprehension strategies across the curriculum and throughout the year. It provides strategies for content area reading and research, textbook reading, test reading, and a variety of practical bibliographies. 6 Strategy Clusters The 26 strategy lessons in The Comprehension Toolkit are organized into six Strategy Cluster books. Informational Text A series of short, engaging, real-world informational texts provide an effective context for using and practising the Toolkit's comprehension strategies. The Source Book of Short Text provides two kinds of nonfiction text: Lesson Text, 24 articles from children's magazines; and Nonfiction Short Text, 43 short informational articles specially written for the Toolkit.

The Data Warehouse Lifecycle Toolkit Ralph Kimball,Margy Ross,Warren Thornthwaite,Joy Mundy,Bob Becker,2008-01-10 A thorough update to the industry standard for designing, developing, and deploying data warehouse and business intelligence systems The world of data warehousing has changed remarkably since the first edition of The Data Warehouse Lifecycle Toolkit was published in 1998. In that time, the data warehouse industry has reached full maturity and acceptance, hardware and software have made staggering advances, and the techniques promoted in the premiere edition of this book have been adopted by nearly all data warehouse vendors and practitioners. In addition, the term business intelligence emerged to reflect the mission of the data warehouse: wrangling the data out of source systems, cleaning it, and delivering it to add value to the business. Ralph Kimball and his colleagues have refined the original set of Lifecycle methods and techniques based on their consulting and training experience. The authors understand first-hand that a data warehousing/business intelligence (DW/BI) system needs to change as fast as its surrounding organization evolves. To that end, they walk you through the detailed steps of designing, developing, and deploying a DW/BI system. You'll learn to create adaptable systems that deliver data and analyses to business users so they can make better business decisions.
