Encyclopedia of Vedic Astrology: Planetary Transit

Shanker Adawal, Transits are one of the main means used in horoscope reading. They are used to forecast future trend and developments. Astrological transit is about interpreting the ongoing movement of the planets as they transit the horoscope. These transits are studied in the Natal Charts to tell about the timing or fructification of the events. In this book the initial chapters deal with the basic understanding of the meaning of Transit, the rules to be applied and about the planets. We have also dealt with the rules to be applied in predicting the result of transiting planets. Basic Transit Rules of planets in Houses, Signs, Nakshatra and Divisional Charts is explained at length. The book then dwells in factors that modify the results of a Transit. It then goes into explaining the impact of the transiting inner planets. I have also gone in details explaining the impact of Jupiter, Saturn, Nodes and Mars in Transit with various permutation and combination.

Transits Over Natal Planets Saket Shah, 2021-10-16 Dear Reader, We always wonder what happen when a particular planet transit over other or trine or square to any planet. Or in particular house in astrology. In this book I am trying my best to cover all the transit in houses and over natal planets in very simple and understandable method. You can check your horoscope and current transit and predict what kind of results can be expected from transits. Also I am using some of transit of western astrology and vedic astrology combined here for benefit of readers. All major planet transits are covered along with proper details to be use while predicting. This can be your one stop book for transits. I hope you will enjoy reading and benefit from this information. This book can help in solving our curiosity to understand the results of transit. Regards, Saket Shah

Planets in Transit Robert Hand, 2002 This book covers complete delineations of all the major transits - conjunction,

sextile, square, trine and opposition - that occur between transiting Sun, Moon and all planets to each planet in the natal chart and the Ascendant and Midheaven, as well as complete delineations of each planet transiting each house of the natal chart. These 720 lucid delineations are full of insight for both the professional astrologer and the beginner.

Astrologia Gallica Book 24 Jean Baptiste Morin, 2005-11 This book is an English translation of Book 24 of the *Astrologia Gallica*, in which Morin explains the proper use of Transits to pinpoint the time when a predicted event will occur. He first criticizes the various types of symbolic directions used by other astrologers of his day and then sets forth his own method of prediction with numerous examples. The nature and time of an event in a person's life can be determined from his Natal Horoscope, its Primary Directions, Solar and Lunar Returns and their Primary Directions, and concordant Transits. By following the method that he sets forth, it is sometimes possible to determine the exact Day when the event signified by a radical Primary Direction will occur. Morin was a physician who became the most renowned of all French astrologers. He was appointed Royal Mathematician to King Louis XIII and was summoned to be present at the birth of the royal heir, the future King Louis XIV. The present volume also contains example charts drawn for the actual times of significant events in the lives of a number of 17th century celebrities; each chart is accompanied by an explanation of how the several factors combined to produce the events at the times shown. The book closes with two chapters setting forth general instructions for determining the precise time of events and a final chapter with valuable rules for reading natal horoscopes. James Herschel Holden is Research Director of the American Federation of Astrologers.

The Transiting Planets Frances Sakoian, Louis

Acker,2009-11 This encompassing work on the transiting planets as used in predictive astrology includes the meaning of the transiting planets through each of the houses and delineation for each planet in aspect to every other planets. All major aspects are interpreted, giving you easy aspect to the meaning of the square, trine, sextile, conjunction and opposition. Each planet is featured in its own chapter. In addition, the authors delineate the Moon through each of the signs from both the personal and mundane, or public, perspectives. The introduction presents the authors' advice and guidance on overall interpretation of transits, their time frame and how to determine their relevance to major and minor events in your life. With this handy book you can quickly and easily access information needed to fine-tune astrological forecasts, and thus determine more favorable days for a wide range of activities.

Astrological Transits April Elliott Kent,2015-08-15 Your birth chart is a snapshot of the sky taken at the moment and place of your birth, one that reflects your character, personality, strengths, and challenges. But the moment after that picture was taken, the planets moved on--some quickly, some very slowly. Astrologers call the moving planets transits, and by comparing their movements to your birth chart you can gain a complete view of how best to prepare for challenges, meet opportunities, and stay grounded in a constantly-changing world. In *Astrological Transits*, astrologer April Elliott Kent will guide you through the best ways to make the most of your birth chart. Learn how to make the most of good transits and harness and transform the energy of bad ones. You'll also understand planetary cycles and anticipate your own transits. Finally, you'll know how to read planetary return charts, work with planetary retrogrades, and use eclipses to recognize major patterns and turning points in your life. If you are comfortable reading a birth chart, you are ready to move your chart into the future using transits. Instructions, tables, and worksheets will make tracking your transit cycles simple and exciting!

Traité complet d'interprétation des transits et des révolutions solaires en astrologie Ciro Discepolo, 2001

Transit of Planets Vinay Garg, Transit of planets talks about the technique of making predictions on the basis of current position of planets on the horoscope of native. The main objective of Astrology is to predict the future of the native with the help of his horoscope. For making accurate prediction it is necessary to make an analysis of three factors. These three factors are YOGAS formed with the combination and permutation of planets, 2nd important factor is periods (dasa) and 3rd factor is transit. When a person comes with a query, first of all it should be analyzed that the query is related with which house, planets, the planet occupying this house and the planets aspecting this house. The determination of the auspicious or inauspicious results of that house shall be done by analyzing three factors. These are house, house Lord and significators. For example if the question asked is regarding marriage in that case we shall see that which planets are there in seventh house, this house is aspected by which planets. Marriage yoga for the possibility of marriage is there or not and in addition to that the position of significator of 7th house i.e. Jupiter/Venus should be analyzed. For females the significator of 7th house is Jupiter and for males the natural significator of 7th house is Venus. By analyzing the placement, combination, and benefic or malefic impact of these planets we conclude whether auspicious yoga for the possibility of marriage is there or not. After Yoga next important factor to be considered is major or sub period, the duration of main period is a long and sub period's duration also can be 6 months or more than 2 years therefore, in order to predict the timing of an event during these 2 years the help of transit can be taken. Therefore, for predicting an event the importance of transit should be considered. Although it is a matter of long discussion to determine whether transit predictions should be made on the basis of ascendant sign or moon sign. For supporting the predictions from both, scholars have given logical

and justifiable opinions. But, the conclusions that we have derived on the basis of our experience advocate that auspiciousness or inauspiciousness of the transit results of planets should be done on the basis of moon sign and what type of results i.e, which house results it shall yield would be decided on the basis of ascendant sign. For instance if moon is positioned in 7th house and the sign of Leo is there, therefore transit of Saturn into this sign shall cause negative impact of Saturn's SADHESATI because transit of Saturn into Leo shows inauspicious results therefore there can be delay or problems in marriage and married life. Similarly what can be the results of transit of planets by considering the other important factors has been taken into account in this book. Because of lack of availability of books in the field of transit predictions this book has been written for catering the need of students of all India Federation of Astrologer's Societies Delhi. This book shall be of immense help for solving the problems of students while studying the techniques of making predictions.

Planetary Transits MUKUND TARE,2022-10-06 As an astrologer, you might be wondering how you could develop your precision in predicting events on a daily, monthly, and yearly basis as enquired by a Jataka (the enquirer). This book aims to satisfy your curiosity and guide you through developing new facets of predictive astrology by studying ever-changing star positions across the universe and their impacts on Jataka's life events. The lessons learned by the author over the last five decades are lucidly written in this book. This book not only gives ideas about the application of transiting stars on individual ascendants, but it also demonstrates the impact of specific planetary positions through examples of how certain "what & why events" may have happened in the lives of notable people around the world.

Venus in Transit Eli Maor, 2004-02 In 2004, Venus crossed the sun's face for the first time since 1882. Some did not bother to step outside. Others planned for years, reserving tickets to see the transit in its entirety. But even this group of astronomers and experience seekers were attracted not by scientific purpose but by the event's beauty, rarity, and perhaps--after this book--history. For previous sky-watchers, though, transits afforded the only chance to determine the all-important astronomical unit: the mean distance between earth and sun. Eli Maor tells the intriguing tale of the five Venus transits previously observed and the fantastic efforts made to record them. This is a story of heroes and cowards, of reputations earned and squandered, all told against a backdrop of phenomenal geopolitical and scientific change. With a novelist's talent for the details that keep readers reading late, Maor tells the stories of how Kepler's misguided theology led him to the laws of planetary motion; of obscure Jeremiah Horrocks, who predicted the 1639 transit only to die, at age 22, a day before he was to discuss the event with the only other human known to have seen it; of the unfortunate Le Gentil, whose decade of labor was rewarded with obscuring clouds, shipwreck, and the plundering of his estate by relatives who prematurely declared him dead; of David Rittenhouse, Father of American Astronomy, who was overcome by the 1769 transit's onset and failed to record its beginning; and of Maximilian Hell, whose good name long suffered from the perusal of his transit notes by a color-blind critic. Moving beyond individual fates, Maor chronicles how governments' participation in the first international scientific effort--the observation of the 1761 transit from seventy stations, yielding a surprisingly accurate calculation of the astronomical unit using Edmund Halley's posthumous directions--intersected with the Seven Years' War, British South Seas expansion, and growing American scientific prominence. Throughout, Maor guides readers to the upcoming Venus transits in 2004 and 2012, opportunities to witness a phenomenon seen by no living person and not to be repeated until

2117.

Saturn in Transit Erin Sullivan,2000-10-15 “An elegant guide to working with Saturn energy in your life” by the author of *The Astrology of Midlife and Aging* (FindAnAstrologer.com). Saturn in Transit reveals Saturn’s useful and developmental influence in our lives. Erin Sullivan gives a thorough account of the astrology, mythology, and psychology of Saturn’s role as the source of divine discontent. Saturn assists the modern hero and heroine, during its transit around the zodiac, by destroying the old and outmoded within, and throwing us periodically into chaos, which invariably generates a creative transformation of purpose in our lives. “One of the very best books on Saturn, great insights . . . Sullivan draws extensively on depth psychology and classical mythology to portray Saturn’s developmental influence on our lives.”—The Tim Burness Blog “I highly recommend this book. In fact, it has informed many aspects of my own practice and is a go-to book when preparing clients charts . . . Without a doubt, this is a must-have book in your astrological library.”—Ask Astrology “A very good book on Saturn cycles.”—soulhealing.com

Eclipses, Transits, and Comets of the Nineteenth Century Stella Cottam,Wayne Orchiston,2014-09-16 Winner of the AAS 2019 Donald E. Osterbrock Book Prize for Historical Astronomy Grabbing the attention of poets, politicians and the general public alike, a series of spectacular astronomical events in the late 1800s

galvanized Americans to take a greater interest in astronomy than ever before. At a time when the sciences were not yet as well established in the United States as they were in Europe, this public interest and support provided the growing scientific community in the United States with the platform they needed to advance the field of astronomy in the United States. Earlier in the 19th century comets, meteors and the discovery of the planet Neptune were all sources of inspiration to the general public. The specific events to be considered here are the total solar eclipses of 1868, 1869 and 1878 and the transits of Venus of 1874 and 1882. The available media responded to public interest as well as generating more interest. These events laid the groundwork that led to today's thriving network of American amateur astronomers and provide a fascinating look at earlier conceptions of the stars.
