Its three parts are (1) Sam Blumenfeld's amazingly easy to teach systematic, intensive phonics READING instruction program. (2) His effective CURSIVE HANDWRITING program and (3) his equally effective ARITHMETIC PROGRAM. Has been used by 100,000's parents, teachers and tutors. Mary Pride, leading homeschooling materials reviewer, calls it a best value. 298 pages. How To Tutor works at ALL ages. Anyone who can read can teach the 3 R's with it. WHY IS HOW TO TUTOR IMPORTANT? Dr. Blumenfeld warns: Most parents wait until their child is having difficulty at school before they think of providing remediation. Sometimes the child is so far behind, so confused, so frustrated by not learning in the first two grades, that the remedial program looks long and difficult. However, proper tutoring at the preschool level or in the first two grades, as a preventive measure, can make sure that the child has the foundation on which to build achievement. How To Tutor provides parents and teachers with a complete instructional program: step-by-step lesson plans in the Three R's. It originally was to help public school students. Since then the continued decline in many public schools made HOMESCHOOLING much more important. Homeschool families discovered what a gem this book is for them. HERE ARE THE THREE SECTIONS: PART (1) READING: The big problem in schooling today. How To Tutor shows how to avoid the confusion in teaching reading that prevails in our schools today. 117 complete lessons. Contains everything you need to teach your student to be a top reader. You learn the dirty little secret professional educators keep from you: It is really EASY TO TEACH READING! There are only 44 sounds (Phonograms) you need to teach your student to build a high level of reading skill. PART (2) CURSIVE HANDWRITING: Many Parents and Grandparents today are often shocked to learn that in many schools cursive is not taught. With How To Tutor you are given all the tools you need to teach this important skill with ease. Here is another little secret: Cursive can be taught BEFORE printing (ball & stick). There are only THREE basic strokes involved in cursive handwriting. Most children can learn these at a surprisingly early age. Learning about this will amaze you. 73 complete lessons. PART (3) ARITHMETIC: Quoting Dr. Blumenfeld: In teaching arithmetic it is important to convey the genius of the system itself. Next to the alphabet, it is the greatest mental tool ever devised by man. We should approach the subject with the excitement it deserves. Any teacher who makes arithmetic dull does so because he does not understand its beautiful simplicity, logic and facility which permit us to do so much with so little. HTT Arithmetic covers addition, subtraction, multiplication, division, fractions, decimals, weights, time, and the calendar. Everything up to just before geometry and algebra. All this in 67 easy lessons. FINAL WORD: Anyone can use these lesson plans: Students, Parents, Teachers, Tutors, Retired Teachers, Housewives and Grandparents. Tutoring can be a good way to earn extra money while aiding people who need help to improve their reading, handwriting and arithmetic ability. Some of the claims we make may appear unbelievable. They are TRUE. We have heard from countless users who cannot say enough about HTT's simplicity and effectiveness. See for yourself. Money back guarantee. HTT also available at Amazon in: How To Tutor eBook - CD ROM version (ISBN 9780941995474- \$ 17.95).

Student Writing Tutors in Their Own Words Max Orsini, Loren Kleinman, 2022-06-24 Student Writing Tutors in Their Own Words collects personal narratives from writing tutors around the world, providing tutors, faculty, and writing center professionals with a diverse and experience-based understanding of the writing support process. Filling a major gap in the research on writing center theory, first-year writing pedagogy, and higher education academic support resources, this book provides narrative evidence of students' own experiences with learning assistance discourse communities. It features a variety of voices that address how academic support resources such as writing centers have served as the nucleus for students' (i.e., both tutors and their clients) sense of community and self, ultimately providing a space for freedom of discourse and expression. It includes narratives from writing tutors supporting students in unconventional spaces such as prisons, tutors offering support in war-torn countries, and students in international centers facing challenges of distance learning, access, and language barriers. The essays in this collection reveal pedagogical takeaways and insights about both student and tutor collaborative experiences in writing center spaces. These essays are a valuable resource for student writing tutors and anyone involved with them, including composition instructors and scholars, writing center professionals, and any faculty or administrators involved with academic support programs.

Talk about Writing Jo Mackiewicz, Isabelle Thompson, 2018-04-24 Talk about Writing: The Tutoring Strategies of Experienced Writing Center Tutors offers a book-length empirical study of the discourse between experienced tutors and student writers in satisfactory conferences. It analyzes writing center talk, focusing on tutors' verbal strategies, at the macro- and microlevels. The study details tutors' use of three categories of tutoring strategies—instruction, cognitive scaffolding, and motivational scaffolding—with each chapter of the analysis ending in practical advice about tutor training. The second edition adds to the discussion of research provided in the first edition, maintaining the two previous goals: to provide a theory-based coding scheme for analyzing tutoring strategies according to their potential for instructing and scaffolding student writers' learning, and to demonstrate that analysis on 10 satisfactory conferences conducted by experienced writing center tutors. New to this edition, the authors expand the previous discussion of the coding scheme with additional details about its development. Along with the expanded Chapter 3 about research methods, this edition features new examples from the corpus of conferences and updates the literature review.

The Tutor Peter Abrahams,2002-06-25 Master of psychological suspense Peter Abrahams returns with an ingenious tale of an ordinary family that unknowingly invites the agent of their destruction into their own home. When Scott and Linda Gardner hire Julian Sawyer to tutor their troubled teenage son Brandon, he seems like the answer to a prayer. Capable and brilliant, Julian connects with Brandon in a way neither of his parents can. He also effortlessly helps Linda to salvage a troubled business deal and gives Scott expert advice on his tennis game. Only eleven-year old Ruby—funny, curious, devoted to Sherlock Holmes—has doubts about the stranger in their midst who has so quickly become like a member of the family. But even the observant Ruby is far from understanding Julian’s true designs on the Gardners. For Julian, the Gardners are like specimens in jars, creatures to be studied— and manipulated. Scott is a gambler with no notion of odds, festering in the shadow of his more successful brother. Linda is ambitious, hungry for the cultured stimulation Julian easily provides. Brandon is risking his future late at night in the town woods. And Ruby—well, she’s just a silly little girl. And in that miscalculation lies the Gardner family’s only possible salvation. In *The Tutor*, Peter Abrahams creates a living, breathing portrait of an American family, their town, their secrets, their dreams—and a portrait just as compelling of the menace they welcome into their home. It is his most chilling, suspenseful novel to date.
