The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be

shared for generations to come.

Includes mobile YouTube and adding videos to your MySpace page or another Web site. *I Always Wanted To Direct*—explores how to use YouTube's directors program to upload longer video, use the site for marketing, or launch your own videoblog.

YouTube Herbert Toomey,2016-06-13 One of the reasons why YouTube is so popular, aside from the

fact that you can watch or upload movies to the YouTube site for free, is the fact that you can rate, leave comments, or talk about YouTube videos with other internet users. If you talk with certain members enough you may end up developing a close online friendship with them. Still, it is advised that you keep the previously mentioned safety tip in mind; do not give out any of your personal information.

YouTube Jean Burgess, Joshua Green, 2013-09-04
YouTube is one of the most well-known and widely discussed sites of participatory media in the contemporary online environment, and it is the first genuinely mass-popular platform for user-created video. In this timely and comprehensive introduction to how YouTube is being used and why it matters, Burgess and Green discuss the ways that it relates to wider transformations in culture, society and the economy. The book critically examines the public debates surrounding the site, demonstrating how it is central to struggles for authority and control in the new media environment. Drawing on a range of theoretical sources and empirical research, the authors discuss how YouTube is being used by the media industries, by audiences and amateur producers, and by particular communities of interest, and the ways in which these uses challenge existing ideas about cultural 'production' and 'consumption'. Rich with both concrete examples and featuring specially commissioned chapters by Henry Jenkins and John Hartley, the book is essential reading for anyone interested in the contemporary and future implications of online media. It will be particularly valuable for students and scholars in media, communication and cultural studies.

The First 20 Hours Josh Kaufman, 2013-06-13
Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours

or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to

practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Watching YouTube Michael Strangelove, 2010-04-30
An anonymous musician plays Pachelbel's Canon on the electric guitar in a clip that has been viewed over sixty million times. The Dramatic Gopher is viewed over sixteen million times, as is a severely inebriated David Hasselhoff attempting to eat a hamburger. Over 800 variations, parodies, and parodies-of-parodies are uploaded of Beyonce Knowles' Single Ladies dance. Tay Zonday sings Chocolate Rain in a video viewed almost forty million times and scores himself a record deal. Obama Girl enters the political arena with contributions such as I Got a Crush on Obama and gets coverage in mainstream news networks. In Watching YouTube, Michael Strangelove provides a broad overview of the world of amateur online videos and the people who make them. Dr. Strangelove, the Governor General Literary Award-nominated author that Wired Magazine called a 'guru of Internet advertising,' describes how online digital video is both similar to and different from traditional home-movie-making and argues that we are moving into a post-television era characterized by mass participation. Strangelove draws from television, film, cultural, and media studies to help define an entirely new field of research. Online practices of representation, confessional video diaries, gendered uses of amateur video, and debates over

elections, religion, and armed conflicts make up the bulk of this groundbreaking study, which is supplemented by an online blog at strangelove.com/blog. An innovative and timely study, *Watching YouTube* raises questions about the future of cultural memory, identity, politics, warfare, and family life when everyday representational practices are altered by four billion cameras in the hands of ordinary people.

The Discourse of YouTube Phil Benson, 2016-10-26
The Discourse of YouTube explores the cutting edge of contemporary multimodal discourse through an in-depth analysis of structures, processes and content in YouTube discourse. YouTube is often seen as no more than a place to watch videos, but this book argues that YouTube and YouTube pages can also be read and analysed as complex, multi-authored, multimodal texts, emerging dynamically from processes of textually-mediated social interaction. The objective of the book is to show how multimodal discourse analysis tools can help us to understand the structures and processes involved in the production of YouTube texts. Philip Benson develops a framework for the analysis of multimodality in the structure of YouTube pages and of the multimodal interactions from which their content emerges. A second, and equally important, objective is to show how the globalization of YouTube is central to much of its discourse. The book identifies translingual practice as a key element in the global discourse

of YouTube and discusses its roles in the negotiation of identities and intercultural learning in videos and comments. Focusing on YouTube as a key example of new digital media, The Discourse of YouTube makes a substantial contribution to conversations about new ways of producing multimodal text in a digital world.
