This book is an approachable guide to AAC and covers the various types, including paper-based and voice-output communication aids. There is guidance on how to assess a person who might need AAC, and how to work collaboratively with those who support the person on a daily basis. Written by an expert in the field, this book provides tips and strategies for SLTs who are brand new to AAC, as well as experienced clinicians wanting to gain further confidence in working with this varied client group.

Augmentative and Alternative Communication and Severe Disabilities Erna Alant, Lyle Lloyd, 2005-11-29 Communities and countries who are not affluent or economically and socially disadvantaged present their own set of intervention circumstances that need to be taken into account

when planning intervention for people with disabilities particularly those with AAC need. This book presents a different perspective on AAC intervention by focusing on the application of various AAC related issues within a poverty context. It is intended for advanced students and professionals across disciplines that are interested in extending their knowledge and critical thinking to advance issues surrounding AAC intervention within a poverty context.

Augmentative and Alternative Communication Intervention Janet L. Dodd, 2017-06-30 Augmentative and Alternative Communication Intervention: An Intensive, Immersive, Socially Based Delivery Model is ideal for school-based speech-language pathologists (SLPs) and an excellent resource for interventionists (special education teachers, ABA therapists) and SLPs working in other settings who wish to develop an intensive, immersive Augmentative and Alternative Communication (AAC)-based intervention through a three-phase intervention process: assessment, intervention planning, and intervention implementation. Written by an SLP who has worked in a public school setting and saw to the application of theory to practice, the text provides detailed information regarding working with children who have complex communication needs and the background knowledge necessary for successful implementation of the intervention approach. Included are considerations for vocabulary selection for the beginning communicator, how to create a symbolically rich environment, detailed intervention approaches, and progress monitoring strategies that establish appropriate, measurable goals. AAC will no longer be an alternative means of communication but a best practice means of teaching communication in the SLP's or interventionist's repertoire. Making the leap from the theoretical to the practical, this essential book: Describes the intervention needs of children with complex communication needs and the limitations of current approaches (e.g., PECS, Milieu Training, Functional Communication Training). Operationally defines the goal of AAC intervention, discussing its complexities, including the limitations of a pull-out model. Introduces the Intensive, Immersive, Socially Based Approach to Intervention and briefly describes each phase of the intervention process. Discusses how AAC assessments differ from traditional assessments of speech and language skills, as well as provides an overview of different assessment models and their contribution to the intervention process. Examines the importance of training support staff to key components of this intervention model. Contains information on the application of language-based intervention strategies to AAC. Talks about the importance of progress monitoring and how to use functional communication measures and communication sampling, a new and innovative technique developed by the author, to monitor progress. Provides example lesson plans and example goals addressing each area of communicative competence. *Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.
