Unfolding Practice Arzu Mistry,2016-06-01 Unfolding Practice: Reflections on Learning and Teaching is a conversation between two artist-educators. Flowing across five chapters, the double sided accordion book has been curated from ten years of recorded conversations, field notes, planning, sketches, reflection, and teaching. The front of the book weaves text, illustration, cutouts, and screen prints, journeying through artistic process and educational practice. The back of the book is a guide, expanding on the practice of using accordion books as a tool for capturing, visualizing, and building upon reflective thinking. The brown paper alludes to the craft paper that is ubiquitous in schools and captures process more than the preciousness of a final product.

She also explores the accordion's rebirth in contemporary music, from the parodies of Weird Al Yankovic to geek rock legends They Might Be Giants to accordion-wielding superstars like Bruce Springsteen and Sheryl Crow. The Accordion in the Americas Helena Simonett,2012-10-16 An invention of the Industrial Revolution, the accordion provided the less affluent with an inexpensive, loud, portable, and durable one-man-orchestra capable of producing melody, harmony, and bass all at once. Imported from Europe into the Americas, the accordion with its distinctive sound became a part of the aural landscape for millions of people but proved to be divisive: while the accordion formed an integral part of working-class musical expression, bourgeois commentators often derided it as vulgar and tasteless. This rich collection considers the accordion and its myriad forms, from the concertina, button accordion, and piano accordion familiar in European and North American music to the exotic-sounding South American bandoneón and the sanfoninha. Capturing the instrument's spread and adaptation to many different cultures in North and South America, contributors illuminate how the accordion factored into power struggles over aesthetic values between elites and working-class people who often were members of immigrant and/or marginalized ethnic communities. Specific histories and cultural contexts discussed include the accordion in Brazil, Argentine tango, accordion traditions in Colombia, cross-border accordion culture between Mexico and Texas, Cajun and Creole identity, working-class culture near Lake Superior, the virtuoso Italian-American and Klezmer accordions, Native American dance music, and American avant-garde. Contributors are María Susana Azzi, Egberto Bermúdez, Mark DeWitt, Joshua Horowitz, Sydney Hutchinson, Marion Jacobson, James P. Leary, Megwen Loveless, Richard March, Cathy Ragland, Helena Simonett, Jared Snyder, Janet L. Sturman, and Christine F. Zinni.

Flute, Accordion or Clarinet? Dawn Loombe,Jo Tomlinson,Amelia Oldfield,2015-04-21 Music therapists are trained to use their first study instrument in clinical practice, yet existing literature focuses almost exclusively on the use of piano, basic percussion and voice. This illuminating book brings together international music therapists who use a diverse range of musical instruments in their clinical work: the clarinet, the piano accordion, the flute, the cello, the trumpet and flugelhorn, the bassoon, the violin, the viola, the harp, the guitar, lower brass instruments (the trombone and the euphonium), the oboe, the saxophone and bass instruments (double bass and bass guitar). Each therapist reflects on their relationship with their instrument and the ways in which they use it in therapeutic settings, discussing its advantages and disadvantages in a variety of clinical populations: children and adolescents, adults with learning disabilities, adults with mental health problems and older people. This will be essential reading for any music therapist or student music therapist who uses or is interested in using a musical instrument in their work, and will be of interest to other caring and healthcare professionals, teachers, musicians and carers wanting to learn more about instrumental music therapy.

PaperCrafter The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in The Art of the Fold. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, The Art of the Fold is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers – how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of The Art of the Fold attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t
