Baruch Lev,Feng Gu,2016-06-14 An innovative new valuation framework with truly useful economic indicators The End of Accounting and the Path Forward for Investors and Managers shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable alternative. Based on a comprehensive, large-sample empirical analysis, this book reports financial documents' continuous deterioration in relevance to investors' decisions. An enlightening discussion details the reasons why accounting is losing relevance in today's market, backed by numerous examples with real-world impact. Beyond simply identifying the problem, this report offers a solution—the Value Creation Report—and demonstrates its utility in key industries. New indicators focus on strategy and execution to identify and evaluate a company's true value-creating resources for a more up-to-date approach to critical investment decision-making. While entire industries have come to rely on financial reports for vital information, these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate. This book demonstrates an alternative, giving you a new framework for more informed decision making. Discover a new, comprehensive system of economic indicators Focus on strategic, value-creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable, up-to-date information Major corporate decisions, such as restructuring and M&A, are predicated on financial indicators of profitability and asset/liabilities values. These

documents move mountains, so what happens if they're based on faulty indicators that fail to show the true value of the company? The End of Accounting and the Path Forward for Investors and Managers shows you the reality and offers a new blueprint for more accurate valuation.

Bridging the GAAP Itzhak Venezia, Zvi Wiener, 2012 Bridging the GAAP: Recent Advances in Finance and Accounting aims to promote a stronger interface between researchers in accounting and finance that will enhance the understanding of the similarities and differences between these two fields. Such dialog will also acquaint researchers in each area with significant recent advances in the other area, and will enable a cross fertilization of thoughts, from which both can significantly benefit. This consolidates the efforts to bridge the gap between finance and accounting by looking at diverse topics in accounting and finance and providing interesting points of view on different topics. Most of the chapters concentrate on the topic of fair value accounting and on the question of the extent to which accounting reflects the financial situation of a firm. The book combines new developments in the area of theoretical finance and accounting, and the convergence of these two approaches to better serve investors and the general public.
