**Michael R. Miller**

**Skip Ad In 5** Gordon Torr,Faisal Ahmed,2018-11-10 The Chief Marketing Officer has never had it so good. Or so bad. Just as data, technology and real-time insights have made it possible to connect, measure and adjust brand messaging at every point of the customer journey, ad-skipping is teaching the same customers to ignore it - and ad-blocking is enabling them to avoid it entirely.The CMO's paradox won't be resolved by the traditional tools of brand planning, nor by doubling down on digital surveillance and manipulation.Now a digital maverick and a seasoned creative director have combined their experience and knowledge of the world's biggest brands to put forward a radical alternative.Outlined in five brief chapters, their phenomenological model reveals that the fastest growing businesses are succeeding by removing the physical, emotional and informational friction that currently intervenes between buyers and sellers - in some cases by facilitating purchase and delivery - but increasingly by removing the kind of brand noise that is turning the expected customer response of attraction very suddenly to repulsion.The ad-blocker's guide to brand planning is timely, important - and unskippable.About the authors: Faisal Ahmed is a digital trailblazer who continues to defy categorisation. He has advised video game companies, Premier League football clubs, pharmaceutical corporates and the UK government, among many others. Faisal co-authored the definitive guide to digital marketing in healthcare, and is leading the fight for greater diversity in UK and global advertising. Gordon Torr is a former global creative director of J. Walter Thompson, a part-time brand planner, a part-time novelist, an international conference speaker and the author of Managing Creative People.

**Ad Blocking Survival Guide** Neil Smyth,2016-04-04 Over 200 million people now use an ad blocker when browsing the internet, a 41% increase over the preceding 12 month period. This widespread use of ad blocking technology is expected to result in over \$20 billion in lost advertising revenue this year alone. Despite the magnitude of these numbers, the threat of ad blocking is largely an invisible threat to the average web publisher. Unless steps are taken to assess the impact of ad blocking on an individual website, the only sign that ad blocking is an issue is likely to be a decline in advertising revenue. Ad blocking is certainly far from the only challenge faced by web publishers today. The good news, however, is that ad blocking is one of the few areas where web publishers have some control over how to respond to the issue. We can't cure ad blindness, stop ad budgets migrating to Facebook, and whatever is causing revenues from Google AdSense advertising to decline is far beyond our control. What we do control is our own websites and, by extension, how we react to, communicate with and respond to visitors using ad blocking is entirely up to us. While there is no one size fits all solution, the goal of this book is to outline a range of proven strategies designed to not only detect, quantify and mitigate the threat of ad blocking, but also move beyond advertising as a sole source of revenue. The chapters in this book cover a variety of options, including code examples, ranging from passive measuring of ad blocking behavior to the more aggressive step of denying access to visitors using an ad blocker. Topics covered in this book include: Learn how ad blocking works Detect when visitors are blocking ads Assess ad blocking impact on your site Use ad reinsertion to fill blocked ads Generate revenue beyond advertising Persuade visitors to whitelist your website Learn how to deny site access to ad blockers Track visitor whitelist compliance rates Generate revenue with native advertising Learn about the Acceptable Ads Initiative Explore 3rd party solutions

Will Ad Blocking Break the Internet? Ben Shiller,Joel Waldfogel,Johnny Ryan,2017 Ad blockers allow Internet users to obtain information without generating ad revenue for site owners; and by 2016 they were used by roughly a quarter of site visitors. Given the ad-supported nature of much of the web, ad blocking poses a threat to site revenue and, if revenue losses undermine investment, a possible threat to consumers' access to appealing

content. Using unique, proprietary, and site-specific data on the share of site visitors using ad blockers at a few thousand sites, along with Alexa traffic data, we explore the impact of ad blocker usage on site quality, as inferred from traffic ranks, 2013-2016. We find that each additional percentage point of site visitors using ad blockers raises (worsens) its traffic rank by about 0.6 percent over a 35 month period, with stronger effects at initially worse-ranked sites. We provide additional evidence of causality by showing that the relationship between traffic trends and eventual ad blocking does not predate ad blocking. Plausible instruments for ad blocking also deliver consistent results. Effects of ad blocking on revenue are compounded by the fact that ad blocking reduces visits, while also generating less revenue from remaining visitors employing ad blockers. We conclude that ad blocking poses a substantial threat to the ad-supported web.

Media Management Matters Ulrike Rohn, Tom Evens, 2020-03-13 This edited volume explores media management as engaged scholarship, building a bridge between theory and practice and discussing research collaboration between academia, policymakers and the media industry. In addition to advancing the scholarly discipline, it also questions, investigates and discusses the practical value of the research undertaken, showing how media management research can provide actionable, practice-relevant knowledge to decision makers throughout the media industry. The volume is broken into two parts: a section reflecting on the need for collaboration between research and practice, and a section overviewing specific projects that aim to deliver administrative value to stakeholders. The international research projects presented here span topics such as digital transformation, business models in news and digital journalism, media entrepreneurship and start-ups, ad-blocking, location-based services, audiovisual consumption preferences, the sustainability of small television markets, co-located and clustered industries and digital privacy. Incorporating under-used methodological approaches, such as action research and ethnography, *Media Management Matters* brings suggestions for how scholarship might be promoted outside academia. Simply put, this book aims to demonstrate why media management matters. Featuring an international roster of contributors, this collection is essential reading for scholars and practitioners of media management, business and policy.

**Moving Businesses Online and Embracing E-Commerce: Impact and Opportunities Caused by COVID-19** Semerádová, Tereza, Weinlich, Petr, 2021-12-03 The COVID-19 pandemic caused global shock to the entire economic system. As a result of the government restrictions, both production and distribution channels were interrupted. In this situation, however, it was possible to observe that some companies were able to adapt to these new conditions. The demand for the possibility of translating physical business into virtual increased. The COVID-19 restrictions showed that many entrepreneurs do not have enough knowledge about the available online tools and possibilities. Given that the digital transformation of business today often consists only of incorporating existing tools into existing processes, transition to e-commerce could be made easily and quickly. *Moving Businesses Online and Embracing E-Commerce: Impact and Opportunities Caused by COVID-19* analyzes the impact of COVID-19-related restrictions on business models of enterprises affected most by these restrictions and examines transformational changes induced by the accelerated adoption of internet technologies and transition to e-commerce-based business models. Covering topics such as customer relationship management (CRM), small and medium enterprises (SMEs), and customer loyalty, this book serves as an essential resource for business owners, CEOs, managers, IT consultants, web developers, students, professors, entrepreneurs, researchers, industry professionals, and academicians.

**Spotify Teardown** Maria Eriksson, Rasmus Fleischer, Anna Johansson, Pelle Snickars, Patrick Vonderau, 2019-02-12 An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience. Spotify provides a streaming service that has been welcomed as disrupting the world of music. Yet such disruption always comes at a price. *Spotify Teardown* contests the tired claim that digital culture thrives on disruption. Borrowing the notion of “teardown” from reverse-engineering processes, in this book a team of five researchers have playfully disassembled Spotify's product and the way it is commonly understood. Spotify has been hailed as the solution to illicit downloading, but it began as a partly illicit enterprise that grew out of

the Swedish file-sharing community. Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation, raising questions about the ways in which such cultural content as songs, books, and films are now typically made available online. Spotify Teardown combines interviews, participant observations, and other analyses of Spotify's "front end" with experimental, covert investigations of its "back end." The authors engaged in a series of interventions, which include establishing a record label for research purposes, intercepting network traffic with packet sniffers, and web-scraping corporate materials. The authors' innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use; the company later threatened their research funding. Thus, the book itself became an intervention into the ethics and legal frameworks of corporate behavior.
