Cpa Martketing Jeff Walker,2024-02-06 Tired Of Paying For Clicks That NEVER Seem To Convert? DiscoverThe Six Easy Steps To CPA Marketing That Can Put Thousands Of Dollars Into Your Pocket Each Month! PPC advertising has been around for a while now and has established itself as the primary model for advertising on the web. Of course, PPC advertising is 'Pay Per Click' advertising, which basically means that you only pay as an advertiser when someone actually clicks on your ad. This is different from paying for a fixed spot in a magazine or on a website because you only pay when your ad generates views. For the advertiser, this is a very good deal because it essentially means that you only pay when you are successful. An advert that sits on a website not attracting any clicks will actually cost you nothing and you will thus be able to ensure that you get a very high ROI (return on investment). This is even more true if you use CPA advertising, which is in many ways the natural evolution of PPC. CPA essentially stands for 'Cost Per Action' or 'Cost Per Acquisition' and in this sense, you only pay when your advert is actually successful in doing what it is setting out to do. You only pay for an ad that converts – giving you guaranteed returns on that investment. Well, in reality you will sometimes still pay per click but even then CPA gives you a figure for how much each action is costing you – allowing you to calculate your precise profit margin. This is the metric that every advertiser should be most interested in. Essentially, this is the point in which the ad becomes profitable and if you only pay for that then you have a situation where everyone is guaranteed to win. CPA is a relatively new form of PPC but it is one that is rapidly catching on for obvious reasons. If you want to evolve your current marketing campaign in a way that can only improve your ROI and if you want to get one step ahead of the competition, then this is something you should be learning. And if that's your plan, then you've come to the right place! This book will serve as your master-class in CPA marketing and will show you how to get set up, how to stack the cards in your favor and how to scale up your operation for gigantic profits. So buckle up and let's take a dive into the complex world of CPA marketing... Below are some of the information that you are about to learn: * The Basics of CPA Marketing * CPA Versus Other Forms of Marketing – Who is PPC For? * Choosing the Right CPA Network * Which Platform Should You Use? * Top Tips for Effective CPA Ads * The Importance of Tracking * Creating a Landing Page * How to Make Money With CPA * The CPA Success Formula

Go: Building Web Applications Nathan Kozyra, Mat Ryer, 2016-08-31 Build real-world, production-ready solutions by harnessing the powerful features of Go About This Book An easy-to-follow guide that provides everything a developer needs to know to build end-to-end web applications in Go Write interesting and clever, but simple code, and learn skills and techniques that are directly transferable to your own projects A practical approach to utilize application scaffolding to design highly scalable programs that are deeply rooted in go routines and channels Who This Book Is For This book is intended for developers who are new to Go, but have previous experience of building web applications and APIs. What You Will Learn Build a fully featured REST API to enable client-side single page apps Utilize TLS to build reliable and secure sites Learn to apply the nuances of the Go language to implement a wide range of start-up quality projects Create websites and data services capable of massive scale using Go's net/http package, exploring RESTful patterns as well as low-latency WebSocket APIs Interact with a variety of remote web services to consume capabilities ranging from authentication and authorization to a fully functioning thesaurus Explore the core syntaxes and language features that enable concurrency in Go Understand when and where to use concurrency to keep data consistent and applications non-blocking, responsive, and reliable Utilize advanced concurrency patterns and best practices to stay low-level without compromising the simplicity of Go itself In Detail Go is an open source programming language that makes it easy to build simple, reliable, and efficient software. It is a statically typed language with syntax loosely derived from that of C, adding garbage collection, type safety, some dynamic-typing capabilities, additional built-in types such as variable-length arrays and key-value maps, and a large standard library. This course starts with a walkthrough of the topics most critical to anyone building a new web application. Whether it's keeping your application secure, connecting to your database, enabling token-based authentication, or utilizing logic-less templates, this course has you covered. Scale, performance, and high availability lie at the heart of the projects, and the lessons learned throughout this course will arm you with everything you need to build world-class solutions. It will also take you through the history of concurrency, how Go utilizes it, how Go differs from other languages, and the features and structures of Go's concurrency core. It will make you feel comfortable designing a safe, data-consistent, and high-performance concurrent application in Go. This course is an invaluable resource to help you understand Go's powerful features to build simple, reliable, secure, and efficient web applications. Style and approach This course is a step-by-step guide, which starts off with the basics of go programming to build web applications and will gradually move on to cover intermediate and advanced topics. You will be going through this smooth transition by building interesting projects along with the authors, discussing significant options, and decisions at each stage, while keeping the programs lean, uncluttered, and as simple as possible.
