**Alibaba's World** Porter Erisman, 2015-05-12 A former VP at Alibaba Group, and creator of a documentary about its origins, offers an inside glimpse at the behemoth that's poised to transform the ecommerce world

**Winning With Alibaba: Tips on Starting a Business with Alibaba (Success Through Ecommerce)** Marc Hayes, 2021-03-20 Alibaba is one of the largest online stores in the world and in this ebook, you'll learn how to use Alibaba, how to find suppliers (and how to separate the good ones from the bad), and once you're all up to speed, then you'll see a wide variety of websites that you can sell your products on using this ebook.

**Alibaba.com Story** Porter Erisman, 2016-02-17T00:00:00+01:00 Alibaba, una società cinese poco conosciuta in Occidente, è stata protagonista della più grande IPO della storia della borsa, più grande di quelle di Google, Facebook e Twitter messe insieme. Oggi è l'azienda numero uno al mondo nel settore dell'e-commerce: i suoi clienti sono il doppio di quelli di Amazon e dalle sue piattaforme passano quasi tutte le transazioni commerciali online effettuate in Cina. Come è stato possibile un simile miracolo imprenditoriale? E chi ne sono stati i protagonisti? In Alibaba.com Story Porter Erisman, uno dei primi dipendenti occidentali di Alibaba e capo del marketing internazionale della società dal 2000 al 2008, racconta di come Jack Ma, il fondatore di Alibaba, sia partito da un piccolo appartamento nella città di Hangzhou alla conquista dell'Olimpo dell'e-commerce mondiale. Sopravvissuto allo scoppio della bolla delle dot.com, all'epidemia di SARS, alla guerra contro eBay per il controllo del mercato dell'e-commerce cinese, Alibaba è l'emblema del nuovo business globale. Alibaba.com Story è una lettura istruttiva, anche per la presenza di contributi filmati, ricca di colpi di scena e di utili insegnamenti su come la conoscenza dei mercati locali e la prontezza nel rispondere alle esigenze di imprese e consumatori possano trasformarsi nelle armi micidiali con cui Davide ha sconfitto Golia.

**Smart Business** Ming Zeng, 2018-08-14 How Strategy Works in an Interconnected, Automated World Leaders already know that the classic approach to strategy--analyze, plan, execute--is losing relevance. But they don't yet know what replaces it. As everyone and everything becomes more interconnected and digitized, how do you operate, compete, and win? Ming Zeng, the former Chief of Staff and strategy adviser to Alibaba Group's founder Jack Ma, explains how the latest technological developments, such as artificial intelligence, machine learning, the mobile internet, and cloud computing are redefining how value is created. Written especially for those outside the technology industry or the startup arena, this book introduces a simple, overarching framework to guide strategy formulation and execution in this data-rich and highly interactive environment. Revealing the revolutionary practices that he and his team have developed at Alibaba, Zeng shows how to: Automate decisions through machine learning Create products informed by real-time data from customers Determine the right strategic positioning to maximize value from platforms and suppliers Repurpose your organization to further human insight and enable creativity Lead your company's transformation into a smart business With insights into the strategies and tools used by leaders at Alibaba and other companies such as Ruhan and Red Collar, in a variety of industries from furniture making to banking to custom tailoring, Smart Business outlines a radically new approach to strategy that can be applied everywhere.

**The Alibaba Group** Yi Guo, 2016 By July of 2011, Yun 'Jack' Ma had achieved his goal of creating one of the world's leading e-commerce companies. Ma founded the Alibaba Group and took advantage of growing internet usage in China to launch the leading B2B, C2C and B2C sites in the country and capture a huge market. Despite his success, Ma had a troubled relationship with Yahoo!, the largest investor in the Alibaba Group. Ma's decision in January of 2011 to transfer Alipay (the Alibaba Group's online payment unit) from the Alibaba Group to a company under his personal control was just making matters worse. When Ma founded Alibaba.com in 1999, he faced competition from a number of other Chinese B2B web portals.

This case study discusses this topic.

**Summary of Duncan Clark's Alibaba** Everest Media,2022-03-27T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 On November 11, 2015, in Beijing, the venue for the aquatics events in the Beijing Olympics, a huge digital screen displayed maps, charts, and news crawls reporting in real time the purchases of millions of consumers across China on Alibaba's websites. #2 In China, November 11 is Singles' Day, a special annual promotion. From just twenty-seven merchants in 2009, over forty thousand merchants and thirty thousand brands now participate in Singles' Day. Total sales in 2015 were up 60 percent from the \$9 billion of the previous year. #3 Alibaba was successful because it offered consumers in China an unparalleled variety of goods, delivered quickly and reliably. Its finance subsidiary ensured that buying on Alibaba was easy and worry free. #4 Alibaba's consumer websites, Taobao and Tmall, serve as platforms for other merchants to sell their wares. They charge no fees, but make money from advertising space and promoting those merchants who want to stand out from the crowd.

**Being Online** Jian Wang,2021-10-05 A pioneer of cloud computing and big data offers his vision of the future world taking shape around us. Jian Wang was the founder and architect of Alibaba's cloud and has been the driving force behind its technology innovations. He was also the founder of the City Brain initiative to develop a new digital infrastructure for sustainable cities. Being Online is his meditation on the moment we are in, as the digital era shifts to the internet era, spawning new innovations at a seemingly dizzying pace: cloud computing, 5G, artificial intelligence, big data, wearables, robots, virtual reality, the internet of things, blockchain, and more. For Wang, the invisible hand that connects them is being online. The conjunction of computing, data, and the internet has erased the difference between being online and off. When computing can be done in the cloud, it is on the road to becoming a utility. When data is connected, making it big, its usefulness multiplies exponentially in unforeseeable ways, as does its value. This moment will be as transformative for humanity as Henry Ford's production line. Data is changing the nature of business. Computing is reshaping the economy. The cloud will help us do things we could never do before, at scales that were previously impossible. It will reshape our vision of the world, as electrification once did and, more recently, the transition from analog to digital. While telling the story of Alibaba's breakthroughs and the development of his own understanding of the internet, Jian Wang's visionary book lays out the implications of this shift and how to think about being online.

Business Ecosystems in China Mark J. Greeven, Wei Wei, 2018 We cannot afford to miss the remarkable rise of Chinese business ecosystems. Alibaba and their peers Baidu, Tencent, Xiaomi, and LeEco showcase unprecedented growth and success in China and are expanding their impact globally. With a combined market capitalization of close to 600 billion USD, incubating over 1,000 new ventures and an average annual growth of over 50%, they have become a force to reckon with for the likes of Google, Microsoft, Apple, Amazon, and IBM. 'Business ecosystem' is a frequently used concept to describe the unique competitive advantages of the American technology giants. This book explores not only the application of a business ecosystem approach in the Chinese context but also deals with the key strategic question: How did these five Chinese business ecosystems grow so rapidly and successfully? The book takes the growth and transformation of Alibaba's business ecosystem as a focus case in comparison with Baidu, Tencent, Xiaomi, and LeEco. These business ecosystems developed in less than 20 years and transformed from organic growth to rapid expansion by investment and acquisition, entrepreneurship and incubation of new ventures, continuous innovation, and internationalization. This book brings insights and practical lessons on leading, creating, and disrupting markets for corporate executives and professionals in global business, a comparative case study for researchers and students of management, and food for thought on Chinese ways of doing business.

*Tmall, The Sky Cat* Chuck Munson, 2013-09-11 800x600 This case study illuminates the rapidly evolving e-commerce market in China. It shows how Alibaba Group launched its new Taobao Mall B2C platform to raise standards for product quality and online customer shopping experience; how TMall

launched as a virtual shopping mall offering internationally known brands and major retailers; how it responded to the widespread sale of counterfeit and substandard products; how its fee increases ignited massive online vendor protests; and how it has since rebranded the site to move beyond these events. Focusing on realistic e-commerce supply chain issues and challenges, this case study offers exceptional value to both students and practitioners.
