Equal Opportunity in Presidential Appointments United States Commission on Civil Rights,1983

The Politics of Presidential Appointments David E. Lewis,2010-12-16 In the wake of Hurricane Katrina, many questioned whether the large number of political appointees in the Federal Emergency Management Agency contributed to the agency's poor handling of the catastrophe, ultimately costing hundreds of lives and causing immeasurable pain and suffering. *The Politics of Presidential Appointments* examines in depth how and why presidents use political appointees and how their choices impact government performance--for better or worse. One way presidents can influence the permanent bureaucracy is by filling key posts with people who are sympathetic to their policy goals. But if the president's appointees lack competence and an agency fails in its mission--as with Katrina--the president is accused of employing his friends and allies to the detriment of the public. Through case studies and cutting-edge analysis, David Lewis takes a fascinating look at presidential appointments dating back to the 1960s to learn which jobs went to appointees, which agencies were more likely to have appointees, how the use of appointees varied by administration, and how it affected agency performance. He argues that presidents politicize even when it hurts performance--and often with support from Congress--because they need agencies to be responsive to presidential direction. He shows how agency missions and personnel--and whether they line up with the president's vision--determine which agencies presidents target with appointees, and he sheds new light on the important role patronage plays in appointment decisions.

Judicial Dis-Appointments Mitchel de S. -O. -l'E. Lasser, 2020-10-11 In 2009 and 2010, the European Court of Justice and the European Court of Human Rights underwent significant reforms to their respective judicial appointments processes. Though very different judicial institutions, they adopted very similar - and rather remarkable - reforms: each would now make use of an expert panel of judicial notables to vet the candidates proposed to sit in Luxembourg or Strasbourg. Once established, these two vetting panels then followed with actions no less extraordinary: they each immediately took to rejecting a sizable percentage of the judicial candidates proposed by the Member State governments. What had happened? Why would the Member States of the European Union and of the Council of Europe, which had established judicial appointments processes that all but ensured themselves the unfettered power to designate their preferred judges to the European courts, and who had zealously maintained and exercised that power over the course of some fifty years, suddenly decide to undermine their own capacity to continue to do so? This book sets out to solve this mystery. Its point of departure is that it would be a mistake to view the 2009-2010 establishment of the two vetting panels in isolation from other European judicial developments. Though these acts of institutional creation are certainly the most notable recent developments, they actually represent but the crowning achievement of a process of European judicial appointments reform that has been running unremittingly since the 1990's. This longstanding and tenacious movement has actually triggered a broad set of interrelated debates and reforms, encompassing not only judicial appointments per se, but also a much wider set of issues, including judicial independence, judicial quality, judicial councils, the separation of powers, judicial gender equity, and more.
