Discovering the World of Audio Chat Rooms and Video Livestreaming Aqib Muhammed, There was a time when there was no social media or even mobile phones. A landline phone was the only thing that our ancestors could use to communicate, and discuss a matter with people staying far away from them. At times, the people living in those times also used to write long letters even if they wanted to convey a small message. These letters took several days to reach the person to whom the message was to be conveyed. But, the rapid technological development in the last few decades has transformed the way we communicate, and socialize. In today's world, we use apps for many of the things we do every day, which includes communicating and keeping in touch with our family, and friends. The apps that we use for this purpose are called social apps, or social networking apps. These apps have become an essential part of our day-to-day communication and socialization. People use social apps to communicate with friends and family, meet new people, express their views and opinions, and keep up with current events. On the whole, social apps allow users to interact and engage with others via technology. And as they have become an integral part of our lives, we must have some knowledge about such apps. For that purpose, this book has been designed as a beginner's guide that will take you through the world of social apps. It aims to explain to you everything about such apps, which are primarily of two types: Audio Chat Rooms and Video Livestreaming. In this book, you will find all that you need to learn about Audio Chatrooms and Video Livestreaming apps, including their pros and cons. It also talks about the impact of social apps on Society and Culture and how these apps are changing communication and interaction. But, the book just does not stop at that, as it also explores the future of social apps. These are just some of the interesting topics covered in this book. This book is meant for everyone who wants to learn about social apps including those who are always on the hunt for the latest social apps. One such app is Wafa, which is one of India's first voice-centric apps. This book has been authored by none other than Muhammed Aqib T.P., the CEO of LVE Innovations, the Bengaluru, Karnataka-based company behind the Wafa app. Aqib is a proud MSRIT alumnus who did his B-Tech in Electronic & Instrumentation Engineering, with an undying heart for marketing. Aqib has always been a go-getter, starting his career with Facebook pages during his school days and having an umpteen business turnover by his final year in college. He has also had access to 100+ Facebook pages with over 150+ followers. At LVE Innovations, Aqib is responsible for formulating and implementing the strategic plan, driving growth and innovation, and ensuring the company's smooth operations. His focus includes developing key marketing and communication initiatives, identifying new revenue streams, assessing market potential across the country, building analytical models, and performing regular market analysis for the company. Aqib is also the Founder of Beeyams Media, one of the earliest digital marketing companies catering to Facebook and Instagram. Beeyams Media was founded in 2014 and in 2021 it was shifted under Swoovi Innovations under the category of Digital Marketing Solutions. The company simplifies clients' digital transactions by providing innovative technical solutions, allowing them to focus on their core business. The company also primarily focuses on SMEs. Aqib also serves as COO of Swoovi Innovations, based in Surat, Gujarat. The company provides you with essential digital solutions like Performance Marketing, E-Commerce Sales, Software Development, Cloud and Database Setup, and Support & Cyber security consulting. Aqib's primary goal behind writing this book was to get its readers acquainted with all that they should know about social apps, including his Wafa app. It's high time for you to explore this book, as you must have got a picture of what it contains by now. So just get going and discover the world of Audio Chat Rooms and Video Livestreaming.

Learner-Centered Theory and Practice in Distance Education Thomas M. Duffy,Jamie R. Kirkley,2003-12-08 Learner-Centered Theory and Practice in Distance Education: Cases From Higher Education brings the voice of the learning sciences to the study and design of distance learning. The contributors examine critical issues in the design of theoretically and pedagogically based distance education programs. Eight distance education programs are described in enough detail to allow readers with different interests to understand the pedagogical approaches and the implications of implementing those approaches. Issues of theory, pedagogy, design, assessment, communities of practice, collaboration, and faculty development are discussed. Each section of the book includes: *a primary chapter written by an author or authors involved with a distance education program that reflects learner-centered principles; *a formal reaction to the chapter by a specialist from the learning sciences, educational evaluation and policy, administration, or the corporate sector with expertise in issues of distance learning; and *an edited transcript

of the authors' discussion of the primary chapter held at a symposium at the Asilomar Conference Center. A final summing up section offers two perspectives--from leading scholars outside the fields of instructional design, evaluation, and the learning sciences--on the approaches and thinking reflected in the rest of the book. This book is essential for researchers, as well as all those engaged in delivering, supporting, or administrating distance education programs at the post-secondary level. The descriptions, strategies, and principles will inform the design of continuing education, as well as degree-based education and corporate education and training, and distance education programs for adults.
