Geographies of Urban Sound Dr Torsten Wissmann, 2014-05-28 Taking into account both the urban soundscape and the impacts of sound on the urban dweller, this book examines sound not as a by-product of urban life, but as a fundamental part of the urban experience that is crucial to understanding the city's sense of place. Illustrated by case studies from Europe and North America, these range from on-site measurements to the construction of audio tours for local tourism, from media analysis of popular culture audio drama to sound-identity and city branding, and from the classification of noise in city planning to a consideration of the complex relationship between sacred sound and the creation of a sense of place.

Playing with Sound Karen Collins, 2013-01-11 An examination of the player's experience of sound in video games and the many ways that players interact with the sonic elements in games. In *Playing with Sound*, Karen Collins examines video game sound from the player's perspective. She explores the many ways that players interact with a game's sonic aspects—which include not only music but also sound effects, ambient sound, dialogue, and interface sounds—both within and outside of the game. She investigates the ways that meaning is found, embodied, created, evoked, hacked, remixed, negotiated, and renegotiated by players in the space of interactive sound in games. Drawing on disciplines that range from film studies and philosophy to psychology and computer science, Collins develops a theory of interactive sound experience that distinguishes between interacting with sound and simply listening without interacting. Her conceptual approach combines practice theory (which focuses on productive and consumptive practices around media) and embodied cognition (which holds that our understanding of the world is shaped by our physical interaction with it). Collins investigates the multimodal experience of sound, image, and touch in games; the role of interactive sound in creating an emotional experience through immersion and identification with the game character; the ways in which sound acts as a mediator for a variety of performative activities; and embodied interactions with sound beyond the game, including machinima, chip-tunes, circuit bending, and other practices that use elements from games in sonic performances.

Earth Force Shemer Kuznits,2019-04-30 On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began...There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

Shipwreck (Dual Audio/Stage Edition) Anne Washburn,2020-10-12 From across the room I saw the President, torchlight playing across his visage. And the violins began, and the low rumble of the timpani. Anne Washburn (The Twilight Zone, Mr Burns) returns with her sinister and sensational play, now updated in a special dual edition to coincide with its audio premiere on WNYC Public Radio, to be aired in October 2020 in partnership with New York Public Theater. As part of a bold experiment to write a history play about the present, this edition includes both the stage and audio versions of the play, as well as extensive commentary from the writer herself about the significant changes made to it in reaction to the unprecedented crises and protest movements of 2020.

DIY Media Michele Knobel,Colin Lankshear,2010 Schools remain notorious for co-opting digital technologies to «business as usual» approaches to teaching new literacies. DIY Media addresses this issue head-on, and describes expansive and creative practices of digital literacy that are increasingly influential and popular in contexts beyond the school, and whose educational potential is not yet being tapped to any significant degree in classrooms. This book is very much concerned with engaging students in do-it-yourself digitally mediated meaning-making practices. As such, it is organized around three broad areas of digital media: moving media, still media, and audio media. Specific DIY media practices addressed in the chapters include machinima, anime music videos, digital photography, podcasting, and music remixing. Each chapter opens with an overview of a

specific DIY media practice, includes a practical how-to tutorial section, and closes with suggested applications for classroom settings. This collection will appeal not only to educators, but to anyone invested in better understanding - and perhaps participating in - the significant shift towards everyday people producing their own digital media.

A Sound Word Almanac Bernd Herzogenrath,2023-12-14 This almanac of sound words important to artists and scholars highlights words that expand the way we speak (and write) about sonic experiences. Why write about sound, and how? If sonic philosophy is the attempt to think about sound by philosophical means, then a metaphilosophical debate appears almost immediately on the horizon: What is called for is an understanding about sound and language, but also about the preconditions of musical understanding. What is at stake is the question of language and sound, as well as expanding how we speak about sonic experience. This almanac tackles these questions from artistic, experimental and personal perspectives. An assemblage of nearly 70 practitioners and theoreticians, artists and scholars offer their favorite 'sound word.' These sound words are onomatopoeical, mythological, practical; words of personal importance to the artists and their craft; words from their memory, related to sound. Many entries are not in English - some are untranslatable - and all are accompanied by a personal, explanatory, poetic entry. These are words that have the potential to change our perspective on listening-musicking-thinking.
