Automated Music Composition Phil Winsor, 1992 Whether you're a musician with no previous experience in computer programming, or a computer hobbyist interested in learning about music, Automated Music Composition has something to offer. The book contains BASIC language tutorials for beginning programmers; an overview of computer music applications; a systematic exposition of the principles and techniques of automated music composition; insights into contemporary trends in music and computerized sound; principles of MIDI-interfaced computer/synthesizers; a beginning course in music composition, showing in detail how to create a variety of sounds with the computer; step-by-step instructions for using plug-in-and-play programs; interactive MIDI programs listings ready for immediate use; over 50 BASIC routines for automated composition adapted for MIDI sequencers and synthesizers; numerous examples and programming ideas.

KI 2010: Advances in Artificial Intelligence Rüdiger Dillmann, Jürgen Beyerer, Uwe D.

Hanebeck, Tanja Schultz, 2010-09-08 The 33rd Annual German Conference on Artificial Intelligence (KI 2010) took place at the Karlsruhe Institute of Technology KIT, September 21-24, 2010, under the motto "Anthropomatic Systems." In this volume you will find the keynote paper and 49 papers of oral and poster presentations. The papers were selected from 73 submissions, resulting in an acceptance rate of 67%. As usual at the KI conferences, two entire days were allocated for targeted workshops—seven this year—and one tutorial. The workshop and tutorial materials are not contained in this volume, but the conference website, [www.ki2010.kit.edu](http://www.ki2010.kit.edu), will provide information and references to their contents. Recent trends in AI research have been focusing on anthropomatic systems, which address synergies between humans and intelligent machines. This trend is emphasized through the topics of the overall conference program. They include learning systems, cognition, robotics, perception and action, knowledge representation and reasoning, and planning and decision making. Many topics deal with uncertainty in various scenarios and incompleteness of knowledge. Summarizing, KI 2010 provides a cross section of recent research in modern AI methods and anthropomatic system applications. We are very grateful that José del Millán, Hans-Hellmut Nagel, Carl Edward Rasmussen, and David Vernon accepted our invitation to give a talk.

*Creativity Across Domains* James C. Kaufman, John Baer, 2005-01-15 Creativity Across Domains: Faces of the Muse sorts through the sometimes-confusing theoretical diversity that domain specificity has spawned. It also brings together writers who have studied creative thinkers in different areas, such as the various arts, sciences, and communication/leadership. Each contributor explains what is known about the cognitive processes, ways of conceptualizing and solving problems, personality and motivational attributes, guiding metaphors, and work habits or styles that best characterize creative people within the domain he or she has investigated. In addition, this book features: \*an examination of how creativity is similar and different in diverse domains; \*chapters written by an expert on creativity in the domain about which he or she is writing; \*a chapter on creativity in psychology which examines patterns of performance leading to creative eminence in different areas of psychology; and \*a final chapter proposing a new theory of creativity--the Amusement Park Theoretical Model. This book appeals to creativity researchers and students of creativity; cognitive, education, social, and developmental psychologists; and educated laypeople interested in exploring their own creativity.

**Authority Control in Organizing and Accessing Information** Barbara Tillett, Arlene G.

Taylor, 2012-12-06 International authority control will soon be a reality. Examine the projects that are moving the information science professions in that direction today! In Authority Control in Organizing and Accessing Information: Definition and International Experience, international experts examine the state of the art and explore new theoretical perspectives. This essential resource, which has its origins in the International Conference on Authority Control (Italy, 2003), addresses standards, exchange formats, and metadata—with sections on authority control for names, works, and subjects. Twenty fascinating case examples show how authority control is practiced at institutions in various nations around the world. Authority Control in Organizing and Accessing Information provides an

essential definition of authority control and then begins its sharply focused examinations of essential aspects of authority control with a section entitled “State of the Art and New Theoretical Perspectives.” Here you’ll find chapters focusing on: the current state of the art—with suggestions for future developments the importance (and current lack) of teaching authority control as part of a library/information science curriculum the guidelines and methodology used in the creation of Italy’s SBN Authority File Next, “Standards, Exchange Formats, and Metadata” covers: Italy’s Bibliografia Nazionale Italiana UNIMARC database, which was created using authority control principles the past and present activities of the International Federation of Library Associations and Institutions (IFLA), and an examination of IFLA’s Working Group on Functional Requirements and Numbering of Authority Records (FRANAR) metadata standards as a means for accomplishing authority control in digital libraries traditional international library standards for bibliographic and authority control the evolution and current status of authority control tools for art and material culture information the UNIMARC authorities format—what it is and how to work with it “Authority Control for Names and Works” brings you useful, current information on: changes and new features in the new edition of the International Standard Archival Authority Record (Corporate Bodies, Persons, Families) Encoded Archival Context (EAC)—and its role in enhancing access to and understanding of records, and how it enables repositories to share creator description the LEAF model for collection, harvesting, linking, and providing access to existing local/national name authority data national bibliographic control in China, Japan, and Korea, plus suggestions for future cooperation between bibliographic agencies in East Asia authority control of printers, publishers, and booksellers how to create up-to-date corporate name authority records authority control (and the lack of it) for works “Authority Control for Subjects” updates you on: subject gateways—with a look at the differences between the Program for Cooperative Cataloging’s SACO program and browsable online subject gateways MACS—a virtual authority file that crosses language barriers to provide multilingual access OCLC’s FAST project, which strives to retain the rich vocabulary of LCSH while making the schema easier to understand, control, apply, and use the efforts of Italy’s National Central Library toward semantic authority control the interrelationship of subject indexing languages and authority control—with a look at the “semantics vs. syntax” issue how subject indexing is done in Italy’s Servizio Bibliotecario Nazionale “Authority Control Experiences and Proje

*Evolutionary and Biologically Inspired Music, Sound, Art and Design* Penousal Machado, Juan J. Romero, Adrian Carballal, 2012-03-23 This book constitutes the refereed proceedings of the First International Conference on Biologically Inspired Music, Sound, Art and Design, EvoMUSART 2012, held in Málaga, Spain, in April 2012, colocated with the Evo\* 2012 events EuroGP, EvoCOP, EvoBIO, and EvoApplications. Due to its significant growth in the last 10 years, this 10th EvoMUSART event has become an Evo\* conference in 2012. The 15 revised full papers and 5 poster papers presented were carefully reviewed and selected from 43 submissions. They cover a wide range of topics reflecting the current state of research in the field, including theory, generation, computer aided creativity, computational creativity, and automation.

**Algorithmic Composition** Gerhard Nierhaus, 2009-08-28 Algorithmic composition – composing by means of formalizable methods – has a century old tradition not only in occidental music history. This is the first book to provide a detailed overview of prominent procedures of algorithmic composition in a pragmatic way rather than by treating formalizable aspects in single works. In addition to an historic overview, each chapter presents a specific class of algorithm in a compositional context by providing a general introduction to its development and theoretical basis and describes different musical applications. Each chapter outlines the strengths, weaknesses and possible aesthetical implications resulting from the application of the treated approaches. Topics covered are: markov models, generative grammars, transition networks, chaos and self-similarity, genetic algorithms, cellular automata, neural networks and artificial intelligence are covered. The comprehensive bibliography makes this work ideal for the musician and the researcher alike.

*Motor City Music* Mark Slobin, 2018-10-15 This is the first-ever historical study across all musical genres in any American metropolis. Detroit in the 1940s-60s was not just the capital of the twentieth

century for industry and the war effort, but also for the quantity and extremely high quality of its musicians, from jazz to classical to ethnic. The author, a Detroit native from 1943, begins with a reflection of his early life with his family and others, then weaves through the music traffic of all the sectors of a dynamic and volatile city. Looking first at the crucial role of the public schools in fostering talent, *Motor City Music* surveys the neighborhoods of older European immigrants and of the later huge waves of black and white southerners who migrated to Detroit to serve the auto and defense industries. Jazz stars, polka band leaders, Jewish violinists, and figures like Lily Tomlin emerge in the spotlight. Shaping institutions, from the Ford Motor Company and the United Auto Workers through radio stations and Motown, all deployed music to bring together a city rent by relentless segregation, policing, and spasms of violence. The voices of Detroit's poets, writers, and artists round out the chorus.

**Intelligent Communication Technologies and Virtual Mobile Networks** G. Rajakumar, Ke-Lin Du, Chandrasekar Vuppalapati, Grigorios N. Beligiannis, 2022-07-19 The book is a collection of high-quality research papers presented at Intelligent Communication Technologies and Virtual Mobile Networks (ICICV), held at Francis Xavier Engineering College, Tirunelveli, Tamil Nadu, India, during February 10–11, 2022. The book shares knowledge and results in theory, methodology and applications of communication technology and mobile networks. The book covers innovative and cutting-edge work of researchers, developers and practitioners from academia and industry working in the area of computer networks, network protocols and wireless networks, data communication technologies and network security.

**Intelligent Decision Technologies 2016** Ireneusz Czarnowski, Alfonso Mateos Caballero, Robert J. Howlett, Lakhmi C. Jain, 2016-06-13 The KES-IDT-2016 proceedings give an excellent insight into recent research, both theoretical and applied, in the field of intelligent decision making. The range of topics explored is wide, and covers methods of grouping, classification, prediction, decision support, modelling and many more in such areas as finance, linguistics, medicine, management and transportation. This proceedings contain several sections devoted to specific topics, such as: · Specialized Decision Techniques for Data Mining, Transportation and Project Management · Pattern Recognition for Decision Making Systems · New Advances of Soft Computing in Industrial and Management Engineering · Recent Advances in Fuzzy Systems · Intelligent Data Analysis and Applications · Reasoning-based Intelligent Systems · Intelligent Methods for Eye Movement Data Processing and Analysis · Intelligent Decision Technologies for Water Resources Management · Intelligent Decision Making for Uncertain Unstructured Big Data · Decision Making Theory for Economics · Interdisciplinary Approaches in Business Intelligence Research and Practice · Pattern Recognition in Audio and Speech Processing The KES-IDT conference is a well-established international annual conference, interdisciplinary in nature. These two volumes of proceedings form an excellent account of the latest results and outcomes of recent research in this leading-edge area.

**Strategic Pervasive Computing Applications: Emerging Trends** Godara, Varuna, 2010-02-28 The focus of this book is on the ever increasing capacity of Pervasive context-aware applications that are aiming to develop into context-responsive applications in different application areas--Provided by publisher.

Organizing Creativity in the Innovation Journey Elke Schuessler, Patrick Cohendet, Silviya Svejenova, 2021-09-17 This volume brings together empirical and conceptual papers that go beyond questions of idea generation to account for the dynamics of idea development, judgement, and dissemination – processes which are at the heart of organizing for innovation.

Sequential Decision-Making in Musical Intelligence Elad Liebman, 2019-10-01 Over the past 60 years, artificial intelligence has grown from an academic field of research to a ubiquitous array of tools used in everyday technology. Despite its many recent successes, certain meaningful facets of computational intelligence have yet to be thoroughly explored, such as a wide array of complex mental tasks that humans carry out easily, yet are difficult for computers to mimic. A prime example of a domain in which human intelligence thrives, but machine understanding is still fairly limited, is music. Over recent decades, many researchers have used computational tools to perform tasks like

genre identification, music summarization, music database querying, and melodic segmentation. While these are all useful algorithmic solutions, we are still a long way from constructing complete music agents able to mimic (at least partially) the complexity with which humans approach music. One key aspect that hasn't been sufficiently studied is that of sequential decision-making in musical intelligence. Addressing this gap, the book focuses on two aspects of musical intelligence: music recommendation and multi-agent interaction in the context of music. Though motivated primarily by music-related tasks, and focusing largely on people's musical preferences, the work presented in this book also establishes that insights from music-specific case studies can also be applicable in other concrete social domains, such as content recommendation. Showing the generality of insights from musical data in other contexts provides evidence for the utility of music domains as testbeds for the development of general artificial intelligence techniques. Ultimately, this thesis demonstrates the overall value of taking a sequential decision-making approach in settings previously unexplored from this perspective.
