Automated Music Composition Phil Winsor,1992 Whether you're a musician with no previous experience in computer programming, or a computer hobbyist interested in learning about music, Automated Music Composition has something to offer. The book contains BASIC language tutorials for beginning programmers; an overview of computer music applications; a systematic exposition of the principles and techniques of automated music composition; insights into contemporary trends in music and computerized sound; principles of MIDI-interfaced computer/synthesizers; a beginning course in music composition, showing in detail how to create a variety of sounds with the computer; step-by-step instructions for using plug-in-and-play programs; interactive MIDI programs listings ready for immediate use; over 50 BASIC routines for automated composition adapted for MIDI sequencers and synthesizers; numerous examples and programming ideas.

Algorithmic Composition Gerhard Nierhaus,2009-08-28 Algorithmic composition – composing by means of formalizable methods – has a century old tradition not only in occidental music history. This is the first book to provide a detailed overview of prominent procedures of algorithmic composition in a pragmatic way rather than by treating formalizable aspects in single works. In addition to an historic overview, each chapter presents a specific class of algorithm in a compositional context by providing a general introduction to its development and theoretical basis and describes different musical applications. Each chapter outlines the strengths, weaknesses and possible aesthetical implications resulting from the application of the treated approaches. Topics covered are: markov models, generative grammars, transition networks, chaos and self-similarity, genetic algorithms, cellular automata, neural networks and artificial intelligence are covered. The comprehensive bibliography makes this work ideal for the musician and the researcher alike.

Creativity Across Domains James C. Kaufman,John Baer,2005-01-15 Creativity Across Domains: Faces of the Muse sorts through the sometimes-confusing theoretical diversity that domain specificity has spawned. It also brings together writers who have studied creative thinkers in different areas, such as the various arts, sciences, and communication/leadership. Each contributor explains what is known about the cognitive processes, ways of conceptualizing and solving problems, personality and motivational attributes, guiding metaphors, and work habits or styles that best characterize creative people within the domain he or she has investigated. In addition, this book features: *an examination of how creativity is similar and different in diverse domains; *chapters written by an expert on creativity in the domain about which he or she is writing; *a chapter on creativity in psychology which examines

patterns of performance leading to creative eminence in different areas of psychology; and *a final chapter proposing a new theory of creativity--the Amusement Park Theoretical Model. This book appeals to creativity researchers and students of creativity; cognitive, education, social, and developmental psychologists; and educated laypeople interested in exploring their own creativity.

KI 2010: Advances in Artificial Intelligence Rüdiger Dillmann,Jürgen Beyerer,Uwe D. Hanebeck,Tanja Schultz,2010-09-08 The 33rd Annual German Conference on Arti?cial Intelligence (KI 2010) took place at the Karlsruhe Institute of Technology KIT, September 21–24, 2010, under the motto "Anthropomatic Systems." In this volume you will ?nd the keynote paper and 49 papers of oral and poster presentations. The papers were selected from 73 submissions, resulting in an acceptance rate of 67%. As usual at the KI conferences, two entire days were allocated for targeted workshops—seventhis year—andone tutorial. The workshopand tutorialma- rials are not contained in this volume, but the conference website, www.ki2010.kit.edu,will provide information and references to their contents. Recent trends in AI research have been focusing on anthropomatic systems, which address synergies between humans and intelligent machines. This trend is emphasized through the topics of the overall conference program. They include learning systems, cognition, robotics, perception and action, knowledge rep- sentation and reasoning, and planning and decision making. Many topics deal with uncertainty in various scenarios and incompleteness of knowledge. Summarizing, KI 2010 provides a cross section of recent research in modern AI methods and anthropomatic system applications. We are very grateful that Jos ⬚ edel Mill ⬚ an, Hans-Hellmut Nagel, Carl Edward Rasmussen, and David Vernon accepted our invitation to give a talk.

Authority Control in Organizing and Accessing Information Barbara Tillett,Arlene G. Taylor,2012-12-06 International authority control will soon be a reality. Examine the projects that are moving the information science professions in that direction today! In Authority Control in Organizing and Accessing Information: Definition and International Experience, international experts examine the state of the art and explore new theoretical perspectives. This essential resource, which has its origins in the International Conference on Authority Control (Italy, 2003), addresses standards, exchange formats, and metadata—with sections on authority control for names, works, and subjects. Twenty fascinating case examples show how authority control is practiced at institutions in various nations around the world. Authority Control in Organizing and Accessing Information provides an essential definition of authority control and then begins its sharply focused examinations of essential aspects of

authority control with a section entitled "State of the Art and New Theoretical Perspectives." Here you'll find chapters focusing on: the current state of the art—with suggestions for future developments the importance (and current lack) of teaching authority control as part of a library/information science curriculum the guidelines and methodology used in the creation of Italy's SBN Authority File Next, "Standards, Exchange Formats, and Metadata" covers: Italy's Bibliografia Nazionale Italiana UNIMARC database, which was created using authority control principles the past and present activities of the International Federation of Library Associations and Institutions (IFLA), and an examination of IFLA's Working Group on Functional Requirements and Numbering of Authority Records (FRANAR) metadata standards as a means for accomplishing authority control in digital libraries traditional international library standards for bibliographic and authority control the evolution and current status of authority control tools for art and material culture information the UNIMARC authorities format—what it is and how to work with it "Authority Control for Names and Works" brings you useful, current information on: changes and new features in the new edition of the International Standard Archival Authority Record (Corporate Bodies, Persons, Families) Encoded Archival Context (EAC)—and its role in enhancing access to and understanding of records, and how it enables repositories to share creator description the LEAF model for collection, harvesting, linking, and providing access to existing local/national name authority data national bibliographic control in China, Japan, and Korea, plus suggestions for future cooperation between bibliographic agencies in East Asia authority control of printers, publishers, and booksellers how to create up-to-date corporate name authority records authority control (and the lack of it) for works "Authority Control for Subjects" updates you on: subject gateways—with a look at the differences between the Program for Cooperative Cataloging's SACO program and browsable online subject gateways MACS—a virtual authority file that crosses language barriers to provide multilingual access OCLC's FAST project, which strives to retain the rich vocabulary of LCSH while making the schema easier to understand, control, apply, and use the efforts of Italy's National Central Library toward semantic authority control the interrelationship of subject indexing languages and authority control—with a look at the "semantics vs. syntax" issue how subject indexing is done in Italy's Servizio Bibliotecario Nazionale "Authority Control Experiences and Proje

Evolutionary and Biologically Inspired Music, Sound, Art and Design Penousal Machado,Juan J. Romero,Adrian Carballal,2012-03-23 This book constitutes the refereed proceedings of the First International Conference on Biologically Inspired Music, Sound, Art and Design, EvoMUSART 2012,

held in Málaga, Spain, in April 2012, colocated with the Evo* 2012 events EuroGP, EvoCOP, EvoBIO, and EvoApplications. Due to its significant growth in the last 10 years, this 10th EvoMUSART event has become an Evo* conference in 2012. The 15 revised full papers and 5 poster papers presented were carefully reviewed and selected from 43 submissions. They cover a wide range of topics reflecting the current state of research in the field, including theory, generation, computer aided creativity, computational creativity, and automation.

Intelligent Data Engineering and Automated Learning -- IDEAL 2011 Hujun Yin,Wenjia Wang,Victor J. Rayward-Smith,2011-08-30 This book constitutes the refereed proceedings of the 12th International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2011, held in Norwich, UK, in September 2011. The 59 revised full papers presented were carefully reviewed and selected from numerous submissions for inclusion in the book and present the latest theoretical advances and real-world applications in computational intelligence.

Automatic Organization of Digital Music Documents Christian Fremerey,2010

Music Recommendation and Discovery Òscar Celma,2010-09-02 In the last 15 years we have seen a major transformation in the world of music. - sicians use inexpensive personal computers instead of expensive recording studios to record, mix and engineer music. Musicians use the Internet to distribute their - sic for free instead of spending large amounts of money creating CDs, hiring trucks and shipping them to hundreds of record stores. As the cost to create and distribute recorded music has dropped, the amount of available music has grown dramatically. Twenty years ago a typical record store would have music by less than ten thousand artists, while today online music stores have music catalogs by nearly a million artists. While the amount of new music has grown, some of the traditional ways of ?nding music have diminished. Thirty years ago, the local radio DJ was a music tastemaker, ?nding new and interesting music for the local radio audience. Now - dio shows are programmed by large corporations that create playlists drawn from a limited pool of tracks. Similarly, record stores have been replaced by big box reta- ers that have ever-shrinking music departments. In the past, you could always ask the owner of the record store for music recommendations. You would learn what was new, what was good and what was selling. Now, however, you can no longer expect that the teenager behind the cash register will be an expert in new music, or even be someone who listens to music at all.

Intelligent Decision Technologies 2016 Ireneusz Czarnowski,Alfonso Mateos Caballero,Robert J. Howlett,Lakhmi C. Jain,2016-06-13 The KES-IDT-2016 proceedings give an excellent insight into

recent research, both theoretical and applied, in the field of intelligent decision making. The range of topics explored is wide, and covers methods of grouping, classification, prediction, decision support, modelling and many more in such areas as finance, linguistics, medicine, management and transportation. This proceedings contain several sections devoted to specific topics, such as: · Specialized Decision Techniques for Data Mining, Transportation and Project Management · Pattern Recognition for Decision Making Systems · New Advances of Soft Computing in Industrial and Management Engineering · Recent Advances in Fuzzy Systems · Intelligent Data Analysis and Applications · Reasoning-based Intelligent Systems · Intelligent Methods for Eye Movement Data Processing and Analysis · Intelligent Decision Technologies for Water Resources Management · Intelligent Decision Making for Uncertain Unstructured Big Data · Decision Making Theory for Economics · Interdisciplinary Approaches in Business Intelligence Research and Practice · Pattern Recognition in Audio and Speech Processing The KES-IDT conference is a well-established international annual conference, interdisciplinary in nature. These two volumes of proceedings form an excellent account of the latest results and outcomes of recent research in this leading-edge area.

Dictionary of Acronyms and Technical Abbreviations Jakob Vlietstra,2012-12-06 This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control; and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations, conferences, symposia and workshops. This reference is important for all practitioners and users in the areas mentioned above, and those who consult or write technical material. This Second Edition contains 10,000 new entries, for a total of 33,000.

Advances in Self–Organizing Maps Jorma Laaksonen,Timo Honkela,2011-06-03 This book constitutes the refereed proceedings of the 8th International Workshop on Self-Organizing Maps, WSOM 2011, held in Espoo, Finland, in June 2011. The 36 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on plenaries; financial and societal applications; theory and methodology; applications of data

mining and analysis; language processing and document analysis; and visualization and image processing.

Sequential Decision–Making in Musical Intelligence Elad Liebman,2019-10-01 Over the past 60 years, artificial intelligence has grown from an academic field of research to a ubiquitous array of tools used in everyday technology. Despite its many recent successes, certain meaningful facets of computational intelligence have yet to be thoroughly explored, such as a wide array of complex mental tasks that humans carry out easily, yet are difficult for computers to mimic. A prime example of a domain in which human intelligence thrives, but machine understanding is still fairly limited, is music. Over recent decades, many researchers have used computational tools to perform tasks like genre identification, music summarization, music database querying, and melodic segmentation. While these are all useful algorithmic solutions, we are still a long way from constructing complete music agents able to mimic (at least partially) the complexity with which humans approach music. One key aspect that hasn't been sufficiently studied is that of sequential decision-making in musical intelligence. Addressing this gap, the book focuses on two aspects of musical intelligence: music recommendation and multi-agent interaction in the context of music. Though motivated primarily by music-related tasks, and focusing largely on people's musical preferences, the work presented in this book also establishes that insights from music-specific case studies can also be applicable in other concrete social domains, such as content recommendation.Showing the generality of insights from musical data in other contexts provides evidence for the utility of music domains as testbeds for the development of general artificial intelligence techniques.Ultimately, this thesis demonstrates the overall value of taking a sequential decision-making approach in settings previously unexplored from this perspective.

Music Data Mining Tao Li,Mitsunori Ogihara,George Tzanetakis,2011-07-12 The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data, such as styles, artists, lyrics, and reviews. Bringing together an interdisciplinary array of top researchers, Music Data Mining presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing. The book first covers music data mining tasks and algorithms and audio feature extraction, providing a framework for subsequent chapters. With a focus on data classification, it then describes a computational approach inspired by human auditory perception and examines instrument recognition, the effects of music on moods and emotions, and the connections between power laws and music aesthetics. Given the importance of social aspects in understanding music, the text addresses the use

of the Web and peer-to-peer networks for both music data mining and evaluating music mining tasks and algorithms. It also discusses indexing with tags and explains how data can be collected using online human computation games. The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining. The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information. An excellent introduction to the field, this volume presents state-of-the-art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections.

Xenakis Creates in Architecture and Music Roger Reynolds,Karen Reynolds,2021-11-04 • Describes the creative energy of two highly respected 20th century artists, Iannis Xenakis both as engineer and composer, and Roger Reynolds, Pulitzer prize winning musician in 1989 • Will appeal to the professional sector of musicians and architects, and students in both of these disciplines • Connects the creative path of architecture and music, i.e., Xenakis' treatment of "light" in an architectural context parallels his use of varying textural density in his music. • Analyzes chamber works Achorripsis, Thallein, and his string quartet, Tetras, which pertain to the interactive house design

Self-Organizing Systems David Hutchison,Randy H. Katz,2007-08-26 This book constitutes the refereed proceedings of the Second International Workshop on Self-Organizing Systems, IWSOS 2007.
