Programming Flash Communication Server Brian Lesser,Giacomo Guilizzoni,Joey Lott,Robert Reinhardt,Justin Watkins,2005-02-22 With the advent of Flash Communication Server MX (FCS), Macromedia believes that it's on the edge of a breakthrough in how people think about the Internet. FCS has been designed to provide web developers with the means to add polished interactive audio and video features to their sites, the sort of features that users have come to expect. Naturally, the process of efficiently integrating rich media into applications, web sites, and web content is a complex one, to say the least. That's where Programming Flash Communication Server factors in. As the foremost reference on FCS, it helps readers understand how FCS can facilitate: Video on demand Live webcasts Video chat and messaging Shared desktop conferences Live auctions Interactive whiteboard presentations Workflow collaboration Multi-user games Programming Flash Communication Server not only explains how to use the pre-built FCS components to construct a simple application, it also explains the architecture so that developers can program custom components to make even more advanced applications. In addition, the book explains how to truly optimize performance, and talks about considerations for networked applications as well as the media issues pertaining to FCS. Programming Flash Communication Server gives developers a sorely needed leg up on this potentially intimidating technology. It lets users develop cool web applications ranging from direct dating experiences with real-time video, to pre-recorded corporate presentations, to news services with video and audio, and much more. At last, the ability to build web sites with rich interactive features--minus the complex downloads and installation hassles--is a reality. And now, with Programming Flash Communication Server from O'Reilly by your side, you can do more quickly and easily than you ever dreamed possible.

Advanced PHP for Flash Steve Webster,Frank Rice,James Dean Palmer,Kev Sutherland,Todd Marks,Jacob Hanson,Harvard Eide,2013-11-11 Advanced PHP for Flash is the follow-up to the hugely popular Foundation PHP for Flash. The main aim of this book is to extend the reader's knowledge of using PHP and MySQL to produce dynamic content for Flash. Essentially, it picks up the baton from the first book and runs with it until there's no more road. The book takes the reader from being an intermediate to an advanced PHP/Flash developer, and helps them create some awesome Flash-based web applications along the way. It covers the core PHP features, as well as some exciting extras, that follow on directly from the knowledge gained in the first chapter, and show the reader how to use them in real-world applications. This book covers: Sessions File Uploading Advanced MySQL Socket Functions PHP and XML Ming Plus fully functional case studies This book is aimed squarely at those readers who want to create dynamic Flash-based web applications, and especially at those who have finished the first book and are hungry for more. As this book is pitched at those with an intermediate knowledge of PHP (and a decent grasp of MySQL) it has the advantage of being useful to both programmers and those coming over from the first book.

Video Conferencing over IP: Configure, Secure, and Troubleshoot Michael Gough,2006-06-07 This book de-mystifies the technology behind video conferencing and provides single users and small enterprises with the information they need to deploy video conferencing efficiently and cost effectively. For many years, the promise of high quality, low cost video conferencing has been an attractive solution for businesses interested in cutting travel costs while maintaining the benefits of face-to-face contact. Unfortunately, most solutions never lived up to the promise, due primarily to lack of internet bandwidth and poorly developed protocols. That's no all changed. The capacity has been created, the hardware works, and businesses are more eager than ever to cut down on travel costs. * Budget conscious methods for deploying Video over IP in small to medium enterprises * Coverage of Cisco, Microsoft, Skype, AOL, Google, VidiTel and many other products * How to identify and resolve nagging quality of service issues such as transmission delays and out of synch video-to-voice feeds
