Hip-Hop Turntablism, Creativity and Collaboration Sophy Smith, 2016-04-22 Armed only with turntables, a mixer and a pile of records, hip-hop DJs and turntable musicians have changed the face of music. However, whilst hip-hop has long been recognised as an influential popular culture both culturally and sociologically, hip-hop music is rarely taken seriously as an artistic genre. *Hip-Hop Turntablism, Creativity and Collaboration* values hip-hop music as worthy of musicological

attention and offers a new approach to its study, focusing on the music itself and providing a new framework to examine not only the musical product, but also the creative process through which it was created. Based on ten years of research among turntablist communities, this is the first book to explore the creative and collaborative processes of groups of DJs working together as hip-hop turntable teams. Focusing on a variety of subjects - from the history of turntable experimentation and the development of innovative sound manipulation techniques, to turntable team formation, collective creation and an analysis of team routines - Sophy Smith examines how turntable teams have developed new ways of composing music, and defines characteristics of team routines in both the process and the final artistic product. Relevant to anyone interested in turntable music or innovative music generally, this book also includes a new turntable notation system and methodology for the analysis of turntable compositions, covering aspects such as material, manipulation techniques and structure as well as the roles of individual musicians.

Laser Spectroscopy VII Theo W. Hänsch, Yuen R. Shen, 2013-06-05 The Seventh International Conference on Laser Spectroscopy or SEICOLS'85 was held at the Maui Surf Hotel, Hawaii, USA, June 24 to 28, 1985. Like its predecessors at Vail, Megeve, Jackson Lake, Rottach-Egern, Jasper Park, and Interlaken, SEICOLS '85 aimed at providing an informal setting for active scientists to meet and discuss recent developments and applications in laser spectroscopy. The Conference site on the sunny sands of famed Kaanapali Beach on the Island of Maui, although perhaps not the traditional mountain resort, offered nonetheless an atmosphere most inspiring to creative discussions during the unscheduled afternoons. The Conference was truly international: 223 scientists represented 19 countries, including Australia, Canada, People's Republic of China, Denmark, Finland, France Germany (FRG), Great Britain, Israel, Italy, Japan, South Korea, Netherlands, New Zealand, Poland, Spain, Sweden, Switzerland, and U.S.A. The intense scientific program included 14 topical sessions with 59 invited talks. Approximately 60 additional invited papers and 16 postdeadline papers were presented during three lively evening poster sessions. The present Proceedings contain oral as well as poster and postdeadline papers. We thank all authors for the timely preparation of their manuscripts, now available to a wider audience. We would also like to thank the members of the International Steering Committee for their valuable suggestions and advice. Our special thanks go to the members of the Program Committee for their painstaking efforts.

Groove Music Mark Katz, 2012 Based on extensive research and interviews, presents a history

of hip-hop that covers such topics as the evolution of the turntable, the world of DJ battles, the influence of digital technology, and the politics of race and gender.

There is a special focus on state-of-the-art gear, spotlighting the most exciting, cutting-edge features.

The Art of Mixing David Gibson, 2019-01-10 David Gibson uses 3D visual representations of sounds in a mix as a tool to explain the dynamics that can be created in a mix. This book provides an in-depth exploration into the aesthetics of what makes a great mix. Gibson's unique approach explains how to map sounds to visuals in order to create a visual framework that can be used to

analyze what is going on in any mix. Once you have the framework down, Gibson then uses it to explain the traditions that have been developed over time by great recording engineers for different styles of music and songs. You will come to understand everything that can be done in a mix to create dynamics that affect people in really deep ways. Once you understand what engineers are doing to create the great mixes they do, you can then use this framework to develop your own values as to what you feel is a good mix. Once you have a perspective on what all can be done, you have the power to be truly creative on your own – to create whole new mixing possibilities. It is all about creating art out of technology. This book goes beyond explaining what the equipment does – it explains what to do with the equipment to make the best possible mixes.

Bedroom Beats & B-sides Laurent Fintoni, 2020 The first decades of the 21st century saw dramatic changes in the music industry as new technology transformed creation, communication, and consumption. Amid this turmoil one change occurred relatively quietly, almost naturally: so-called bedroom producers, music makers raised on hip-hop and electronic music, went from anonymous, often unseen creators to artists in their own right. In *Bedroom Beats & B-sides: Instrumental Hip Hop & Electronic Music at the Turn of the Century*, Laurent Fintoni details the rise of a new generation of bedroom producers at the turn of the century through the stories of various instrumental hip-hop and electronic music scenes. From trip-hop, jungle, illbient, and IDM in the 1990s to just beats in the late 2000s, the book explores how these scenes acted as incubators for new ideas about composition and performance that are now taken for granted. Combining social, cultural, and musical history with extensive research, the book tells the B-side stories of hip-hop and electronic music from the 1990s to the 2010s and explores the evolution of a modern beat culture from local scenes to a global community via the diverse groups of fringe idealists who made it happen and the external forces that shaped their efforts. Includes quotes and stories drawn from more than 100 interviews with producers, DJs, label owners, and more including James Lavelle, Charlie Dark, Luke Vibert, Mark Pritchard, Flying Lotus, Georgia Anne Muldrow, El-P, Hudson Mohawke, Kode9, Prefuse 73, Anti Pop Consortium, Dabrye, Waajeed, Tekilatex, Ghislain Poirier, Kutmah, LuckyMe, Benji B, The Bug, and many more. *Bedroom Beats & B-sides* is the first comprehensive history of the instrumental hip-hop and electronic scenes and a truly global look at a thirty-year period of modern music culture based on a decade of research and travel across Europe, North America, and Japan.
