Sports Trading on Betfair Wayne Bailey, 2014-10-12 Bailey's background makes him the perfect person to write a book on carving out a living trading the often frenetic markets of the betting exchanges and he does not disappoint. If you can't make back the cover price by using the ideas found here, then trading on the exchanges is probably not for you. The best book of its type so far. (Book review in *The Racing Post*, 19th April 2015) IN the past fifteen years, the betting industry in the UK and Ireland has changed beyond recognition. While technology has made it easier than ever to place a bet, for most people making a profit from sports betting remains as tricky as ever. Yet there are a growing number of traders, some of which have no previous sports betting experience, making handsome profits from exchanges like Betfair and Betdaq. In *Sports Trading on Betfair*, sports trader Wayne Bailey explains the dynamics of odds movement, how prices move and why - and more importantly, describes in detail the systems and strategies he uses on a daily basis to profit from the betting exchanges. With a background in both financial trading and sports betting, Bailey explains how we can merge those two disciplines to understand the market and find ways to finally beat the books. Bailey focuses largely on horseracing but the principles and strategies described within this book can be applied to most sports. Topics include weight of movement, swing trading, scalping, betting in-running, financial spread-trading, Dutching, support and resistance, arbitrage, trading psychology and creating your own trading plan.

Tennis Trading On Betfair Tom Humphrey, Written by a successful former Commodities trader in the City of London this book is an essential guide for anyone looking to make money from betting on Tennis markets. Since the advent of Betfair and other betting exchanges the author has developed tried and tested systems that apply the principles of financial trading to tennis matches with great success. The genius of this book is the authors ability to describe these systems in laymans terms that even a novice gambler can understand and put into effect. This includes a step by step guide complete

with annotated screenshots showing how and when to place bets and when to close them for immediate profits and minimal loss. This book should be a bible to anyone who wants to make money betting on tennis matches. If you want to change your life and increase your finances today then reading this book would be a great place to start!

Programming for Betfair James Butler, 2015-06-04 The Betfair exchange, coupled with its API, permits a suitably skilled trader to code complex trading applications, which would not look out of place in the financial markets. This book offers a sports trader the chance to build their own trading applications, regardless of their programming ability. Each chapter of Programming for Betfair contains snippets of code that combine to create a complete trading application. The application is geared towards horse racing but can easily be adapted to other sports on Betfair's exchange. Using Microsoft's Visual Studio (downloadable for free) the reader is shown how to code an application that will gather prices for any market on Betfair's exchange and then place bets into that market. The reader is shown how to automate their trading so that they can remove emotion from their trades and scale up their trading for increased profits. Further development of the application permits it to save data from Betfair onto the reader's hard drive for offline analysis and visualisation in a spreadsheet for the purpose of building trading algorithms. Also covered is an enhancement of Betfair's charts so that charts can be automatically updated and compared. The final chapter of the book discusses ideas for taking the application and the reader's skills to the next level. Topics discussed include constructing your own trading indicators, volume analysis, trend following, arbitrage, low-latency trading and many more.

Scalping and Pre-set Value Trading Cambridge Memorabilia, 2020-12-12 If you have previously read any of our other eBooks - Trading Systems, you will already know that we love Automated, Set and Forget (securing pre-event / before fixture has started, better odds / entry points). Mastering Betfair Pete Nordsted, 2010-08-27 Trading the Betfair and sporting markets in-play is rapidly growing in popularity thanks to the increased sporting coverage available on many different satellite and cable channels. Many people start by just using Betfair to obtain better odds than those available at the traditional bookmakers. They then perhaps do a little more research and learn to trade the markets, but to make a regular profit a serious, disciplined and planned approach needs to be employed in order to not only win but keep on winning. 'Mastering Betfair' will take the reader through many of the low-risk strategies developed by the author over the past 3 years. The book also aims to highlight to the Betfair user the importance of employing disciplines - such as managing risk - that are

normally associated with the financial markets, and indeed it is hoped that the book will also highlight to the financial trader the unique opportunities that are available on Betfair.

The 6F 7F Furlong Hope Horse Lay System M C Horrocks, I have deliberately kept all the

waffle to a minimum in the eBook and have only focused on the horse laying system essentials as this is the important bit. What I suggest is that you make yourself familiar with the lay system before you start placing lay bets/trades. However you could try with small stakes first so as not to miss out. The eBook assumes you are familiar with laying horses as compared to backing horses and understand decimal odds on betting exchanges like Betfair. What You Need To Get Started? A good understanding of Betting exchanges like Betfair and Betdaq and decimal odds. More importantly understanding what laying a horse means. When we lay a horse we are saying that we think the horse will get beaten. Most people back horses to win! You will need access to the internet and the Betfair Exchange website <https://www.betfair.com/> or Betdaq exchange <https://www.betdaq.com/>

Scalping and Pre-Set Value Trading: Football Over Under Goals Market Cambridge Memorabilia, 2020-11-22 A low risk trading system for medium to high returns: Steady and continuous bank builder with repetitive entries and level-out pre-set / manually adjusted odds Grab the best odds - don't just take the first offers Level your winnings across all possible results Set and forget - once desired odds and stakes have been matched Extremely mild recovery process on losing trades - where value can be recovered Real trades explained in detail Images to demonstrate every step Completed spreadsheets Results, adjustments and re-investment Just a little bit of math Trade like a pro - multiple matches at the same time Set and forget with days in advance No need to waste time on watching football / soccer matches We live in a heavily digitalised world. In the years to come it will become even more so, no doubt about that. Successful Sports Exchange value traders will remain successful as long as they adapt to new trading environments, behaviours, other traders (or simple punters) habits and the BIG one - how sports markets are influenced by new trading techniques and technologies. And yes, that refers to certain traders using Bots / Software / Programs or Apps - or whatever else you want to call them - to automatically place their in and out trades, to almost always secure a profit. People that are playing at a very high level, paying thousands of Pounds / Dollars / Euros in annual subscriptions for Software / Apps and always prepared with finances, available liquidity - very high banks, to enter and exit the markets with thousands if not tens of thousands of Pounds / Dollars / Euros in very swift and strategic movements. Traders that can significantly and sufficiently influence a market with their own high liquidity trades, enough to very quickly gain a couple ticks in odds movement and get out for a guaranteed substantial profit. Known as Automated Scalping. This is old news and hopefully you will not be surprised to hear about lifelong Stock market traders re-training in operating Sports Exchanges - principles are extremely similar and odds movement happens a lot faster. How can we compete against someone like that? You can think about it in awe, but it might be too soon. Some bookmakers are also covering their markets on Exchanges or level their un-covered value taken on bets from normal punters. Same concept as Matched Betting, they accept bets from people at smaller odds and Hedge against better odds on Exchange, to always make a profit. To give you an even bigger example, whole businesses are now created around Sports Exchanges. Firms employing people to do just that, Sports Value Trading at a commercial level. Imagine a dozen people inside an office, working for an employer, but only doing this, day in - day out. And they will all be traders, trained at using specialised, extremely performant software, with extremely high liquidities available at any point to secure fast interventions and guaranteed profits. So, the next time you will see millions of Pounds / Dollars / Euros matched on just one market of a popular sporting event, you will know why. How can we compete against something like this? The reality is, everyone has a chance, no matter how big or small the amounts you have to invest. But you really, really need to know what you are doing, that specific sport and more importantly - how that specific market works. Yes, odds will shift when a large influx of liquidity is poured into the market as existing odds will be matched between Back and Lay; and you might discover odds are moving against you. We've only mentioned the above to build momentum on a very important conclusion: markets to eventually settle indifferent of the amounts in play and markets do also become saturated or over-saturated with a realisation that a given outcome was Backed to an exaggerated extent.

The Oxford Handbook of the Economics of Gambling Leighton Vaughan Williams, Donald S. Siegel, 2013-11-12 There is growing interest among academics and policymakers in the economics of gambling, which has been stimulated by major regulatory and tax changes in the U.S., U.K. Continental Europe, Asia, Australia and elsewhere. Unfortunately, there is no

comprehensive source of path-breaking research on this topic. To fill this gap, we commissioned chapters from leading economists on all aspects of gambling research. Topics covered include the optimal taxation structure for various forms of gambling, factors influencing the demand and supply of gambling services, forecasting of gambling trends, regulation of gambling, the efficiency of racetrack and sports betting markets, gambling prevalence and behavior, modeling the demand for gambling services, the economic impact of gambling, substitution and complementarities among different types of gambling activity, and the relationship between gambling and other sectors of the economy. These are all important issues, with significant global implications. Specifically, we divide the Handbook into sections on casinos, sports betting, horserace betting, betting strategy, motivation, behavior and decision-making in betting markets, prediction markets and political betting, and lotteries and gambling machines

The Betfair Miller's Guide Dennis Huxley, 2015-11-01 The Miller's Guide has settled pub debates on racing and sport for more than a century. The 800-page book contains place getters for all Australian Group races as well as thousands of sporting results dating back to the 1880s. This sporting annual has been associated with the 'Sport of Kings' since the early 1880s when racehorse owner, breeder and bookmaker J. J. Miller printed his first guide to aid punters betting on the Caulfield and Melbourne Cups. Initially called J. J. Miller's Sporting Pamphlet and later the J. J. Miller's Sporting Annual, this publication came to be known to its many readers as the Miller's Guide.

Picking Winners No Problem M C Horrocks, Introduction The title of this book is a bold statement and one cannot really state this unless you put your money where your mouth is! I have written many books around UK horse racing systems and this one I really enjoyed due to the simplicity of this horse racing system and how easy it is to apply. The system uses the excellent free racing post website where you can obtain all the form data you need to use this system. Plus you do not have to be a form expert to understand it. I personally think horse racing pundits make heavy weather of horse racing form, i.e. looking at a horse's breeding and many other factors. I think this information just confuses the average punter. I have added a special bonus horse laying system in this book and I think you will enjoy it! This laying system is so easy to follow you will look back at all the bets you have placed in the past and wonder how did I get it so wrong! Yes it will hurt knowing how much money you lost when you should have not. Moving back onto the horse backing system, picking winners will be very easy for you and even more you will gain confidence and control in your betting. This horse racing system normally picks 2 to 3 horses per day in UK handicap horse racing markets. You should aim at using Betfair to place your bets due to the better prices and in-play tactic I will show you in this book. Understand the system before placing bets, I hope you enjoy it!
