Architecting and Deploying DB2 with BLU Acceleration Whei-Jen Chen, Brigitte Blaser, Marco Bonezzi, Polly Lau, Jean Cristie Pacanaro, Martin Schlegel, Ayesha Zaka, Alexander Zietlow, IBM Redbooks, 2015-05-11 IBM® DB2® with BLU Acceleration is a revolutionary technology that is delivered in DB2 for Linux, UNIX, and Windows Release 10.5. BLU Acceleration delivers breakthrough performance improvements for analytic queries by using dynamic in-memory columnar technologies. Different from other vendor solutions, BLU Acceleration allows the unified computing of OLTP and analytics data inside a single database, therefore, removing barriers and accelerating results for users. With observed hundredfold improvement in query response time, BLU Acceleration provides a simple, fast, and easy-to-use solution for the needs of today's organizations; quick access to business answers can be used to gain a competitive edge, lower costs, and more. This IBM Redbooks® publication introduces the concepts of DB2 with BLU Acceleration. It discusses the steps to move from a relational database to using BLU Acceleration, optimizing BLU usage, and deploying BLU into existing analytic solutions today, with an example of IBM Cognos®. This book also describes integration of DB2 with BLU Acceleration into SAP Business Warehouse (SAP BW) and SAP's near-line storage solution on DB2. This publication is intended to

be helpful to a wide-ranging audience, including those readers who want to understand the technologies and those who have planning, deployment, and support responsibilities.

DVD, Blu-ray and Beyond Jonathan Wroot, Andy Willis, 2017-11-03 This book demonstrates, in contrast to statistics that show declining consumption of physical formats, that there has not been a mass shift towards purely digital media. Physical releases such as special editions, DVD box-sets and Blu-Rays are frequently promoted and sought out by consumers. And that past formats such as VHS, Laserdisc and HD-DVD make for sought-after collectible items. These trends are also found within particular genres and niche categories, such as documentary, education and independent film distribution. Through its case studies, this collection makes a distinctive and significant intervention in highlighting the ways in which the film industry has responded to rapidly changing markets. This volume, global in scope, will prove useful to those studying the distribution and exhibition of films, and the economics of the film industry around the world.

Implementation Best Practices for IBM DB2 BLU Acceleration with SAP BW on IBM Power Systems Dino Quintero, Yukiko Itaya, Speitim Velic, Adriana Melges Quintanilha Weingart, IBM Redbooks, 2015-05-11 BLU Acceleration is a new technology that has been developed by IBM® and integrated directly into the IBM DB2® engine. BLU Acceleration is a new storage engine along with integrated run time (directly into the core DB2 engine) to support the storage and analysis of column-organized tables. The BLU Acceleration processing is parallel to the regular, row-based table processing found in the DB2 engine. This is not a bolt-on technology nor is it a separate analytic engine that sits outside of DB2. Much like when IBM added XML data as a first class object within the database along with all the storage and processing enhancements that came with XML, now IBM has added column-organized tables directly into the storage and processing engine of DB2. This IBM Redbooks® publication shows examples on an IBM Power Systems™ entry server as a starter configuration for small organizations, and build larger configurations with IBM Power Systems larger servers. This publication takes you through how to build a BLU Acceleration solution on IBM POWER® having SAP Landscape integrated to it. This publication implements SAP NetWeaver Business Warehouse Systems as part of the scenario using another DB2 Feature called Near-Line Storage (NLS), on IBM POWER virtualization features to develop and document best recommendation scenarios. This publication is targeted towards technical professionals (DBAs, data architects, consultants, technical support staff, and IT specialists) responsible for delivering cost-effective data management solutions to provide the best system configuration for their clients' data analytics on Power Systems.

Blu Rose and the Land of Saunt Robert Pew, 2013-08-13 Less is more in writing the author's notes, so, my eyes did not see, but my voice spoke what my mind's eye did envision, and my ears heard what my mouth had expressed, my hand recorded what my mouth and ears had divulged; thus, my eyes could forever read what my world had revealed to me. Although this was my course to sublimity, I can not stop the readers of this work from questioning its worth, having not turned the pages yet. It is for the reader to unravel the value of this book for themselves. I have been writing short stories for over thirty years. This time I set out to make from the thin air a story of good versus evil, where the right would prevail over the wrong. I named the main character Blu Rose because at the time of the making of the story seven years ago (2006), there were no blue roses. I selected green roses as the elixir for the same reason. I was traveling a stretch of Indiana highway between Indianapolis and Cincinnati, and I felt a story looming someplace in the air about me, and the first story came forth. It is chapter four, The Wizard. It is the story of Fredrick Broomstocker and the beginning of Blu Rose leaning to know herself. Liking the story, I decided to develop it. After a few weeks I repeated the act and another story came to mind. I then created a new story

chapter, along the same stretch of road, and when stopped for the night, I would write down what I had told myself. This farmland of Indiana became for me the hollowed land of Blu Rose learning to know herself. For confidence in editing I used the words of Dale Carnegie, Whatever the mind can conceive and believe the mind can achieve. I remember the distance from Milwaukee to Green Bay also setting an excellent stage for development of story lines; but it was New York State where I brought to life chapter twelve, The Deer in the Woods. It was created in the town where Elmer's Glue is made. I was spending the night along the river on the edge of the town in a dirt parking area and was hypnotized by a small lopsided tree whose leaves were being blown in the wind by the breeze. Chapter twelve is my favorite. That is how the novelette came to be. The second story, a long short story, is The Land of Saunt. I will tell you first that I started making it up back in 1974 cursing about the local countryside, and I found the outline so charming that I wrote it down in a notebook. I forgot about it until 2007, when I was finished writing Blu Rose. Like a burst of luck, maybe just the level of creativity, no matter, I remembered the story. Within weeks I developed the plot and wrote a rough little story. Solving the story comes about with five crystals. I had read of the five crystals of South America in a book and had made a mental record of them for years. In The Land of Saunt, you will learn of the Geometric people, and the problem they have come to by way of Ginger's crystal ball. The solution became self-evident and proved as pleasing as it was pleasant to the story plotting. Ginger's world then becomes a transparency for all and she moves on to search out her heart's desire. The last piece of work is a poem, Walking in Confidence. I wrote it after winning a finalist award in the Dayton, Ohio Library Poetry Contest. I have not had the Ivy League university training in writing, nor have I had the workshops used by the bestsellers, but I have had the experience of traveling for a living, and I have visited some of the best museums on the earth. I have also spent more than enough time in the libraries--138 libraries last count. When I had the dream of the library, and it was really a dream, I had to write it. I have included it as the last piece of work because I owed something to the libraries that have taught me the masterful art of storytelling. The book as a whole is all creativity, and yet it comes together from beginning to end in a singular harmonious logic, c
