Powerful Teaching Pooja K. Agarwal, Patrice M. Bain, 2019-06-05 Unleash powerful teaching and the science of learning in your classroom *Powerful Teaching: Unleash the Science of Learning* empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators

in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With *Powerful Teaching*, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom *Powerful Teaching: Unleash the Science of Learning* is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

The Braindump Journal Peter Iliaca, 2019-08-04 Focus. Arguably the most scarce asset in today's society. And arguably the most valuable. Distractions flood our minds from social media, tasks that are waiting, co-workers, worries, family issues, etc, and end up being a big cost. Just telling ourselves that we'll get to it later seldom helps to get the distractions out of our minds, but if we write the down distractions, and dump them out on paper, it's like we are dedicating ourselves more concretely to get back to the issue and it makes it easier to ignore for the moment. Some like to do their braindumps digitally, in their note or task management apps, but many feel that opening up a new app also opens up more distractions. Having a physical braindump journal next to us when we work, to quickly scribble down distractions we get, and then get back to and review when we have the time, removes the distractions of app-switching and allows us to get back to what we were doing quicker. People do their braindumps differently. Some just like to write down their distractions and seldom review them. Others like to take a 5-10 minute break once or twice a day to review their braindumps for what actions need to be taken, being to schedule the task or researching the problem, delegate it, ignore the (non-)problem, or what other action they feel is needed. And many just like to be able to check-off the distractions when they've reviewed their braindump. This braindump journal, although seemingly simplistic, is made be adaptable to many preferences and to take away the need to repeatedly redraw one's own design.

Ditch That Textbook Matt Miller, 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Brain Dump Rwg, 2020-01-08 Brain Dumps are popular in journaling communities. There are several different ways to 'brain dump' but ultimately, it's a method to get all the thoughts out of your head and onto paper quickly, leaving you with a clearer mind and feeling less overwhelmed. A brain dump can be stream of consciousness writing, but more usually it is a series of lists. We reflect that in our template so people can scribble their thoughts in the spaces provided until their head feels clearer. There are many ways to adapt or use this page. It can be included in journals at intervals and may provide a welcome break for journalists who usually write more thoughtfully and slowly. You could also add a timer challenge. Some people like to 'brain dump' for a set time, such as 5 or 10 minutes. As with the vision board, you could alter the headers to suit different audiences.

For example, a brain dump for an expectant mother could reflect items she wants to buy for the baby, hopes and fears about the new arrival or ideas for a birth plan. Brain dump lists can be pragmatic or more introspective. At the time of publishing, 'brain dump' gets approximately 12,000 google searches per month.
