Stop Motion: Craft Skills for Model Animation Susannah Shaw, 2012-07-26 To make great animation, you need to know how to control a whole world: how to make a character, how to make that character live and be happy or sad. You need to create four walls around them, a landscape, the sun and moon - a whole life for them. You have to get inside that puppet and first make it live, then make it perform. Susannah Shaw provides the first truly practical introduction to the craft skills of model animation. This is a vital book in the development of model animation which, following the success of Aardman's first full-length film, *Chicken Run*, is now at the forefront of modern animation. Illustrated in full colour throughout you are shown step by step how to create successful model animation. Starting with some basic exercises, you will learn about developing a story, making models, creating set and props, the mechanics of movement, filming, postproduction and how to set about finding that elusive first job in a modern studio. Susannah Shaw is Programme Development Manager for the Animated Exeter festival. She was head of the Bristol Animation Course from 1996 to 2000 at the University of the West of England and former camera assistant at Aardman (working on 'A Close Shave' among other films).

Stage Manager Larry Fazio, 2017-01-12 Stage Manager: The Professional Experience-Refreshed takes the reader on a journey through all aspects of the craft of stage management in theatre, including the technological advancements that have come to theatre and the stage manager's job. Chapters are laid out to reflect the order in which stage managers experience and perform their work: what makes a good stage manager, seeking the job, building a resume, interviewing for the job, and getting the job (or not getting the job). Included are chapters on the chain of command, working relationships, tool and supplies, creating charts, plots, plans and lists, the rehearsal period, creating the prompt book, calling cues, and the run of the show. These are just some of the many topics covered in this book. In addition, the author uses interviews with stage management professionals in various stages of production, providing another view of how the stage manager is perceived and what is expected from the work of the stage manager. Fifteen years after the original publication of Stage Manager: The Professional Experience, this new and refreshed edition is now in color to help clarify and illustrate points in the text. It is fully updated to reflect the world of computerized technology: smart phones, thinly designed laptops, tablets, use of email and text messaging, storing and sharing files and information in cloud-based apps. Then there are the innovations of automation-electronically moving scenery, scenic projections-casting images and patterns on the stage; moving lights; LED luminaires; lasers; and greater use of fog and haze machines. In addition, the extensive glossary of more than 600 terms and phrases had been extended to well over 700, providing an excellent professional vocabulary for anyone hoping to be a theatre

stage manager or already working in the field.
