*Understanding Broadcast Journalism* Stephen Jukes, Katy McDonald, Guy Starkey, 2017-11-21 Understanding Broadcast Journalism presents an insightful exploration of broadcast journalism today; its characteristics, motivations, methods and paradigms. The authors balance discussions of industry practice with critical examinations of content, across television, radio and associated multiplatform journalism. They highlight key issues including ownership and shifting regulatory environments, the revolutionary role of user-generated-content and digital convergence, and

coverage of global issues by rolling news services. Chapters include: • a brief history of broadcasting; • an overview of recent commercial challenges in the news industry and the impact on television news; • current trends in the running of local radio stations, with particular focus on the rise of 'hubbing'; • the ethics of broadcast journalism; • the significance of international broadcasters including the BBC, CNN and Al-Jazeera. The book identifies how the dissemination of broadcast journalism is evolving, whilst also arguing for the continued resilience of this industry now and in the future, making the case that journalistic storytelling remains at its most effective in broadcast environments. Professional journalists and students of media studies and journalism will find this a timely and thought-provoking intervention, which will help to inform their professional practice and research.

*Stay Tuned* Christopher H. Sterling, John Michael Kittross, 2001-11-01 Since its initial publication in 1978, *Stay Tuned* has been recognized as the most comprehensive and useful single-volume history of American broadcasting and electronic media available. This third edition has been thoroughly revised and updated to bring the story of American broadcasting forward to the 21st century, affording readers not only the history of the most important and pervasive institution affecting our society, but also providing a contextual transition to the Internet and other modern media. The enthusiasm of authors Christopher H. Sterling and John Michael Kittross is apparent as they lead readers through the development of American electronic mass media, from the first electrical communication (telegraph and telephone); through radio and television; to the present convergence of media, business entities, programming, and delivery systems, including the Internet. Their presentation is engaging, as well as informative, promoting an interest in history and making the connections between the developments of yesterday and the industry of today. Features of this

third edition include: \*chronological and topical tables of contents; \*new material reflecting modern research in the field; \*a new chapter describing historical developments from 1988 through to the current day; \*an expanded bibliography, including Web site and museum listings; \*an updated and expanded glossary and chronology; and \*extensive statistical data of the development of television and radio stations, networks, advertising, programming, audiences, and other aspects of broadcasting. Designed for use in undergraduate and graduate courses on the history of American mass media, broadcasting, and electronic media, Stay Tuned also fits well into mass communication survey courses as an introduction to electronic media topics. As a chronicle of American broadcasting, this volume is also engaging reading for anyone interested in old radio, early television, and the origins and development of American broadcasting.

*On the Short Waves, 1923-1945* Jerome S. Berg, 1999 As radio developed in the early 1920s, the focus for most people was the AM band and stations such as KDKA, the first broadcast station. There was, however, another broadcast method that was popular among many early enthusiasts--shortwave radio. As is true today, the transmission of news and entertainment programs over shortwave frequencies permitted reception over great distances. For many in America and beyond, shortwave was an exciting aspect of the new medium. Some still tune the shortwave bands to enjoy the programming. Others pursue broadcasts for the thrill of the hunt. This book fully covers shortwave broadcasting from its beginning through World War II. A technical history examining the medium's development and use tells the story of a listener community that spanned the globe. Included are overviews of the primary shortwave stations operating worldwide in the 1930s, along with clubs and competitions, publications and prizes. A rich collection of illustrations includes many QSLs, the cards that stations sent to acknowledge receipt of their transmissions and that are much

prized by long-distance collectors.

Radio's Second Century John Allen Hendricks, 2020-03-13 Winner of the 2022 Broadcast Education Association Book Award One of the first books to examine the status of broadcasting on its one hundredth anniversary, *Radio's Second Century* investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.

Broadcast News Ted White, 2005 *Broadcast News Writing, Reporting, and Producing*, Fourth Edition examines the skills, technologies, and challenges of writing, reporting, and producing for broadcast journalism. Murrow, Charles Kuralt, Cokie Roberts, Eric Sevareid, Pauline Frederick, Charles Osgood, Paul Harvey, Betsy Aaron, Bob Dotson, Susan Stamberg, and Richard Threlkeld, who also discuss how they write and report.--

## BOOK JACKET.

The Beginning of Broadcast Regulation in the Twentieth Century Marvin R. Bensman, 2015-11-03  
The Radio Act of August 13, 1912, provided for the licensing of radio operators and transmitting stations for nearly 15 years until Congress passed the Radio Act of 1927. From 1921 to 1927, there were continual revisions and developments and these still serve as the basis for current broadcast regulation. This book chronicles that crucial six-year period using primary documents. The administrative structure of the Department of Commerce and the personnel involved in the regulation of broadcasting are detailed. The book is arranged chronologically in three sections: Broadcast Regulation and Policy from 1921 to 1925; Congestion and the Beginning of Regulatory Breakdown in 1924 and 1925; and Regulatory Breakdown and the Passage of the Act of 1927. There is also discussion of the Department of Commerce divisions and their involvement until they were absorbed by the Federal Communication Commission. A bibliography and an index conclude the work.

**Switching Channels** Richard E Caves, Richard E. Caves, Karen Guo, 2005-09-15 Media critics invariably disparage the quality of programming produced by the U.S. television industry. But why the industry produces what it does is a question largely unasked. It is this question, at the crux of American popular culture, that *Switching Channels* explores. In the past twenty-five years, the expansion of cable and satellite systems has transformed television. Richard Caves examines the economics of this phenomenon--and the nature and logic of the broadcast networks' response to the incursion of cable TV, especially the shift to inexpensive unscripted game and reality shows and

news magazines. An explanation of these changes, Caves argues, requires an understanding of two very different sectors: the creative industry, which produces programs; and the commercial channels, which bring them to viewers. His book shows how distributors' judgment of profitability determines the quality and character of the programs the creative industry produces. This determination, writes Caves, depends on the number and types of viewers that various programs can attract and advertisers' willingness to pay for their attention, as well as the organization of the networks that package programs, the distributors that transmit them, and the deals these parties strike with one another.
