Mathematicians in Love Rudy Rucker, 2008-07-08 Reality is never more unpredictable than when two mathematicians are in love with the same girl, and can change the world to get her. Bela and Paul, two wild young mathematicians, are friends and roommates, and both are in love with Alma, Bela's girlfriend. They fight it out by changing reality using cutting-edge math. The contemporary world they live in is not quite this one, but much like Berkeley, California, and the two graduate students are trying to finish their degrees and get jobs. It doesn't help that their unpredictable advisor Roland is a mad mathematical genius who has figured out a way to predict specific bits of the future that can cause a lot of trouble...and that he's starting to see monsters in mirrors. When Bela and Paul mess around with reality, all heaven and hell break loose. Those monsters of Roland's were really there, but who are they? This novel is a romantic comedy with a whole corkscrew of SF twists from the writer who twice won the Philip K. Dick Award for best SF novel.

Leaving no stone unturned, no ergonomic chair unadjusted, and no leftovers in the communal fridge uneaten, this hilarious guide to cubicle life will be the salvation for the more than forty million Americans stuck in cubicles. By turns uproariously funny and enormously useful, each chapter tackles a different area of cubicle life and includes a “cube tip,” a quiz, illustrations, and examples that will have you laughing out loud. You can easily kill two weeks with this book. — Josh Aiello, Author, 60 People to Avoid at the Water Cooler "Thompson provides a humorous yet thought-provoking look at what employees in today's large organizations must deal with besides their jobs." — Malcolm O. Munro, Author, From Cave to Cubicle

Mass Effect Lauren Cornell, Ed Halter, 2015-10-23 Essays, discussions, and image portfolios map the evolution of art forms engaged with the Internet. Since the turn of the millennium, the Internet has evolved from what was merely a new medium to a true mass medium—with a deeper and wider cultural reach, greater opportunities for distribution and collaboration, and more complex corporate and political realities. Mapping a loosely chronological series of formative arguments, developments, and happenings, *Mass Effect* provides an essential guide to understanding the dynamic and ongoing relationship between art and new technologies. *Mass Effect* brings together nearly forty contributions, including newly commissioned essays and reprints, image portfolios, and transcribed discussion panels and lectures that offer insights and reflections from a wide range of artists, curators, art historians, and bloggers. Among the topics examined are the use of commercial platforms for art practice, what art means in an age of increasing surveillance, and questions surrounding such recent concepts as “postinternet.” Other contributions analyze and document particular works by the artists of And/Or Gallery, Cory Arcangel, DIS, Cao Fei, the Radical Software Group, and others. *Mass Effect* relaunches

a publication series initiated by the MIT Press and the New Museum in 1984, which produced six defining volumes for the field of contemporary art. These new volumes will build on this historic partnership and reinvigorate the conversation around contemporary culture once again. Cars from a Marriage Debra Galant, 2010-04-27 An auto-biography of a marriage from the highly acclaimed author who deftly navigates the lives of one suburban couple with humor and insight From a '74 Mustang to a Chevy Suburban, Debra Galant's *Cars from A Marriage* charts the important events—big and small—in one couple's relationship by way of the automobiles that drive them throughout the course of their lives. Ivy is a transplanted Southern belle—the daughter of a car salesman— who continually wonders how she has ended up a New Jersey stay-at-home mom with a not-so-secret fear of driving. Her husband Ellis was a stand up comedian when they met, and the owner of that '74 Mustang, but his ambitions were overshadowed by the responsibilities of a family. In the blink of an eye he became a PR executive with a mortgage, two kids, and a Buick LeSabre. The cars steer us from their first meeting, to their first fight, and down the line to a family funeral. Finally, it's on a drive along the Pacific Coast Highway that Ivy and Ellis come to some serious and

illuminating realizations about their lives. With insights that alternate between hilarious and profound, Galant provides a unique, unforgettable portrait of a marriage.

Screen Saver Noel McKeehan, 2009-11 Some fairly serious shit has happened in the last sixty years. As fate would have it, I was fairly close to the central point of a lot of that shit - albeit in some cases only briefly; shit it seems, has a fairly long half life. As time has passed I have found it increasingly difficult -impossible really - to turn off a continued remembrance of the events and places and people that inhabited the story boards of all of that shit. They just won't leave me alone. So I have written it, and them, all down. One bookend of the story was my involvement in the war effort, as we called the Vietnam debacle. The other was the near demise of IBM. Between those bookends there lurk a wide variety of people, experiences and events that always seemed, as they occurred, to be coherently additive to the total story.

The Older Person's Guide to New Stuff Mark Leigh, 2019-06-06 STRUGGLING TO STAY IN TOUCH WITH ELDERLY PARENTS DURING THE LOCKDOWN? WANTING TO HELP ISOLATED RELATIVES WITH ONLINE ORDERING? THIS IS THE PERFECT GUIDE FOR ANYONE GRAPPLING FOR THE FIRST TIME WITH FACETIME, GOOGLE HANGOUTS OR ANY OTHER ASPECT OF THE MODERN WORLD. A handy guide for anyone who says, 'The Facebook' or 'The Google' or who asks, 'Do they deliver emails on Sunday?' This is a book for the elderly and not-so-

elderly who are bamboozled not just by the technology of the contemporary world, but also various modern concepts and conceits that the more youthful take for granted. It explains a host of modern concepts and technologies that have entered everyday use and parlance but which are alien (and possibly frightening) not just to the elderly - but probably also to anyone over 45. These concepts are universal and should therefore appeal to readers in the UK, Australia, US and Europe. The definitions are all real, but entertaining, making use of easy-to-understand 'real world' references or examples to explain them.

Certain of her choice, Monica must still ask herself at every step if she is loving Silvan as well as a mother can. The result is a page-turning testimony to the power of love.
