A new book by Lisa Hanaway considers the possible destruction of the United States by large corporations. The book looks into the future through fiction and takes the reader on a journey to a new country formed by, and for, the largest corporations. In 2034, four CCG citizens venture into the Terrorists Area to search for answers about the United States of America, a country they never knew. They question the elite world they grew up in, run by CEO's of the largest corporations. After the complete takeover of the American government and military in 2013, by the corporate world, the country is changed forever. The new CCG States splits the country into three areas, one for corporate families, one for Second Tier workers, and the Terrorist Area

Monoclonal Antibodies Phil S. Shepherd,Christopher Dean,2000-05-04 Monoclonal Antibodies: A Practical Approach covers the preparation, testing, derivation, and applications of monoclonal antibodies. New immunological techniques incorporating tried and tested methodologies are described, making the book of interest to established and inexperienced immunologists. Both the standard somatic hybridization technique and recombinant techniques, including the use of phage libraries, for the preparation of rodent and human monoclonal antibodies are described. Protocols for both the small and large scale production are detailed, as well as purification and labelling (with both radioisotopes and non-radioisotopes) methods. The applications of monoclonal antibodies in immunoblotting, enzyme linked immunoassays, immunofluorescence, and FACS analysis are all covered in detail. Finally protocols are given for the use of monoclonal antibodies in rheumatoid arthritis, tissue typing, detecting DNA modified during chemotherapy, and in the clinical analysis of transplantation samples for malignancy. This book will therefore be an invaluable laboratory companion to anyone using monoclonal antibodies in their research.
