CDA and PDA Made Simple Bahaa-eddin M. Mazid,2014-11-24 CDA and PDA Made Simple cuts many long stories short and encapsulates a long-standing tradition in modern and contemporary linguistics. The theoretical scope of the book encompasses a lengthy review of relevant studies in the area of critical discourse analysis (CDA), and, more broadly, in the areas of power, control, ideology and politics as realized and enacted in discourse. The book also brings together a detailed theoretical background on the main tenets and assumptions, tools and recipes, trends and extensions and critiques and applications of critical and political discourse analysis (PDA). Its analytical focus is predominantly on how ideology and power are linguistically and meta-linguistically realized, specifically through transitivity, modality, metadiscourse and presupposition in some discourse genres in English.

Israeli Peace Discourse Dalia Gavriely-Nuri, 2015-02-15 What role do language and discourse play in the advancement of peace? What is the connection between a given society's "peace language" and the repeated failure of peace initiatives involving it? At the heart of this book lie these basic questions and the attempt to shed light on them from new angles. The book focuses on an analysis of Israeli peace discourse and indicates the need for change in this discourse in order to promote a "culture of peace". It presents the process of peace-estrangement, a set of linguistic, discursive and cultural devices intended for creating doubt regarding the positive meaning associated with the concept of peace. The approach adopted in this book is the Cultural Approach to Critical Discourse Analysis (CCDA). This approach aims at exposing the cultural codes embedded in the discourse, which contribute to reproducing abuses of social power. The analytic chapters focus on different historical periods, since the beginning of the 20th century to this day, and deal with various genres found in diverse corpora, such as Knesset records and school textbooks.

Critical Discourse Analysis, Critical Discourse Studies and Beyond Theresa Catalano, Linda R. Waugh, 2020-09-28

This book explores the problem-oriented interdisciplinary research movement comprised of Critical Discourse Analysis (CDA) and Critical Discourse Studies (CDS) for scholars, teachers, and students from many backgrounds. Beginning with a Preface by renowned CDA/CDS scholar Ruth Wodak, it introduces CDA/CDS through examples of what its research looks like, delineates various precursors to CDA/CDS and important foundational concepts and theories, and traces its development from its early years until it became established. After the relationship between CDA and CDS is discussed, seven commonly cited approaches to CDA/CDS are outlined, including their connections and differences, their origins and development, major and associated scholars, research focus(es), and central concepts and distinguishing features. After a summary of critiques of CDA/CDS and responses by CDA/CDS scholars, the book provides an overview of its salient connections to other interdisciplinary areas of scholarship such as critical applied linguistics, education, anthropology/ ethnography, sociolinguistics, gender studies, queer linguistics, pragmatics and ecolinguistics. The final chapter describes how scholars use their knowledge of CDA/CDS to make a difference in the world.

Critical Discourse Analysis and Discourse of Power Anwar Elsharkawy, 2017-01-02 Scientific Essay from the year 2012 in the subject Speech Science / Linguistics, grade: Excellent with honor, , course: Critical Discourse Analysis, language: English, abstract: The present paper has shown the practical part of CDA according to three scholars, namely they are Norman Fairclough, Ruth Wodak, and Teun van Dijk. Their approaches are somehow different in method and way of interpretation. While Fairclough is brought up on the systemic-functional model of theory and thus often concentrates on rather limited amounts of research material, Wodak turns to sociolinguistics and ethnography with an emphasis on corpus-based research and on work with different approaches with a variety of empirical data as well as background information. However, the notion that language is inherently social remains a key assumption in both approaches. On the other hand, similarly to Fairclough, van Dijk acknowledges three different perspectives; text, discourse practice and sociocultural practice, and emphasizes on the link between textual analysis and sociocultural analysis. However, van Dijk differentiates himself from both Fairclough and Wodak in his understanding of social events or of social institutions and power relations. To van Dijk, social cognitions mediate between micro- and macro-levels of society, between discourse and action, between the individual and the group. Therefore, the focus on social cognition governs the process of analysis.
