Information on CD functioning fundamentals and tips related to CD protection in a format free of math and assembling-such as data formats, the scrambler, the Reed-Solomon coder/encoder, the CIRC coder/encoder, and a weak-sectors generator-are also provided. The main program interfaces, which provide direct control via peripheral devices on the application level in UNIX, Novell, and Windows 9x/NT/2000/XP, are considered, as is how to read and write RAW sectors.
