The Checklist Manifesto Atul Gawande, 2010-04-01 The New York Times bestselling author of *Being Mortal* and *Complications* reveals the surprising power of the ordinary checklist. We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

The Checklist Book Alexandra Franzen, 2020-01-14 Master both major and minor tasks—by going back to the basics and writing out a simple checklist. It will change your life. The checklist is one of the world's oldest—and most effective—productivity systems. If anything, says entrepreneur Alexandra Franzen, it is just as valuable now as it was during the days of the Roman Empire, allowing us to tangibly plan our day and set in stone what we want to accomplish. There are countless apps and organizational systems promising to help us straighten out our lives, but often they only add to the madness and leave us feeling drained and overwhelmed. Learn how to: · Choose your highest priorities · Set realistic goals · Celebrate tiny wins · Feel calmer every day By physically writing down our tasks on a single piece of paper, we force ourselves to be realistic and limit how much we can do in a day. Too often, we cram our day with tasks and chores and leave almost no space for self-care or time with loved ones. We end up disappointed in our inability to complete our never-ending to-do list. Checklists help you accomplish what needs to be done—and enjoy things you want to be doing, too. “There are thousands of books on how to become more organized and productive, but very few have the heart, soul, humor, and gentle encouragement of this book.” —Ellen Fondiler, career and business strategist

Checklist for Change Robert Zemsky, 2013-08-20 Almost every day American higher education is making news with a list of problems that includes the incoherent nature of the curriculum, the resistance of the faculty to change, and the influential role of the federal government both through major investments in student aid and intrusive policies. *Checklist for Change* not only diagnoses these problems, but also provides constructive recommendations for practical change. Robert Zemsky details the complications that have impeded every credible reform intended to change American higher education. He demythologizes such initiatives as the Morrill Act, the GI Bill, and the Higher Education Act of 1972, shedding new light on their origins and the ways they have shaped higher education in unanticipated and not commonly understood ways. Next, he addresses overly simplistic arguments about the causes of the problems we face and builds a convincing argument that well-intentioned actions have combined to create the current mess for which everyone is to blame. Using provocative case studies, Zemsky describes the reforms being implemented at a few institutions with the hope that these might serve as harbingers of the kinds of change needed: the University of Minnesota at Rochester's compact curriculum in the health sciences only, Whittier College's emphasis on learning outcomes, and the University of Wisconsin Oshkosh's coherent overall curriculum. In conclusion, Zemsky describes the principal changes that must occur not singly but in combination. These include a fundamental recasting of federal financial aid; new mechanisms for better channeling the competition among colleges and universities; recasting the undergraduate curriculum; and a stronger, more collective faculty voice in governance that defines not why, but how the enterprise must change.

Beyond the Checklist Suzanne Gordon, Patrick Mendenhall, Bonnie Blair O'Connor, 2012-11-20 The U.S. healthcare system is now spending many millions of dollars to improve patient safety and inter-professional practice. Nevertheless, an estimated 100,000 patients still succumb to preventable medical errors or infections every year. How can health care providers reduce the terrible financial and human toll of medical errors and injuries that harm rather than heal? Beyond the Checklist argues that lives could be saved and patient care enhanced by adapting the relevant lessons of aviation safety and teamwork. In response to a series of human-error caused crashes, the airline industry developed the system of job training and information sharing known as Crew Resource Management (CRM). Under the new industry-wide system of CRM, pilots, flight attendants, and ground crews now communicate and cooperate in ways that have greatly reduced the hazards of commercial air travel. The coauthors of this book sought out the aviation professionals who made this transformation possible. Beyond the Checklist gives us an inside look at CRM training and

shows how airline staff interaction that once suffered from the same dysfunction that too often undermines real teamwork in health care today has dramatically improved. Drawing on the experience of doctors, nurses, medical educators, and administrators, this book demonstrates how CRM can be adapted, more widely and effectively, to health care delivery. The authors provide case studies of three institutions that have successfully incorporated CRM-like principles into the fabric of their clinical culture by embracing practices that promote common patient safety knowledge and skills. They infuse this study with their own diverse experience and collaborative spirit: Patrick Mendenhall is a commercial airline pilot who teaches CRM; Suzanne Gordon is a nationally known health care journalist, training consultant, and speaker on issues related to nursing; and Bonnie Blair O'Connor is an ethnographer and medical educator who has spent more than two decades observing medical training and teamwork from the inside.

In *The Leader's Checklist, 10th Anniversary Edition: 16 Mission-Critical Principles*, world-renowned leadership expert and Wharton professor Michael Useem shows you how to lead through any challenge—and shares how ITT's Denise Ramos did just that when she encountered this situation. Based on Useem's own research experience and an array of leadership investigators, thinkers, and practitioners, *The Leader's Checklist* offers actionable insights you can put into practice as a leader today.
