Exploring Newspaper Language Gisle Andersen, 2012-03-23 This book describes new methodological and technological approaches to corpus building and presents recent research based on the Norwegian Newspaper Corpus. This is a large monitor corpus of contemporary Norwegian language, compiled through daily harvesting of web newspapers. The book gives an overview of the corpus and its system architecture, and presents tools used for tasks such as text harvesting, annotation, topic classification and extraction and frequency profiling of new words and phrases. Among the innovative technologies is Corpuscle, a corpus query engine and management system which is flexible enough to handle very large corpora in an efficient way. The individual research contributions based on the corpus explore different aspects of Norwegian, including the occurrence of anglicisms, neologisms and terminology, and the use of metonymy and metaphor in newspaper language. The book also describes an innovative method of applying correspondence analysis and implicational analysis to investigate interdependencies between morphosyntactic variants.

Sexual Abuse, Shonda and Concealment in Orthodox Jewish Communities Michael Leshner, 2014-07-15 This book—the

first of its kind—analyzes how and why cases of child sexual abuse have been systematically concealed in Orthodox Jewish communities. The book examines many such cover-ups in detail, showing how denial, backlash against victims, and the manipulation of the secular justice system have placed Orthodox Jewish community leaders in the position of defending or even enabling child abusers. The book also examines the generally disappointing treatment of this issue in popular media, while dissecting the institutions that contribute to the cover-ups, including two—rabbinic courts and local Orthodox “patrols”—that are more or less unique to Orthodox Jewish communities. Finally, the book explores the cultural factors that have contributed to this tragedy, and concludes with hopes and proposals for future reform.

Bobby Fischer's Games of Chess Bobby Fischer,2008 This is the only book ever written entirely by Bobby Fischer. It is not to be confused with other books with similar names that were written by other authors. Here is the blurb on the original dust jacket, as published in 1959: THERE ARE 34 games in this book. The 13 from the U.S. Championship Tournament of 1957-58 and the prize-winning Game of the Century from the Third Rosenwald Trophy Tournament are penetratingly analyzed by Bobby Fischer, whose annotations provide invaluable instructions to the chess player of either average or advanced ability. In addition, this book includes the scores of Bobby Fischer's 20 games from the 1958 Portoroz Interzonal Tournament in which he played against the world's elite in chess, among them Tal, Gligorich, Petrosyan, and Bronstein. The games in this book reveal Bobby Fischer's brilliance in middle and end-game strategy, and also the latest and soundest treatments of popular openings—in particular, the Sicilian and King's Indian defenses. By playing these games over, the reader will become familiar with the patterns of the latest and soundest lines in chess, and will automatically begin to make stronger moves in his own games. At the age of fifteen, Bobby Fischer was the youngest international grandmaster of all time. He lives in Brooklyn, was a junior at Erasmus Hall High School, and looking forward to the 1959 Candidates' Tournament, the winner of which challenges Mikhail Botvinnik for the world championship.
