Windows PCs in the Ministry Steve Hewitt, 2010-02-21 Use your Windows computer to its full potential in your ministry! Church leaders know that ministry demands time, energy, creativity, passion, and commitment. Windows PCs in the Ministry helps instruct time-constrained ministers to better and more efficiently use a tool you already have: your computer. The book provides tips and direction on: Preparing your sermons with online tools and Bible software. Creating presentations and accompanying visuals with multimedia tools. Publishing your sermons and blogs online and on DVDs. Connecting with your congregants and other colleagues in ministry. Using Social Networking, such as Twitter, for more dynamic community outreach. The ministry of the church has not changed over the centuries, but the methods and tools to accomplish ministry have. Windows PCs in the Ministry shows readers how to harness the programs they already have while making recommendations on new resources, helping church leaders in nearly every aspect of their ministries.

40 Days and 40 Bytes Aaron Spiegel, Nancy Armstrong, Brent Bill, 2004-06-01 Today we are awash in computerized Bible games, pastoral care software, and church management systems with members' personal information and giving records, observe authors Spiegel, Armstrong, and Bill, but too often we blindly accept and use technology without asking the big questions. Questions like, is it appropriate to our mission and ministry? *40 Days and 40 Bytes* will help your congregation explore technology so you can decide, from a ministry and culture standpoint, what you need to do. The goal: godly service—not technological glitz. The authors are uniquely qualified to help you think about the role of technology in your congregation. All three are staff members with the Indianapolis Center for Congregations, which launched the innovative Computers and Ministry Grants Initiative in 1998 to help congregations address the challenges they face when using computer technology in their ministries. In this book, they share what they have learned in their work with 102 congregations. There's no question your congregation is going to use computer technology. The only question is, How? *40 Days and 40 Bytes* will help you design technology that fits your ministry and mission.

Open Source Church Landon Rev. Whitsitt, Author, 2011-04-08 Open source software makes the basic program instructions available for anyone to see and edit. An 'open source church,' likewise, is one in which the basic functions of mission and ministry are open to anyone. Members feel free to pursue their callings from God that are consistent with what God has called the congregation to be and do. But what does 'open source church' look like? In *Open Source Church: Making Room for the Wisdom of All*, Landon Whitsitt argues that Wikipedia, the encyclopedia that anyone can see and edit, might be the

most instructive model available to help congregations develop leaders and structures that can meet the challenges presented by our changing world. Its success depends, he demonstrates, not on the views of select experts but on the collective wisdom of crowds. Then, turning to the work of James Surowiecki in *The Wisdom of Crowds*, he explores the idea that the body of Christ itself--when it is intentionally diverse, encourages independence of thought, values decentralization, and effectively captures and aggregates the group's collective wisdom--is an open source church. Together, these phenomena show us what an 'open source church' looks like. It is the body of Christ at its best.

Church Connection Cards, connect with visitors, grow your church, pastor your people Yvon Prehn,2011

New Tools for a New Century John P. Jewell,2002 Churches know that if they are to reach people raised in an electronic culture, they must use the tools that this culture makes available. For people accustomed to checking their e-mail hourly, surfing the Internet daily, and receiving most if not all of their information through electronic media, our customary reliance on the printed page and the spoken word will no longer be good enough. Yet, recognizing this, where do you start? How does a congregation with little or no experience in the daunting world of the Web, projection technology, and computer presentations begin? Faced with too many choices and too little prior knowledge, congregations are opting not to use the new tools that electronic culture makes available, hence bypassing opportunities to spread the gospel and make disciples. John Jewell studies the issue confronting most congregations: the crucial question of knowing the appropriate ways to begin to use the new electronic media. In this helpful and practical guide, he offers simple incremental steps that churches can take to expand their ministries through electronic media. He outlines basic tools that are required to set up the congregational web page, focusing on software and designs that those with little or no experience in Web artistry can employ. He reviews different kinds of projection systems, understanding that most church budgets are not capable of purchasing the largest, most state-of the art equipment to start with. He explains how PowerPoint [MicroSoft trademark] and other presentation software can greatly enhance and extend the teaching and preaching ministry of the church, laying down fundamental principles for clean, simple, effective presentations. Animating all of the author's discussion is his concern that people start where they are, rather than insisting on an 'all or nothing' approach.

The interest in open source software development has grown enormously in the past year. This revised and expanded paperback edition includes new material on open source developments in 1999 and 2000.
