**Indiana University Cinema** Brittany D. Friesner, Jon Vickers, 2021-09-07 In its first ten years, a small Midwestern cinema has attracted some of the most intriguing and groundbreaking filmmakers from around the world, screened the best in arthouse and repertory films, and presented innovative and unique cinematic experiences. **The British Cinema Book** Robert Murphy, 2001 No Marketing Blurb

**The Cinema of Isolation** Martin F. Norden, 1994 Filmmakers have often encouraged us to regard people with physical disabilities in terms of pity, awe, humor, or fear as Others who somehow deserve to be isolated from the rest of society. In this first history of the portrayal of physical disability in the movies, Martin Norden examines hundreds of Hollywood movies (and notable international ones), finds their place within mainstream society, and uncovers the movie industry's practices for maintaining the status quo keeping people with disabilities dependent and in their place. Norden offers a dazzling array of physically disabled characters who embody or break out of the stereotypes that have both influenced and been symptomatic of society's fluctuating relationship with its physically disabled minority. He shows us sweet innocents like Tiny Tim, obsessive avengers like Quasimodo, variations on the disabled veteran, and many others. He observes the arrival of a new set of stereotypes tied to the growth of science and technology in the 1970s and 1980s, and underscores movies like *My Left Foot* and *The Waterdance* that display a newfound sensitivity. Norden's

in-depth knowledge of disability history makes for a particularly intelligent and sensitive approach to this long-overlooked issue in media studies.

*Cinema and the Invention of Modern Life* Leo Charney, Vanessa R. Schwartz, 1995 This is one of the finest, freshest, and most suggestive anthologies I've come across in recent years.—Stuart Liebman, City University of New York Graduate Center

Everything Is Cinema Richard Brody, 2008-05-13 When Jean-Luc Godard, exemplary director of the French New Wave, wed the ideals of filmmaking to the realities of autobiography and current events, he changed the nature of cinema. Among the greatest cinematic innovations, Godard's films shift fluidly from fiction to documentary, from criticism to art. Similarly, his persona projects shifting images - cultural hero, impassioned loner, shrewd businessman. Hailed by filmmakers as a - if not the - key influence, Godard has entered the modern canon, a figure as mysterious as he is indispensable. In *Everything is Cinema*, critic Richard Brody has amassed hundreds of interviews with friends, family, and collaborators to demystify the elusive director and paint the fullest picture yet of his life and work. Paying as much attention to Godard's revolutionary technical inventions as to the political and emotional forces of the postwar world, Brody traces an arc from the director's early critical writing, through his popular success with *Breathless* and *Contempt*, to the grand vision of his later years. He vividly depicts Godard's wealthy, conservative family, his fluid and often disturbing politics, his tumultuous dealings with fellow filmmakers, and his troubled relations with women.-- Jacket.

**The End of Cinema as We Know it** Jon Lewis, 2002 In *The End of Cinema As We Know It*, contributors well known in the 'movie' field talk about the movie industry and look at the variety of new ways we are viewing films. They query whether or not we are getting different, better movies?

**The Birth of Whiteness** Daniel Bernardi, 1996 As indelible components of the history of the United States, race and racism have permeated nearly all aspects of life: cultural, economic, political, and social. In this first anthology on race in early cinema, fourteen scholars examine the origins, dynamics, and ramifications of racism and Eurocentrism and the resistance to both during the early years of American motion pictures. Any discussion of racial themes and practices in any arena inevitably begins with the definition of race. Is race an innate and biologically determined essence or is it a culturally constructed category? Is the question irrelevant? Perhaps race exists as an ever-changing historical and social formation that, regardless of any standard definition, involves exploitation, degradation, and struggle. In his introduction, Daniel Bernardi writes that early cinema has been a clear partner in the hegemonic struggle over the meaning of race and that it was steadfastly aligned with a Eurocentric world view at the expense of those who didn't count as white. The contributors to this work tackle these problems and address such subjects as biological determinism, miscegenation, Manifest Destiny, assimilation, and nativism and their impact on early cinema. Analyses of *The Birth of a Nation*, *Romona*, *Nanook of the North* and *Madame Butterfly* and the directorial styles of D. W. Griffith, Oscar Micheaux, and Edwin Porter are included in the volume.

**The Phantom of the Cinema** Lloyd Michaels, 1998-01-01 The first book to focus on the representation of character in film, encompassing the art cinema, popular movies, and documentaries.

**Essential Cinema** Jonathan Rosenbaum, 2004-04-27 A cogent and provocative argument about the art of film, *Essential Cinema* is a fiercely independent reference book of must-see movies for film lovers everywhere.

Mexican National Cinema Andrea Noble, 2005 Examining key film texts and genres, and set in a broad historical and theoretical context, this student-friendly study provides a thorough and detailed account of the vital and complex relationship between cinema and national identity in Mexico.

*French Cinema* R mi Fournier Lanzoni, R mi Fournier-Lanzoni, 2015-10-22 An all-encompassing history of French motion pictures and cinematographic trends chronologically from 1895 to the present--

The Cinema of Richard Linklater Rob Stone, 2013-05-01 From *Slacker* (1991) to *The School of Rock* (2003), from *Before Sunrise* (1995) to *Before Sunset* (2004), from the walking and talking of his no/low-budget American independent films to conversing with the philosophical traditions of the European art house, Richard Linklater's films are some of the most critical, political, and spiritual achievements of contemporary world cinema. Examinations of Linklater's collaborative working practices and deployment of rotoscoping and innovative distribution strategies all feature in this book, which aspires to walk and talk with the filmmaker and his films. Informed by a series of original interviews with the artist, in both his hometown and frequent film location of Austin, Texas, this study of the director who made *Dazed and Confused* (1993), *A Scanner Darkly* (2006), and *Bernie* (2011) explores the theoretical, practical, contextual, and metaphysical elements of these works along with his documentaries and side-projects and finds fanciful lives and lucid dreams have as much to do with his work as generally alternative notions of America, contemporary society, cinema, and time. 

*Contemporary Hollywood Cinema* Stephen Neale, Murray Smith, 1998 A comprehensive overview of the film industry in Hollywood today, *Contemporary Hollywood Cinema* brings together leading international cinema scholars to explore the technology, institutions, film makers and movies of contemporary American film making.

**A Place of Darkness** Kendall R. Phillips, 2018-03-01 Horror is one of the most enduringly popular genres in cinema. The term "horror film" was coined in 1931 between the premiere of *Dracula* and the release of *Frankenstein*, but monsters, ghosts, demons, and supernatural and horrific themes have been popular with American audiences since the emergence of novelty cinematographic attractions in the late 1890s. *A Place of Darkness* illuminates the prehistory of the horror genre by tracing the way horrific elements and stories were portrayed in films prior to the introduction of the term "horror film." Using a rhetorical approach that examines not only early films but also the promotional materials for them and critical responses to them, Kendall R. Phillips argues that the portrayal of horrific elements was enmeshed in broader social tensions around the emergence of American identity and, in turn, American cinema. He shows how early cinema linked monsters, ghosts, witches, and magicians with Old World superstitions and beliefs, in contrast to an American way of thinking that was pragmatic, reasonable, scientific, and progressive. Throughout the teens and twenties, Phillips finds, supernatural elements were almost always explained away as some hysterical mistake, humorous prank, or nefarious plot. The Great Depression of the 1930s, however, constituted a substantial upheaval in the system of American certainty and opened a space for the reemergence of Old World gothic within American popular discourse in the form of the horror genre, which has terrified and thrilled fans ever since.
