**European Drug Index** Niels F. Muller, Rudolf P. Dessing, 2022-03-07 Many health care providers are frequently dealing with problems related to the identification and interpretation of medicines and prescriptions of foreign origin. Health authorities, customs and travel agencies also encounter such problems, which are related to the increasing mobility of the European population. Thus the need for a European Drug Index is obvious. The EDI provides extended information for practitioners confronted with the enormous number of drug names available on the European pharmaceutical market. This market is increasing due to the rapidly changing palette of countries and economic restrictions in Europe. The listings have been derived from drug data sources from the increased number of participating countries in this second edition. Each item starts with a trade name, in alphabetical order, followed by (depending on the original source) dosage forms, strength, volume (if applicable), and generic name(s) of the active principle(s) in a random sequence. The item is concluded by the Anatomical Therapeutic Chemical (ATC) classification (when made available by the original source) and a code for the country of origin.

**Advances in Water Resources & Hydraulic Engineering** Changkuan Zhang, Hongwu Tang, 2010-07-28 Advances in Water Resources and Hydraulic Engineering - Proceedings of 16th IAHR-APD Congress and 3rd Symposium of IAHR-ISHS discusses some serious problems of sustainable development of human society related to water resources, disaster caused by flooding or draught, environment and ecology, and introduces latest research in river engineering and fluvial processes, estuarine and coastal hydraulics, hydraulic structures and hydropower hydraulics, etc. The proceedings covers new research achievements in the Asian-Pacific region in water resources, environmental ecology, river and coastal engineering, which are especially important for developing countries all over the world. This proceedings serves as a reference for researchers in the field of water resources, water quality, water pollution and water ecology. Changkuan Zhang and Hongwu Tang both are professors at Hohai University, China.

**The Season of Glass** Rahla Xenopoulos, 2018-05-01 Somewhere in her body she retained every story ever told. She knew every life that had been lived and every life yet to be born. There exists a prophesy as old as history itself: in times of darkness a pair of twins will be born, a gift to humankind that will save us from ourselves. Whether in ancient Ethiopia, where a warrior queen rises; aboard buccaneer Black Caesar's pirate ship sailing for Jamaica at the time of the Spanish Inquisition; or in a banker's opulent mansion in Austria on the eve of World War II, the twins, and their aides and enemies, must face a common destiny. The Season of Glass is a modern Scheherazade's tale about these siblings' travels at pivotal moments: to a marbled city in sixteenth-century India, through dangerous Johannesburg streets in the seventies, and even to the distant future. A shimmering novel, it is a kaleidoscope that works with light and shows us hope.

**The Last Kabbalist of Lisbon** Richard Zimler, 2000-03-15 International Bestseller: "A moody, tightly constructed historical thriller . . . a good mystery story and an effective evocation of a faraway time and place." -The New York Times After Jews living in sixteenth-century Portugal are dragged to the baptismal font and forced to convert to Christianity, many of these New Christians persevere in their Jewish prayers and rituals in secret and at great risk; the hidden, arcane practices of the kabbalists, a mystical sect of Jews, continue as well. One such secret Jew is Berekiah Zarco, an intelligent young manuscript illuminator. Inflamed by love and revenge, he searches, in the crucible of the raging pogrom, for the killer of his beloved uncle Abraham, a renowned kabbalist, discovered murdered in a hidden synagogue along with a young girl in dishabille. Risking his life in streets seething with mayhem, Berekiah tracks down answers among Christians, New Christians, Jews, and the fellow kabbalists of his uncle, whose secret language and codes by turns light and obscure the way to the truth he seeks. A marvelous story, a challenging mystery, and a telling tale of the evils of intolerance, The Last Kabbalist of Lisbon both compels and entertains. "The story moves quickly . . . a literary and historical treat." -Library Journal "Remarkable . . . The fever pitch of intensity Zimler maintains is at times overwhelming but never less than appropriate to the Hieronymous Bosch-like landscape he describes. Simultaneously, though, he is able to capture, within the bedlam, quiet moments of tenderness and love." -Booklist (starred review)

**Understanding Analysis** Stephen Abbott, 2010-12 This elementary presentation exposes readers to both the process of rigor and the rewards inherent in taking an axiomatic approach to the study of functions of a real variable. The aim is to challenge and improve mathematical intuition rather than to verify it. The philosophy of this book is to focus attention on questions which give analysis its inherent fascination. Each chapter begins with the discussion of some motivating examples and concludes with a series of questions.

**The Report: Dubai 2014** Oxford Business Group, 2014-01-28 In many respects 2014 marked the transition from strong recovery to promising growth for Dubai. With many exciting projects in the pipeline, not least the hosting of Expo 2020, the emirate is continuing to build on its reputation as a dynamic and international centre for business. Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. The continued development of Dubai's retail and hospitality offerings, alongside the upgrades to its airports, should help to ensure robust growth in visitor numbers from both the region and further afield.

It offers up-to-date information on drugs and medicines that are used throughout the world. It is written for practising pharmacists and physicians and for all those involved in the field of drugs and medicines.

**Bosque** Lola Llatas, 2021-07-01 ¿Quién puede salir del bosque? Hay que estar loco o maldito para adentrarse en el bosque. Candena, una bruja atrapada en su inhóspita oscuridad, lo sabe bien. Incapaz de burlar a los demonios que lo gobiernan, vendió al diablo su única esperanza de ser libre. Ahora, la bruja vive presa de su propio error junto a su estirpe. La familia ha sobrevivido por años aislada, jugando con la magia más tenebrosa, sin saber que no es la espesura que los rodea, sino lo que aguarda más allá, lo que amenazará con destruirlos. Lola Llatas nos sorprende con una novela de locura, celos y muerte, cuya prosa se estrangula salvaje entre atroces aquelarres,

profanadores de tumbas y almas atormentadas que acechan para caer sobre cualquier incauto que ose adentrarse en la maleza.

**Patents as an Incentive for Innovation** Rafal Sikorski, Żaneta Zemła-Pacud, 2021-02-16 Patents as an Incentive for Innovation Edited by Rafal Sikorski & Zaneta Zemla-Pacud Patents are a reward for human inventiveness. A well-functioning patent system must provide incentives for innovation, safeguard dynamic competition and protect the public interest – a balancing act fraught with difficulty in the ‘connected’ global world. This ground-breaking book is the first to deeply analyse how patent law today performs its function of stimulating innovation in the crucial sectors of healthcare, agriculture, artificial intelligence and communications technology. Patent specialists, practitioners and scholars from various jurisdictions thoroughly describe how patent rights can be deployed to incentivize investments in researching and developing socially critical innovations without sacrificing the public’s interest in sharing the benefits that are produced. Among the emerging issues of patent rights investigated are the following: protectability and morality of according private rights over material derived from the human body; licensing on fair, reasonable and non-discriminatory (FRAND) terms; the supplementary protection certificate (SPC) manufacturing waiver; patent eligibility of artificial intelligence-related inventions; excessive enforcement of patents by patent assertion entities; enforcement of second medical use innovations; the so-called farmer’s privilege, the farm-save seed exemption, and breeders’ rights; international trade regulations and their influence on patent systems; human enhancement technologies and the consequences of patenting them; specifics of patent protection for biologic medicines; challenges posed by artificial intelligence for the disclosure requirement in patent law; and standard essential patent licensing, particularly in the context of the 5G standard. Perspectives taken into consideration by the authors include protectability criteria, length and scope of the granted protection, mechanisms for dealing with the friction between generalized application and specialized concerns, and rights enforcement. These aspects are analysed on the domestic, international and global levels. The COVID-19 pandemic has highlighted the urgent need to strike the right balance between innovation and access in healthcare and other technologies, a need rooted in patent law. Because the problems discussed – and solutions offered – in this collection of expert essays are of tremendous practical and cultural significance, the book will be of immeasurable value to practitioners, policymakers and researchers in patent law and other fields of intellectual property law.

**Innovation in Pharmacy: Advances and Perspectives. September 2018** Organizer Committee IPAP18 – Salamanca, 2018-09-21 This book contains the summaries of the Innovation in Pharmacy: Advances and Perspectives that took place in Salamanca (Spain) in September 2018. The early science of chemistry and microbiology were the source of most drugs until the revolution of genetic engineering in the mid 1970s. Then biotechnology made available novel protein agents such as interferons, blood factors and monoclonal antibodies that have changed the modern pharmacy. Over the past year, a new pharmacy of oligonucleotides has emerged from the science of gene expression such as RNA splicing and RNA interference. The ability to design therapeutic agents from genomic sequences will transform treatment for many diseases. The science that created this advance and its future promise will be discussed. Phillip Allen Sharp is an American geneticist and molecular biologist who co-discovered RNA splicing. He shared the 1993 Nobel Prize in Physiology or Medicine with Richard J. Roberts for “the discovery that genes in eukaryotes are not contiguous strings but contain introns, and that the splicing of messenger RNA to delete those introns can occur in different ways, yielding different proteins from the same DNA sequence. He works in Institute Professor Koch Institute for Integrative Cancer Research, Massachusetts Institute of Technology (MIT), Cambridge, MA, US. Este libro recoge los resúmenes de la «Innovation in Pharmacy: Advances and Perspectives» que tuvo lugar en Salamanca (España) en septiembre de 2018. La ciencia primitiva de la química y la microbiología fue la fuente de la mayoría de las drogas hasta la revolución de la ingeniería genética a mediados de la década de 1970. Luego, la biotecnología puso a disposición agentes proteínicos novedosos como interferones, factores sanguíneos y anticuerpos monoclonales que han cambiado la farmacia moderna. Durante el año pasado, surgió una nueva farmacia de oligonucleótidos a partir de la ciencia de la expresión génica, como el empalme de ARN y la interferencia de ARN. La capacidad de diseñar agentes terapéuticos a partir de secuencias genómicas transformará el tratamiento de muchas enfermedades. La ciencia que creó este avance y su promesa futura será discutida. Phillip Allen Sharp es un genetista y biólogo molecular estadounidense que co-descubrió el empalme de ARN. Compartió el Premio Nobel de 1993 en Fisiología o Medicina con Richard J. Roberts por el descubrimiento de que los genes en eucariotas no son cadenas contiguas, sino que contienen intrones, y que el empalme del ARN mensajero para eliminar esos intrones puede ocurrir de diferentes maneras, produciendo diferentes proteínas de la misma secuencia de ADN. Trabaja en el Instituto Profesor Koch Institute for Integrative Cancer Research, Instituto Tecnológico de Massachusetts (MIT), Cambridge, MA, EE. UU.

Index Nominum 2000 ,2000 For 40 years, the Index Nominum has been the indispensable standard reference work on medications, brand names, synonyms, chemical structures, and therapeutic classes of substances, providing orientation in the international pharmaceutical market. This Seventeenth Edition has been completely revised, restructured, and given a new layout. It now includes each active substance's German, French, Spanish, and Latin names, anatomical therapeutic chemical classification (ATC) code, and molecular mass. With its clear layout, visual aids, and easily searchable information, the Index Nominum 2000 provides all the essentials at your fingertips.

*La promoción de medicamentos dirigida a profesionales sanitarios* García Vidal, Ángel, 2013-01-01 La promoción de los medicamentos por parte de los laboratorios farmacéuticos tiene como destinatarios principales a los profesionales que pueden prescribirlos y dispensarlos. Esta actividad promocional ha dado lugar a una amplia y compleja normativa reguladora tanto en el ámbito de la Unión Europea como en los ordenamientos de los Estados miembros, además de a un extenso conjunto de disposiciones de autorregulación aprobadas por la propia industria farmacéutica. La presente obra tiene por objeto el estudio de toda esta normativa, en relación con los

medicamentos de uso humano, y desde el punto de vista del Derecho mercantil. Tras identificar la normativa publicitaria especial en materia de promoción de medicamentos, se examina el ámbito de aplicación de esta normativa, para lo cual se delimitan los conceptos de medicamento y de publicidad, así como la figura de los profesionales sanitarios facultados para prescribir y dispensar medicamentos. Acto seguido, se analiza con detenimiento la prohibición de hacer publicidad de medicamentos que no hayan obtenido la autorización de comercialización, las consecuencias del principio de objetividad y la prohibición de publicidad engañosa. Posteriormente, se examina la obligación de incluir información sobre los fármacos promocionados, el uso de informes y estudios científicos en la publicidad, la publicidad por medio de visitantes y la prohibición de promocionar medicamentos por medio de incentivos, primas y ventajas. En el estudio de todos estos problemas –de innegable trascendencia práctica– el autor realiza un exhaustivo análisis de la jurisprudencia comunitaria, nacional y comparada, así como de las resoluciones del Jurado de Autocontrol.
