You'll especially find help with editing logins. For example, if you change a site's password from dragon7 to eatsevendragonsforlunchatyahoo, you'll want to incorporate that into its login. Or, use 1Password's password generator to create highly secure random passwords, like dGx7Crve3WucELF#s. Understand password security: Get guidance on what makes for a good password, and read Joe's important Password Dos and Don'ts. A special topic covers how to perform a security audit in order to improve poor passwords quickly. Go beyond Web logins: A primary point of 1Password is to speed up Web logins, but 1Password can also store and autofill contact information (for more than one identity, even), along with credit card information. You'll also discover the answers to key questions, including: Should I use my Web browser's autofill feature? What about iCloud Keychain? Should I use that too? What can I do quickly to get better password security? Should I buy 1Password from AgileBits or the Mac App Store? How can I find and update weak passwords I created long ago? What's the best way to work with the password generator? What should I do about security questions, like the name of my pet? How can 1Password provide a time-based one-time password (TOTP)? How can I access my 1Password data on another person's computer? How do I initiate 1Password logins from utilities like LaunchBar?
