Digital Culture & Society (DCS) Ramón Reichert,Annika Richterich,Pablo Abend,Mathias Fuchs,Karin Wenz,2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

Learner Choice, Learner Voice Ryan L Schaaf,Becky Zayas,Ian Jukes,2022-06-15 Learner Choice, Learner Voice offers fresh, forward-thinking supports for teachers creating an empowered, student-centered classroom. Learner agency is a major topic in today's schools, but what does it mean in practice, and how do these practices give students skills and opportunities they will need to thrive as citizens, parents, and workers in our ever-shifting climate? Showcasing authentic activities and classrooms, this book is full of diverse instructional experiences that will motivate your students to take an agile, adaptable role in their own learning. This wealth of pedagogical ideas – from specific to open-ended, low-tech to digital, self-expressive to collaborative, creative to critical – will help you discover the transformative effects of providing students with ownership, agency, and choice in their learning journeys.

Art-Based Research in the Context of a Global Pandemic Usva Seregina,Astrid Van den Bossche,2022-09-30 Living through the Covid-19 global pandemic has changed the way that we experience our lives, the way that we relate to one-another, and the way that we engage with the world. Focusing contextually on the initial lockdowns of the pandemic in 2020, this book proposes that art-based research has a central, illuminative role to play in our understanding of unfolding crises. The changes brought on by the global event may not be readily accessible or expressible through traditional academic research. Art-based research offers the opportunity to explore, document, and reflect on the emerging and often ineffable qualities of transformed lives by drawing on emotional, bodily, and interactive aspects of experience. Such an approach allows for meaning-making that makes room for reflexive, interpersonal, and dialogical engagement. The contributions aim to capture and explore lived experiences of the pandemic, as well as begin a discussion about how meaning-making is changing through and beyond the pandemic. This book further explores how the nature and practice of art-based research in itself has been challenged and transformed. The book will be of interest to scholars working in art education, art psychotherapy, consumer research, visual studies, cultural studies, and sociology.

Practical HTML5 Projects Adrian W. West,2012-07-13 Practical HTML5 Projects is a collection of valuable web techniques that any developer or designer can use. This book is all about saving time. Busy web developers should not have to plow through pages of theory or history only to discover that no practical applications are provided, nor should they have to read a paragraph five times to extract some meaning from it. All of the techniques within this book are explained using fully worked examples that you can immediately apply to your own projects. With each technique the book provides: A practical and useful example (and a screen shot of the end result where applicable). The markup for a fully worked example. A downloadable template to adapt for use in your own websites. With Practical HTML5 Projects, you can dive straight into the book at the required chapter and immediately find answers to your website problems, and find the sample code you can use to get it right. Start creating websites using the practical examples, summaries, and templates. This book includes topics such as rollover navigation menus without scripts, adding audio and video, rounded corners, drop shadows, adding PayPal services, and much more. It also includes sections on troubleshooting and transitioning to HTML5 and CSS3 to help bring your existing content up to date.

Mobile Learning Shaun Wilden,2017-09-04 Into the Classroom is a series of short, practical guides that help teachers who work in the primary and secondary school setting to make sense of new teaching tools, techniques, and educational policy, with ideas for implementing them in the classroom.

Mobile Learning provides clear guidance and essential support for teachers who want to use mobile devices in and outside the language classroom. Full of practical ideas and activities, it emphasizes the power of the mobile device as a tool for language learning. Mobile Learning: • helps teachers get started with using mobile devices and apps in class. • shows how to make the most of in-built features, such as messaging, photos, and audio recording. • introduces more advanced project ideas, including digital storytelling, video and animation, multimodal approaches, and augmented reality. • addresses issues such as acceptable use policies and staying safe. • provides teachers with dozens of practical ideas and activities they can immediately incorporate into their teaching. Shaun Wilden is a teacher, teacher trainer, and materials writer who has been helping teachers integrate technology into their teaching for over a decade. His main areas of interest are mobile devices, online teaching, and creating podcasts.

Efficient Management of Large Metadata Catalogs in a Ubiquitous Computing Environment Daniel Beatty,2019-04-29 Trends in experimental sciences, such as astrophysics, have led to many critically needed, non-normalized, and massive metadata catalogs that organize collections of recorded photographic and spectrographic observations of similar size. Observations of the night sky can best be presented using a data model that conveys the observations, analysis, objects contained with the observations, and results of analysis pertaining to those objects. Such a model is proposed, and it is referred to as the internet Flexible Image Transport System (iFITS). In addition, a set of mapping functions to transform instances of the Sloan Digital Sky Survey into instances of iFITS, a lightweight marshaling method to transfer data to and from server side instances to mobile instances. Furthermore, this dissertation explores four architectures such as content management, software/ infrastructure/ platform as a service, context rule engine-based request-response loop factory, and representational state transfer (REST)-based query engines to facilitate the mining of the metadata catalogs containing these observations.

Using Images to Teach Critical Thinking Skills Diane M. Cordell,2015-11-10 Learn how to teach visual literacy through photography—an easy way for you to combine student interest with resources at hand to enhance a key learning skill. Research indicates that 75 to 90 percent of classroom learning occurs through the visual system, making visual literacy a key component of information literacy and of critical thinking—a requirement throughout the Common Core standards. It's no surprise then that visual literacy is increasingly recognized as a competency that should be part of every student's skill set. Fortunately, this critical skill can be incorporated into existing curriculum, and this book shows you how to do just that. Written for K-12 classroom teachers and librarians, this all-you-need-to-know volume discusses the importance of visual literacy in education and examines how it helps address current learning standards. The book shows you how to use photography and digital images to cultivate critical thinking, inquiry, and information literacy; provides examples of the use of photographic images in the classroom and in real life; and addresses how students can be ethical practitioners in a digital world. In addition, the book includes sample lessons you can easily implement, regardless of your level of technical and photographic expertise. A resource list of photo editing, curation, and museum sites is included.

Earmarked for Collision Chris Robinson,2023-05-25 Collage art and film date back to the early 20th century (the earliest collages have roots in 12th-century Japan). It was rooted in the age of consumerism where artists addressed an array of political and social issues by creating a carefully crafted collision of pre-existing images and sounds to generate new meanings and commentaries on the surrounding world. Collage has also pushed the boundaries of animation, by incorporating other artistic forms (e.g., photography, live action, experimental cinema, literature, found sound) while exploring an array of social, cultural and political issues. In Earmarked for Collision, award-winning writer Chris Robinson (The Animation Pimp, Mad Eyed Misfits, Unsung Heroes of Animation) takes us on a tour of the history of collage animation, cataloguing the collage works of notable artists like Larry Jordan, Harry Smith, Stan Vanderbeek, Terry Gilliam, Janie Geiser, Martha Colburn, Lewis Klahr, Run Wrake, Lei Lei, Kelly Sears, Jodie Mack, and many, many others.
