Script Switching in Roman Egypt Edward O. D.

Love,2021-12-06 Script Switching in Roman Egypt studies the hieroglyphic, hieratic, demotic, and Old Coptic manuscripts which evidence the conventions governing script use, the domains of writing those scripts inhabited, and the shift of scripts between those domains, to elucidate the obsolescence of those scripts from their domains during the Roman Period. Utilising macro-level frameworks from sociolinguistics, the textual culture from four sites is contextualised within the priestly communities of speech, script, and practice that produced them. Utilising micro-level frameworks from linguistics, both the scripts of the Egyptian writing system written, and the way the orthographic methods fundamental to those scripts changed, are typologised. This study also treats the way in which morphographic and alphabetic orthographies are deciphered and understood by the reading brain, and how changes in spelling over time both resulted from and responded to dimensions of orthographic depth. Through a cross-cultural consideration of script obsolescence in Mesoamerica and Mesopotamia and by analogy to language death in speech communities, a model of domain-by-domain shift and obsolescence of the scripts of the Egyptian writing system is proposed.

Community, Seriality, and the State of the Nation: British and Irish Television Series in the 21st Century Caroline Lusin,Ralf Haekel,2019-02-18 Since the turn of the 21st century, the television series has rivalled cinema as the paradigmatic filmic medium. Like few other genres, it lends itself to exploring society in its different layers. In the case of Great Britain and Ireland, it functions as a key medium in depicting the state of the nation. Focussing on questions of genre, narrative form, and serialisation, this volume examines the variety of ways in which popular recent British and Irish television series negotiate the concept of community as a key component of the state of the nation.

The Role of Community in Restorative Justice Fernanda

Fonseca Rosenblatt,2015-04-17 Although restorative justice is probably one of the most talked about topics in contemporary criminology, little has been written about how community involvement in restorative justice translates into practice. While advocates have presented the community as an essential pillar of restorative justice, the rationale for why and how this is the case

remains underdeveloped and largely unchallenged. This book offers an empirical and theoretical explanation of what 'community involvement' means and what work it does in restorative justice. Drawing on an empirical case study and the wider sociological literature, *The Role of Community in Restorative Justice* examines the involvement of the community in one selected practice of restorative justice and also considers the implications of the English and Welsh experience for development of a more coherent framework for operationalizing community involvement in restorative justice practices. It is argued that restorative justice programmes need to start from a more concrete and up-to-date notion of community. While operationalizing community involvement, they need to acknowledge, all at once: the importance of place; the importance of family links, friendship and other social ties; and the importance of similar social traits and identities. This book is essential reading for students, researchers and academics in the fields of criminology, criminal justice, sociology, community studies, policy studies, social policy and socio-legal studies. This book will also be valuable reading for a variety of practitioners and policymakers, particularly working with restorative justice and youth justice.

Community and Identity at the Edges of the Classical World Aaron W. Irvin, 2020-09-28 A timely and academically-significant contribution to scholarship on community, identity, and globalization in the Roman and Hellenistic worlds *Community and Identity at the Edges of the Classical World* examines the

construction of personal and communal identities in the ancient world, exploring how globalism, multi-culturalism, and other macro events influenced micro identities throughout the Hellenistic and Roman empires. This innovative volume discusses where contact and the sharing of ideas was occurring in the time period, and applies modern theories based on networks and communication to historical and archaeological data. A new generation of international scholars challenge traditional views of Classical history and offer original perspectives on the impact globalizing trends had on localized areas—insights that resonate with similar issues today. This singular resource presents a broad, multi-national view rarely found in western collected volumes, including Serbian, Macedonian, and Russian scholarship on the Roman Empire, as well as on Roman and Hellenistic archaeological sites in Eastern Europe. Topics include Egyptian identity in the Hellenistic world, cultural identity in Roman Greece, Romanization in Slovenia, Balkan Latin, the provincial organization of cults in Roman Britain, and Soviet studies of Roman Empire and imperialism. Serving as a synthesis of contemporary scholarship on the wider topic of identity and community, this volume:

- Provides an expansive materialist approach to the topic of globalization in the Roman world
- Examines ethnicity in the Roman empire from the viewpoint of minority populations
- Offers several views of metascholarship, a growing sub-discipline that compares ancient material to modern scholarship
- Covers a range of themes, time periods, and geographic areas not included in most western publications

Community and Identity at the Edges of the Classical World is a valuable resource for academics, researchers, and graduate students examining identity and ethnicity in the ancient world, as well as for those working in multiple fields of study, from Classical, Hellenistic, and Roman historians, to the study of ethnicity, identity, and globalizing trends in time.

Community Computing Toru Ishida, 1998-11-30 Community Computing Collaboration Over Global Information Networks Edited by Toru Ishida Kyoto University, Japan With the success of network software suites, groupware has rapidly acquired a high level of commercial interest. Drawing together the various origins of this technology from distributed computing, communication networks, autonomous agents and multi-agent systems, this book opens an important new avenue of research into global collaboration systems for a wide variety of people. It also makes an interesting case study of human-computer interaction and the role of technologies in virtual communities. This book extends groupware for human communities. Conventional groupware typically supports the cooperative work of formally organized groups of people. The collaboration technologies introduced in this book, unlike conventional groupware, is designed to support the process of organizing people who are willing to share mutual understanding and experiences. Community Computing draws on the combined experience of leading industrial and academic researchers to present the following five stages of social interaction in human communities: Knowing each other by groundbreaking implementation of virtual spaces Sharing preference and knowledge by distributed computing over the Internet Generating consensus by network solutions for heterogeneous communities Supporting everyday life by autonomous agents and multi-agent technologies Assisting social events by intimate software on personal digital assistants Visit Our Web Page! <http://www.wiley.com/>

Little Theatre Organization and Management, for Community, University and School Alexander Dean, 1926

Education Reform and Social Change Catherine E.

Walsh, 2012-11-12 Education Reform and Social Change is about addressing and changing the structures, policies, and practices of schools that differentially advantage white, middle class, native English speakers over students of color for whom English may be a

second or additional language. It is also about helping people to think critically about what it is schools do and to consider more democratic, participatory, and equitable approaches. The chapters in the text provide first-hand documentation of the voices, struggles, and visions of students, parent activists, advocates, attorneys, and educators involved in educational and social change processes. It chronicles real-life efforts of people challenging the status quo and working to build a more participatory, equitable, and transformative future. The goal of this book is twofold: first, to consider the structures, policies, and practices that shape and limit educational change, and learning and teaching; and second, to document grassroots collaborative and creative efforts to change them. It offers a critical framework both for conceptualizing and for actualizing educational change. Organized into four sections, this book provides a theoretical and practical framework for thinking about educational reform and social change -- one that moves from the broader structural concerns that are embedded in policy, to case studies that document activism and collaborative efforts to change school, city, and state policies, to classroom-based directions and initiatives, and to the construction of personal and collective visions for a more democratic, equitable, and just education. Each section includes an overview of the chapters, necessary background information to help the reader contextualize what follows, and guiding questions to encourage reflective thought and engagement with the text and to invite personal linkages. Two resource sections are included at the end of the volume: Radical Educational Reform, Critical Pedagogy, and Multicultural Education: Selected Readings and Resources and National Organization Networks and Resources with a Critical Perspective.

Mapping Possibility Leonie Sandercock, 2023-01-27 Mapping Possibility traces the intertwined intellectual, professional, and emotional life of Leonie Sandercock. With an impressive career spanning nearly half a century as an educator, researcher, artist,

and practitioner, Sandercock is one of the leading figures in community planning, dedicating her life to pursuing social, cultural, and environmental justice through her work. In this book, Leonie Sandercock reflects on her past writings and films, which played an important role in redefining the field in more progressive directions, both in theory and practice. It includes previously published essays in conjunction with insightful commentaries prefacing each section, and four new essays, two discussing Sandercock's most recent work on a feature-film project with Indigenous partners. Innovative, visionary, and audacious, Leonie's community-based scholarship and practice in the fields of urban planning and community development have engaged some of the most intractable issues of our time – inequality, discrimination, and racism. Through award-winning books and films, she has influenced the planning field to become more culturally fluent, addressing diversity and difference through structural change. This book draws a map of hope for emerging planners dedicated to equity, justice, and sustainability. It will inspire the next generation of community planners, as well as current practitioners and students in planning, cultural studies, urban studies, architecture, and community development.

JavaFX Script James Weaver, 2007-12-01 JavaFX Script makes it easy for developers to quickly create high-quality user interface-intensive applications very quickly. Wealth in the Dead Sea Scrolls and in the Qumran Community Catherine Murphy, 2018-12-24 This volume is concerned with exploring sectarian attitudes toward wealth and the economic practices that gave rise to and issued from those attitudes. An introductory chapter establishes the state of the question. Three subsequent chapters focus on major sectarian texts: the Damascus Document, the Rule of the Community, and 4QInstruction A. Other sectarian and non-sectarian texts that mention wealth are discussed in a fifth chapter, while archaeological evidence from the Qumran region and contemporary documentary texts are introduced in chapters seven and eight. Finally, ancient secondary testimony on Essene economic practices is discussed. The book breaks new ground in arguing for several biblical rationales for the practice of shared wealth. Its integration of archaeological and documentary evidence sheds surprising new light on the economic organization of the Qumran community.

Justice in Young Adult Speculative Fiction Marek C. Oziewicz, 2015-04-17 This book is the first to offer a justice-focused cognitive reading of modern YA speculative fiction in its narrative and filmic forms. It links the expansion of YA speculative fiction in

the 20th century with the emergence of human and civil rights movements, with the communitarian revolution in conceptualizations of justice, and with spectacular advances in cognitive sciences as applied to the examination of narrative fiction. Oziewicz argues that complex ideas such as justice are processed by the human mind as cognitive scripts; that scripts, when narrated, take the form of multiply indexable stories; and that YA speculative fiction is currently the largest conceptual testing ground in the forging of justice consciousness for the 21st century world. Drawing on recent research in the cognitive and evolutionary sciences, Oziewicz explains how poetic, retributive, restorative, environmental, social, and global types of justice have been represented in narrative fiction, from 19th century folk and fairy tales through 21st century fantasy, dystopia, and science fiction. Suggesting that the appeal of these and other nonmimetic genres is largely predicated on the dream of justice, Oziewicz theorizes new justice scripts as conceptual tools essential to help humanity survive the qualitative leap toward an environmentally conscious, culturally diversified global world. This book is an important contribution to studies of children's and YA speculative fiction, adding a new perspective to discussions about the educational as well as social potential of nonmimetic genres. It demonstrates that the justice imperative is very much alive in YA speculative fiction, creating new visions of justice relevant to contemporary challenges.
