Easy Do It Yourself Computer Speed-Up & Care Guide! Aaron 'CyberCoach' Robinson,
High Speed Computer and Algorithm Organization David J. Kuck,1977 The Symposium on High Speed Computer and Algorithm Organization was held on April 13-15, 1977, in Champaign, Illinois at the University of Illinois. One of the motivations for the symposium was to capture the state of the world of supercomputers and their performance in the 1970s. What are present trends and what might the future hold? The symposium was to bring together workers from the hardware, software, and algorithm areas, since all three aspects are crucial for the success of a computer system. As all three aspects are crucial for the success of a computer system, the editors felt that these proceedings would be useful for students and practitioners of high speed computer system design and use.

Getting Up to Speed National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on the Future of Supercomputing,2005-02-03 Supercomputers play a significant and growing role in a variety of areas important to the nation. They are used to address challenging science and technology problems. In recent years, however, progress in supercomputing in the United States has slowed. The development of the Earth Simulator supercomputer by Japan that the United States could lose its competitive advantage and, more importantly, the national competence needed to achieve national goals. In the wake of this development, the Department of Energy asked the NRC to assess the state of U.S. supercomputing capabilities and relevant R&D. Subsequently, the Senate directed DOE in S. Rpt. 107-220 to ask the NRC to evaluate the Advanced Simulation and Computing program of the National Nuclear Security Administration at DOE in light of the development of the Earth Simulator. This report provides an assessment of the current status of supercomputing in the United States including a review of current demand and technology, infrastructure and institutions, and international activities. The report also presents a number of recommendations to enable the United States to meet

current and future needs for capability supercomputers.

High-Speed Computing Devices Engineering Research Associates, Engineering Research Associates Staff, 1984 This is the definitive modern sourcebook on the technologies from which the computer industry sprang. Widely read, it gave impetus to technical developments both in the United States and abroad. It presents a clear, organized picture of computing concepts, techniques, machinery, and components in use as of 1950, with emphasis on electronic high-speed computing. The material is elaborately referenced and contains a multitude of diagrams and tables. One particularly significant table lists all the computers of the era—including the famous EDVAC, UNIVAC, BINAC, and Mark III—with their specifications. This first compendium of United States computer technology was created by a research team that grew out of the U.S. Navy's wartime cryptologic establishment. *High-Speed Computing Devices* is Volume IV in the Charles Babbage Institute Reprint Series and was originally published in 1950 by McGraw-Hill.
