From Dim to Digital Tantom Veritatum,2013-08-02 Huge quantities of old films and videos have lain unseen for many years; yet did you know it was possible to make money from this ancient footage? Many people started with silent 8mm or super 8mm, before inevitably progressing to analogue video and then to digital. Unfortunately so many of these early recorded family memories now lay gathering dust in the form of outdated formats. Like so many others, my cameras, tapes and films ended up in a box on top of a wardrobe. I did know that there were people who could convert these to DVD's, but the sheer volume of my old stuff forbade this on cost alone. In any case, giving all my old films to some stranger gave me the feeling that I had lost control somehow of the quality and editing process. I also knew that it was possible to buy specialist hardware that could perhaps carry out this task but decided to do my own research and solve this problem in my own way. By diligent examination of the hardware that I and so many other people had already in their homes, I found that I could successfully convert all of my stuff into digital format without problems and without buying expensive hardware. This not only saved me money but could potentially make money by offering this service to others. In addition, it generated a whole new library of videos for me to upload onto YouTube to increase my personal income from their revenue sharing scheme. Yes, by becoming a 'YouTube Partner' you can actually profit from your old family movies! This book also contains valuable detailed notes on editing and getting the best from your camera. It tells you exactly what to do and how to do it! If you are ready to move up to a higher standard of video production then this book will undoubtedly help. Includes a brief history of home movie making. Written by an author with over fifty years of film making experience.
