Copies in Seconds David Owen,2008-06-30 The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions in that its central process was conceived by a single person. David Owen's fascinating narrative tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told.

The Death of the Copier Gregory Walters,2014-08-15 A compendium of stories and observations from the waning days of the copier and the 'Wild West' of managed print services between 2008 and 2011. Revel in the evolutionary spectacle that was printing, copying and managed print services. Read accounts of copier demonstrations gone terribly wrong, Australian leadership, transformational selling techniques, the odyssey that was HP Edgeline and elephants. That's right, elephants.The Death of the Copier is a select collection of musings from the mind of Greg Walters. Contrarian visionary or lunatic fringe? Does it really matter? See the future in our past.

Copyart Patrick Firpo,Lester Alexander,Claudia Katayanagi,1978 Here at last is an introduction to today's hottest new art medium, the instant copier. As close by as the nearest post office, library, or copy center, the 'miracle machine' lets anyone design eye-catching graphics and unusual crafts at the push of a button. This lively, lavishly illustrated volume presents the most striking examples of what is coming to be called Copy Art along with the techniques of the artists who created them. It also explores the history and technology of the duplicating medium. An exclusive 'how-to' section shows how anyone can use paper, fabric, or almost any material to turn any object or image, black and white or color, into inexpensive high-quality prints, paper sculpture, clothing, pillows, T-shirts, dynamic presentations, personalized greeting cards, and many other useful, unique, and decorative items. -- Back cover

At Your Service Copiers: Need Service? Not from This Crew! Michael S. Modzelewski,2011-11 Ambition is a wonderful thing, until it blinds you then bites you in the ass one day! Take a New York based copier company run by an inept, lazy and self absorbed district manager named Chuck. Add a team of dysfunctional technicians he can't find anyone to manage and you have, At Your Service Copiers. Enter our hero Ron, who gets tired of managing a small town crew of techs and accepts his dream come true transfer to the big city. He temporarily leaves his wife and five year old daughter behind, moves to New York and quickly realizes he was railroaded into a job no one else wanted. Ron is also a recovering alcoholic who comes to learn how much he really loves and needs his family. The story provides a great combination of comedy, romance and light hearted drama. It's good to tease!

How James Watt Invented the Copier René Schils,2011-12-14 Features 25 different scientists and the ideas which may not have made them famous, but made history... Typically, we remember our greatest scientists from one single invention, one new formula or one incredible breakthrough. This narrow perspective does not give justice to the versatility of many scientists who also earned a reputation in other areas of science. James Watt, for instance, is known for inventing the steam engine, yet most people do not know that he also invented the copier. Alexander Graham Bell of course invented the telephone, but only few know that he invented artificial breathing equipment, a prototype of the ‘iron lung’. Edmond Halley, whose name is associated with the comet that visits Earth every 75 years, produced the first mortality tables, used for life insurances. This entertaining book is aimed at anyone who enjoys reading about inventions and discoveries by the most creative minds. Detailed illustrations of the forgotten designs and ideas enrich the work throughout.
