Marketing Technology to the Counseling Profession Gary Jon Springer,2005-09-30 Scope of Study: The author of this dissertation surveyed psychologists in the United States to determine the forms of technology that are currently being utilized in their practice. Through the use of a survey, the study intends to show that technological applications are currently being underutilized in the counseling profession and there exists great potential for marketing new technology to counselors. The new technological ideas that were explored in the study included the use of computer aided diagnostic techniques, video-counseling and the use of a voice stress analyzer.Findings and Conclusions: The study determined that technology is being underutilized by the counseling profession. Marketing new technology to counselors will require greater effort and research due to the resistance described by counselors to using the new technology.

Pragmatic Existential Counseling and Psychotherapy Jerrold Lee Shapiro,2015-10-01 Pragmatic Existential Counseling and Psychotherapy integrates concepts of positive psychology and strengths based therapy into existential therapy. Turning existential therapy on its head, this exciting, all-new title approaches the theory from a positive, rather than the traditional deficit model. Authored by a leading figure in existential therapy, Jerrold Lee Shapiro, the aim is to make existential therapy positive and easily accessible to a wide audience through a pragmatic, stage wise model. Shapiro expands on the work of Viktor Frankl and focuses on delivery to individuals and groups, men and women, and evidence based therapy. The key to his work is to help the client focus on resistance and to use it as a means of achieving therapeutic breakthroughs. Filled with vignettes and rich case examples, the book is comprehensive, accessible, concrete, pragmatic and very human in connection between author and reader. "This is a masterful primer on existential therapy that has been forged from the pen of a highly seasoned theorist, researcher, and practitioner. In Pragmatic Existential Counseling and Psychotherapy we gain the insight and personal experience of one who has lived and breathed the field for over 50 years—alongside some of the greatest practitioners of the craft, most notably Viktor Frankl. This volume is superb for students interested in a broad and substantive overview of the field." —Kirk Schneider, Columbia University

Dilemma Web Based Booking and Counseling System James Karuga,2012-08-20 Technical Report from the year 2008 in the subject Computer Science - Software, grade: Merit, London Metropolitan University, course: Computing Information Systems, language: English, abstract: This web based booking and counseling project was initially conceived for Dilemma Counseling Services as a web system, offering counseling to masses (refer to project proposal). The idea then was to have an online portal where clients can post problems and counselors respond to them. However the core issue was, whether it would be done for free at the expense of Dilemma Counseling time and finances. But as

the idea of the web based counseling system was brainstormed by top management, new requirements arose. To maximize potential of the web based system proposed, the management realized their booking system was a mess and resulted in data duplication and clashing bookings. The ineffectual booking system then in place brought constant complaints from clients whose counseling sessions clashed. The Dilemma Staff contracted me to offer expertise on if counseling and booking can be incorporated into a web based system that is financially viable this was possible. So I adopted a Unified Software Development Process (USDP) because after interviewing the various staff I was not satisfied with the feedback. Thus I choose USDP as the software development method since it allows new requirements to be factored at any project stage. Sure enough as the software development process progressed new requirements arose like online counseling system, processing payments made and assigning username and passwords for clients who pay but prefer online counseling as opposed to face to face counseling. The system allows staff to book clients remotely online via secure log in. The clients counseled can have their progress tracked easily via the secure counseling chat system. I stuck to the USDP process and working on each workflow and resultant artifacts like Unified Modeling Language diagrams to ensure the project was well modeled to be realized in construction and transition phases.

Licensure of counselors brought about the concern of what defines the practice of a professional counselor. The study had its origins in two sources: (a) the National Board for Certified Counselors' and staff members' functioning and (b) a commitment by NBCC to strengthen the credentialing of counselors and incur the expense to conduct a study of this magnitude.
