Using Java Server Pages and Servlets Mark Wutka, 2000 Special Edition Using JSP and Servlets starts by detailing the evolution of web servers that led to the creation of ASP and JSP. It explains both the limitations of previous technologies and the benefits that JSP provides including platform independence. Includes coverage of: organizing applications with multiple files and client-side objects, generating well-

formed XML using JSP, storing data in cookies and sessions, interacting with Enterprise Java Beans, displaying dynamic graphics with Java 2D, and using RMI and Corba to enhance JSP applications. The final chapters demonstrate advanced JSP & Servlet techniques, including using JSP to create wireless & XML-based applications. Appendices provide an overview of popular JSP & Servlet runtime environments, including Jrun, Tomcat and ServletExec.

Bilingual Voting Assistance ,2008 This book focuses on obtaining more detailed information about bilingual voting assistance from selected jurisdictions across the country. The book's objectives were to determine: the ways that selected jurisdictions covered under Section 203 of the Voting Rights Act have provided bilingual voting assistance as of the November 2006 general election and any subsequent elections through June 2007, and the challenges they reportedly faced in providing such assistance; the perceived usefulness of this bilingual voting assistance, and the extent to which the selected jurisdictions evaluated the usefulness of such assistance to language minority voters. This is an excerpted and indexed edition.

Transforming Digital Learning and Assessment Peggy L. Maki, Peter Shea, 2023-07-03 Responding to both the trend towards increasing online enrollments as the demand for face-to-face education declines, and to the immediate surge in remote learning owing to the COVID-19 pandemic, this book provides vital guidance to higher education institutions on how to develop faculty capacity to teach online and to leverage the affordances of an ever-increasing array of new and emerging learning technologies. This book provides higher education leaders with the context they need to position their institutions in the changing online environment, and with guidance to build support in a period of transition. It is intended for campus leaders and administrators who work with campus teams charged with identifying learning technologies to meet an agreed upon program- or institution-level educational needs; for those coordinating across campus to build consensus on implementing online strategies; and for instructional designers, faculty developers and assessment directors who assist departments and faculty effectively integrate learning technologies into their courses and programs. It will also appeal to faculty who take an active interest in improving online teaching. The contributors to this volume describe the potential of artificial intelligence algorithms, such as those that fuel learning analytics software that mines LMS data to enable faculty to quickly and efficiently assess individual students' progress in real time, prompting either individual attention or the need to more generally clarify concepts for the class as whole. They describe and provide access to a hybrid professional

development MOOC and an associated WIKI that curate information about a wide range of learning software solutions currently available; and present case studies that offer guidance on building the buy-in and consensus needed to successfully integrate learning technologies into course, program- and institution-level contexts. In sum, this book provides readers with a comprehensive understanding of the technological capabilities available to them and identifies collaborative processes related to engaging and building institutional support for the changes needed to provide the rapidly growing demand for effective and evidence-based online learning.

Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever-changing and expanding domain of aging research. Since it was first recognized that there is more to social aging than demography, gerontology has needed a communication perspective. Like the first edition, this handbook sets out to demonstrate that aging is not only an individual process but an interactive one. The study of communication can lead to an understanding of what it means to grow old. We may age physiologically and chronologically, but our social aging--how we behave as social actors toward others, and even how we align ourselves with or come to understand the signs of difference or change as we age--are phenomena achieved primarily through communication experiences. Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades, the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter. Many of the chapters work to deny

earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities. A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older, aged, elderly, or over 65. The contributors review the literature analytically, in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda. This handbook will be of great interest to scholars and researchers in gerontology, developmental psychology, and communication, and, in this updated edition, will continue to play a key role in the study of communication and aging.
