Machine Learning Techniques for Text Nikos Tsourakis,2022-10-31 Take your Python text processing skills to another level by learning about the latest natural language processing and machine learning techniques with this full color guide Key FeaturesLearn how to acquire and process textual data and visualize the key findingsObtain deeper insight into the most commonly used algorithms and techniques and understand their tradeoffsImplement models for solving real-world problems and evaluate their performanceBook Description With the ever-increasing demand for machine learning and programming professionals, it's prime time to invest in the field. This book will help you in this endeavor, focusing specifically on text data and human language by steering a middle path among the various textbooks that present complicated theoretical concepts or focus disproportionately on Python code. A good metaphor this work builds upon is the relationship between an experienced craftsman and their trainee. Based on the current problem, the former picks a tool from the toolbox, explains its utility, and puts it into action. This approach will help you to identify at least one practical use for each method or technique presented. The content unfolds in ten chapters, each discussing one specific case study. For this reason, the book is solution-oriented. It's accompanied by Python code in the form of Jupyter notebooks to help you obtain hands-on experience. A recurring pattern in the chapters of this book is helping you get some intuition on the data and then implement and contrast various solutions. By the end of this book, you'll be able to understand and apply various techniques with Python for text preprocessing, text representation, dimensionality reduction, machine learning, language modeling, visualization, and evaluation. What you will learnUnderstand fundamental concepts of machine learning for textDiscover how text data can be represented and build language modelsPerform exploratory data analysis on text corporaUse text preprocessing techniques and understand their trade-offsApply dimensionality reduction for visualization and classificationIncorporate and fine-tune algorithms and models for machine learningEvaluate the performance of the implemented systemsKnow the tools for retrieving text data and visualizing the machine learning workflowWho this book is for This book is for professionals in the area of computer science, programming, data science, informatics, business analytics, statistics, language technology, and more who aim for a gentle career shift in machine learning for text. Students in relevant disciplines that seek a textbook in the field will benefit from the practical aspects of the content and how the theory is presented. Finally, professors teaching a similar course will be able to pick pertinent topics in terms of content and difficulty. Beginner-level knowledge of Python programming is needed to get started with this book.

Making Sense Martin Stanton,2019-11-30 A literary masterpiece from world-renowned

psychoanalyst and distinguished writer, Professor Martin Stanton that picks up the baton from R. D. Laing. Spanning a novel, travel-guide, documentary, self-help book, play, photo album, film script, and work of art, Making Sense is a cultural phenomenon - a long overdue wake-up call - railing at society's idealisation and narcissism. Martin Stanton has created a guide for a postmodern world that is constructed through social media, and communicates principally through tweets, texts and selfies. Like Homer's Odyssey, this is an epoch-changing classic that takes a timely quantum leap from a cognitive world of straight-line argument and causal interpretation, into a parallel unconscious universe of uncontrolled feeling, which traps fragments of fantasy in the retreating tides of reality. Making Sense collects together a group of major and minor characters, some real, some imaginary, who set out to make sense of life together by opening the social media gate between Reality and Fantasy. A survey of Martin Stanton's own thinking and feeling on his original psychoanalytic odyssey across becalmed seas, random conversations with a therapeutic parrot, stranded for a while with Socrates on the black sandy beach of Paradise, he explores how a bezoar stone, a caddis insect, and a karaoke moment can linger through his life, and make sense for him as a primary source; as unconscious effects which sustain, enlighten, and entertain him through darker times. This book scrawls a message of hope in the sand once the outgoing tide has retreated. 'Enjoy life', it says. 'Celebrate it in yourself and in others.'

Das Verhältnis zwischen Störerhaftung und Filterfunktion des Telemediengesetzes bezüglich Host-Provider Dennis Maly,2010 Diplomarbeit aus dem Jahr 2008 im Fachbereich Jura - Medienrecht, Multimediarecht, Urheberrecht, Note: 2,0, Technische Universität Darmstadt, Sprache: Deutsch, Abstract: Dieses Buch behandelt detailliert auf 136 Seiten die Haftungssituation von Host-Providern wie z.B. Youtube, Facebook oder Ebay. Dies betrifft grundsätzlich den Großteil aller Internetseiten, da sich hier fremde Inhalte finden lassen, die lediglich gehostet werden. Die Haftungsproblematik ergibt sich aus dem Verhältnis zwischen der Störerhaftung und der Filterfunktion wie sie im TMG verankert ist. Wie dieses Paradoxon zu behandeln ist und welche Argumentationskette es auch international mit Blick auf europäisches und angloamerikanisches Recht gibt, kann hier sehr gut nachvollzogen werden und ist Bestandteil der Lösungsfindung. Eine chronologische Kommentierung der wichtigsten Rechtsprechung ist ebenfalls enthalten. Es werden konkrete Ergebnisse beschrieben und Argumentationsketten transparent dargestellt. Abgerundet wird die umfassende Arbeit durch einen 16-Punkte Katalog der in der Praxis einen Leitfaden liefert, um verschiedenste Provider-Eigenschaften und Tatbestände in verschiedensten Haftungssituationen zu bewerten. Begleitet wird dieser Katalog durch eine Anleitung, welche die Argumentationsgewichtung erklärt und bei der Einstufung weitere Hilfestellung leistet. Ein wissenschaftliches Werk, welches einen hohen praxisrelevanten Bezug beinhaltet. Unterstützt wurde dieses Buch in eigenem Interesse von Prof. Dr. Thomas Wilmer, Geschäftsführender Direktor des Instituts für Informationsrecht in Darmstadt.
