Cursor's Fury Jim Butcher, 2007-11-27 In his acclaimed Codex Alera novels, #1 New York Times bestselling author Jim Butcher has created a fascinating world in which the powerful forces of nature take physical form. But even magic cannot sway the corruption that threatens to destroy the realm of Alera once and for all... When the power-hungry High Lord of Kalare launches a merciless rebellion against the First Lord, young Tavi of Calderon joins a newly formed legion under an assumed name. And when the ruthless Kalare allies himself with a savage enemy of the realm, Tavi finds himself leading an inexperienced, poorly equipped legion—the only force standing between Alera and certain doom...

**A Study of Orientation-Neutral Cursors** Kim Oehmichen, 2009-06-07 Very little research exists on the topic of computer cursor design and utilization. Since this is an important area in successful and efficient user interaction with graphical user interfaces, additional study is necessary. To investigate the impact of cursors with no implicit directional cues (orientation-neutral cursors) on movement time, positioning performance, and stimulus-response compatibility, six experiments were designed. In these experiments, six orientation-neutral cursors were compared against each other as well as against four directional cursors. All experiments measured two dependent variables, movement time and positioning performance. Statistical analysis tests revealed a correlation for some cursor types between the two dependent variables, while

changing target shapes indicated no statistical significance on the overall results. This study concludes that there is no one cursor of those tested that performed best for anyone. This research should be especially useful to professionals in Computer Science or Cognitive Psychology interested in HCI, design of Graphical User Interfaces, or mental representations of visual space.

**The Southern Version of Cursor Mundi, Vol. III** Henry J. Stauffenberg, 1985-01-01 The medieval poem Cursor Mundi is a biblical verse account of the history of the world, offering a chronological overview of salvation history from Creation to Doomsday. Originating in northern England around the year 1300, the poem was frequently copied in the north before appearing in a southern version in substantially altered form. Although it is a storehouse of popular medieval biblical lore and a fascinating study in the eclectic use of more than a dozen sources, the poem has until now attracted little scholarly attention. This five-part collaborative edition presents the Arundel version of the poem with variants from three others. In addition it provides a discussion of sources and

analogues, detailed explanatory notes, and a bibliography.

*The Narrative Unity of the Cursor Mundi* Ernest Mardon, 2014-12-25 The *Cursor Mundi* is a long religious epic of 25 000 lines, a survey of man's view of the world as it appeared to an anonymous cleric living in the fourteenth century. The poem is unique in that it is the first work of this kind written in the English language since the Norman Conquest. It is also the most comprehensive treatment in the vernacular during the Middle Ages, of all the most important events in the religious history of the world. The purpose of Dr. Mardon's study is to show the artistic unity, achieved by skillful blending of prophecy and legend, of one of the most remarkable pieces of medieval literature. The book provides an eminently readable and interesting introduction to the longer poem, the author quoting generously from the original Early English text. A useful addition to the book list of the student dealing with the literature of this important period.
