Visualizing Digital Discourse Crispin Thurlow,Christa Dürscheid,Federica Diémoz,2020-02-10 The first dedicated volume of its kind, Visualizing Digital Discourse brings together sociolinguists and discourse analysts examining the role of visual communication in digital media. The volume showcases work from leading, established and emerging scholars from across Europe, covering a diverse range of digital media platforms such as messaging, video-chat, gaming and wikis; visual modalities such as emojis, video and layout; methodologies like discourse analysis, ethnography and conversation analysis; as well as data from different languages. With an opening chapter by Rodney Jones, the volume is organized into three parts: Besides Words and Writing, The Social Life of Images, and Designing Multimodal Texts. From the perspective of these broad domains, chapters tackle some of the major ideological, interactional and institutional implications of visuality for digital discourse studies. The first part, beginning with a co-authored chapter by Crispin Thurlow, focuses on micro-level visual practices and their macro-level framing – all with particular regard for emojis. The second part, beginning with a chapter from Sirpa Leppänen, examines the ways visual resources are used for managing personal relations, and the wider cultural politics of visual representation in these practices. The third part, beginning with a chapter by Hartmut Stöckl, considers organizational contexts where users deploy visual resources for more transactional, often commercial ends.

Creating what is essentially an archival presentation means considering a host of factors surrounding both content and organization. *Webinars For Dummies* includes all the information your business needs to start creating custom webcasts, including: A webinar overview, and how to determine your need, budget, and available tools Topic selection, script creation, graphic production, and marketing Creation advice, including live troubleshooting and how to handle viewer questions Archiving tips, and how to integrate webinars into a marketing plan You'll also find special tips for effective production and marketing, tips for readying yourself for the webinar, and case studies that illustrate successful webinar techniques. Social Research Methods Joshua Iyadurai, 2023-06-15 This book demystifies designing and conducting qualitative, quantitative, and mixed methods research with scientific rigor. *Social Research Methods*, benefits researchers from theology and religious studies in designing interdisciplinary research and interacting with social sciences and other disciplines to study contextually relevant issues by focusing on lived religion, lived theology, lived experience, and real-world problems. Joshua Iyadurai skillfully guides researchers with a step-by-step guide on the practical nuances of choosing a topic, engaging literature, selecting a paradigm, collecting and analyzing data, interpreting the findings, and writing a research proposal and a dissertation/thesis/article for qualitative, quantitative, and mixed methods research. A separate chapter on supervising and examining social research helps students and professors to understand each other's role in field-based studies. *Social Research Methods* is an indispensable resource for researchers from theology and religious studies and a valuable practical guide for researchers from social sciences and humanities. Why Read this Book? · Instills confidence in researchers to design and conduct qualitative, quantitative, and mixed methods research with scientific rigor. · The first of its kind to introduce qualitative, quantitative, and mixed methods strategies with guidance for choosing a topic and collecting and analyzing data for theology and religious research. · Up to date and authoritative by arraying current and leading methodology texts with examples for researching lived experiences, lived religion, and lived theology. · A step-by-step guide for writing every section of a research proposal and for writing each chapter for qualitative, quantitative, and mixed methods dissertation/thesis, which will make the research journey pleasant for students. · Provides tips for writing DMin dissertation and journal article. · Offers guidelines for supervisors and examiners for assisting and assessing student projects. · Review Questions and Further Help at the end of each chapter; Glossary and Index, which are among other helpful resources for researchers. · An invaluable resource for students and professors from social sciences, education, development, management, and the humanities, besides theology and religious studies. · A practical guide for researchers from churches, religious bodies, NGOs, and others. Review Quotes: "Compared to other approaches to theology and religious studies, missiology has the propensity to use social science methods. This clearly written introduction to complex terrain will enable students to navigate it and develop tools for their own project, and students are more likely to recognize their research interests in its examples. Especially useful features include the glossary and the section on student supervisors/mentors and examiners. This volume is authoritative and cognisant of other leading texts." KIRSTEEN KIM, Pierson Professor of World Christianity, Fuller Theological Seminary, co-editor of *The Oxford Handbook of Mission Studies* "This textbook fills an important niche for postgraduate researchers embarking on empirical research in Practical Theology or Religious Studies. Those who have little or no background in the social sciences will find this a clear and well-structured introduction on how to conceive a research project and what methods are available to answer their research questions. Reading this before they embark on their journey could save a lot

of problems further down the road.” ANDREW VILLAGE, Professor of Practical and Empirical Theology, York St John University, author of *The Church of England in the First Decade of the 21st Century* “Here is a fascinating and engaging handbook every researcher in theology and religious studies should read and assimilate. It fulfils a felt need by pooling the wealth of sociological methodologies and applying them to the scientific study of lived religion. The author has done a unique service, and his work will remain a point of reference for years.” FELIX WILFRED, Founder and Director of Asian Centre for Cross Cultural Studies, Chennai, editor of *The Oxford Handbook of Christianity in Asia* It is very good to see the use of social science methods being developed to aid religious studies and theological research. My hope is that this very practical book, using such up-to-date resources as Alan Bryman’s *Social Research Methods* (OUP) now in its fifth edition, will help to develop this important form of study further. ROBIN GILL, Emeritus Professor of Applied Theology, University of Kent, author of the trilogy on Sociological Theology “This volume fills an important gap in the field by bringing social scientific methods into theology and religious studies. All parties in this conversation have much to gain from a sustained dialogue, and this book moves us in that direction.” JOHN BARTKOWSKI, Professor - Sociology, University of Texas at San Antonio “This is a valuable resource written in a way that theological students will understand, and supervisors will appreciate! It takes the student “by the hand” from the formulation of the research topic through methodological positioning and choices and closes with a chapter on supervision expectations. I look forward to prescribing it to my own postgraduate students.” NADINE BOWERS DU TOIT, Professor - Theology and Development, University of Stellenbosch, editor of *Race, Faith and Inequality amongst Young Adults in South Africa*: “The highly readable, yet exhaustive and authoritative text covers all aspects of the variety of methods available to contemporary scientists who either produce or evaluate empirical research. The text is intended for students and scholars of theology and religious studies, but anyone interested in how religion is practiced in different cultural contexts and want to understand individual lived experiences and interpretations will find this text an invaluable guide.” RALPH W. HOOD Jr., Professor of Psychology, University of Tennessee, co-editor of *Research in the Social Scientific Study of Religion* series Upon launching out on research, students and scholars are always on the lookout for good books on research methodology. In Dr Iyadurai’s book, they will find an excellent manual spanning the length and breadth of what they are looking for. I strongly recommend this book to all those engaged in research. FRANCIS GONSALVES SJ, President, Jnana Deepa: Pontifical Athenaeum of Philosophy & Theology, author of *God of Our Soil: Towards Subaltern Trinitarian Theology* Joshua Iyadurai has been teaching research methods to PhD students in Christian Studies for over a decade. He is an expert facilitator in this hybrid field, helping both theology and religious studies students use social research methods more rigorously and effectively. This book will be immensely helpful to anyone wanting to do research in the field of religion, as well as to those in classes focused on research methods. I highly recommend it. ROBERT K. JOHNSTON, Professor of Theology and Culture, Fuller Theological Seminary, co-author of *Deep Focus: Film and Theology in Dialogue* *Social Research Methods for Students and Scholars of Theology and Religious Studies* is a masterpiece that draws from Joshua's experience of teaching social research for two decades. The book aims to catalyze theological scholarship using social research methods with scientific precision. Scholars, educators, and graduate students will find this text a welcome resource. I highly recommend it! DAVID TARUS, Executive Director, Association for Christian Theological Education in Africa (ACTEA), author of *A Different Way of Being*

Intersections of Peace and Language Studies Erin A. Mikulec, Sai Bhatawadekar, Cuhullan Tsuyoshi McGivern, Paul Chamness Iida, 2022-01-01 *Readings in Language Studies, Volume 7: Intersections of Peace and Language Studies* features international contributions that represent state-of-the-field reviews, multi-disciplinary perspectives, theory-driven syntheses of current scholarship, reports of new empirical research, reflections on pedagogical practices, and critical discussions of major topics centered on the intersection of language studies and peace. Consistent with the mission of ISLS, the collection of 13 chapters in this volume seeks to “bridge these arbitrary disciplinary territories and provide a forum for both theoretical and empirical research, from

existing and emergent research methodologies, for exploring the relationships among language, power, discourses, and social practices.” Language and peace are in themselves incredibly complex concepts. They are simultaneously interpersonal in their function and effect as well as intimately personal in their experience. From everyday communication to the pragmatics of world diplomacy, from embracing a foreign culture to embarking upon a journey of self-awareness, language and peace are inseparably intertwined. To reveal their myriad interconnections, in local and global contexts, is a limitless task; nevertheless, we attempt to bring you a few glimpses from far corners of the world. It is also a linguistic and postcolonial mission of this society and the book series to publish the voices of non-native speakers of English. Decolonizing the academic enterprise is part of our commitment to diversity.
