Securing the Network Nathan Gregory,2018-05-19 From the chaos of the early DARPA, ARPANET and NSF-funded NSFNET

has emerged a globe-spanning communications facility we today call simply ?The Internet.? It has become so commonplace and so taken for granted that Wired News has decreed that writers should no longer capitalize it. This tale is not singularly focused on the past. It tells not only how we got here, but where we think the Commercial Internet must go. For all its greatness, today's Internet has serious shortcomings. Theft of personal data, identity theft, online scams, and advertising fraud run rampant, with online dollars diverted to organized crime. Insecure systems, poor security practices and an attitude of secrecy and reluctance to acknowledge failings inhibit real solutions. We propose a way forward, a networking future that is bright, optimistic, and secure.

Other sites can then incorporate these elements into their pages automatically ... [this text] provides a comprehensive reference to the specifications and the tools that make syndication possible--Back cover.

Developing Feeds with RSS and Atom Ben Hammersley,2005-04-13 This step-by-step guide offers bloggers, web developers and programmers an understanding of content syndication and the technologies that make it possible. It highlights all the new features of RSS 2.0, and offers complete coverage of its rival technology, Atom.
