Concise Oxford English Dictionary Oxford Dictionaries, 2011-08-18 This centenary edition of the world-famous Concise Oxford English Dictionary on CD-ROM presents the most accurate picture of English today.

European Directory of Software for Libraries and Information Centres Joanna Wood, 2018-12-17 First Published in 1993 A Directory of Library and Information Software for Microcomputers has been published in four highly successful editions. The growth of interest in and proliferation of software packages in Europe has caused this new edition of the Dictionary to concentrate on the software that is both actively marketed in Europe and that has good back up support. The coverage is restricted to microcomputer software that is running under MS DOS/PC DOS, OS/2, UNIX, PICK and APPLE MACINTOSH operating systems. All software suitable for use in library and information work will be included, but not industry-standard word processing spreadsheets, accounts or other office administration systems. Coverage of Europe includes the 12 EC countries together in Sweden,

Norway, Finland, Switzerland and Austria. More than 278 packages are listed originating from 299 suppliers. The European Directory is arranged in a straight alphabetical sequence by software name, indexed by country, by operating system and by supplier.

Dictionary of Acronyms and Technical Abbreviations Jakob Vlietstra, 2012-12-06 My first encounter with acronyms took place when I was ten years old and growing up in an occupied country during the Second World War. My father proudly announced one day that, despite the ban imposed by the occupying administration, he had managed to get a radio installed and could receive the BBC. (All acronyms used in this introduction are listed in this dictionary.) To me the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts. There was, of course, the well-known acronym associated with the NT, but at that time I did not realize that it meant more than the postal service, in those years a deteriorated service. Gradually the daily use of acronyms grew. Most of the newly acquired three- and four-letter abbreviations referred to organizations, such as the broadcasting corporations in The Netherlands and Belgium, and references

to countries such as the USA, USSR, and UK. When attending high school (the HBS) after the war, my knowledge of acronyms grew slowly. Even during the ten years I spent in the Dutch Merchant Marine (the GHV), the number of acronyms was limited to advanced equipment that eventually became known as RADAR, LORAN, and DECCA.

Elsevier's Dictionary of Office Automation Centre de Terminologie de Bruxelles Staff, 1997-01-31 CD-ROM version. This dictionary contains the vocabulary of office automation software programs for micro-computers. The subfields covered are: word processing; desktop publishing; database and file management systems; decision support systems; spreadsheets and graphers; messaging systems; videotex. The terminology compiled is used in the manuals of popular software packages and in articles of specialized journals on micro-computing. Consequently, for programming, data processing, editing, statistics or planning, only the terms currently found in this body of literature are kept. However, collocations have been included because they are useful for translators and cannot always be separated from proper terms.
