Anti-Diet Christy Harrison,2019-12-24 Reclaim your time, money, health, and happiness from our toxic diet culture with groundbreaking strategies from a registered dietitian, journalist, and host of the Food Psych podcast. 68 percent of Americans have dieted at some point in their lives. But upwards of 90% of people who intentionally lose weight gain it back within five years. And as many as 66% of people who embark on weight-loss efforts end up gaining more weight than they lost. If dieting is so clearly ineffective, why are we so obsessed with it? The culprit is diet culture, a system of beliefs that equates thinness to health and moral virtue, promotes weight loss as a means of attaining higher status, and demonizes certain ways of eating while elevating others. It's sexist, racist, and classist, yet this way of thinking about food and bodies is so embedded in the fabric of our society that it can be hard to recognize. It masquerades as health, wellness, and fitness, and for some, it is all-consuming. In Anti-Diet, Christy Harrison takes on diet culture and the multi-billion-dollar industries that profit from it, exposing all the ways it robs people of their time, money, health, and happiness. It will turn what you think you know about health and wellness upside down, as Harrison explores the history of diet culture, how it's infiltrated the health and wellness world, how to recognize it in all its sneaky forms, and how letting go of efforts to lose weight or eat perfectly actually helps to improve people's health—no matter their size. Drawing on scientific research, personal experience, and stories from patients and colleagues, Anti-Diet provides a radical alternative to diet culture, and helps readers reclaim their bodies, minds, and lives so they can focus on the things that truly matter.

The Happiness Diet Tyler G. Graham, Drew Ramsey, M.D., 2012-12-11 How to fix the Modern American Diet and reclaim our minds and waistlines “An insightful, eye opening adventure into diet and nutrition. Concise and witty, this book kept me engaged from cover to cover. A must-have for anyone serious about getting happy and healthy naturally.”—Andrew Morton, MD, Board-certified Family Physician; Former Medical Corps, US Navy and Army Infantry Medic, Desert Storm For the first time in history, too much food is making us sick. The Modern American Diet (MAD) is expanding our waistlines while starving and shrinking our brains. Rates of obesity and depression have recently doubled, and though these epidemics are closely linked, few experts are connecting the dots for the average American. Using data from the rapidly changing fields of neuroscience and nutrition, *The Happiness Diet* shows that over the past several generations, small, seemingly insignificant changes to our diet have stripped it of nutrients—like magnesium, vitamin B12, iron, and vitamin D, as well as some very special fats—that are essential for happy, well-balanced brains. These shifts also explain the overabundance of mood-destroying foods in the average American’s diet and why they predispose most of us to excessive weight gain. After a clear explanation of how we’ve all been led so far astray, *The Happiness Diet* empowers the reader to steer clear of this MAD way of life with simple, straightforward solutions, including: • A list of foods to swear off • Shopping tips and kitchen organization tricks • A compact healthy cookbook full of brain-building recipes • Practical advice, meal plans, and more! Graham and Ramsey guide you through these steps and then remake your diet by doubling down on feel-good foods—even the all-American burger. Praise for *The Happiness Diet* “Finally, a rock-solid, reliable, informative, and entertaining book on how to eat your way to health and happiness. Run—don’t walk—to read and adopt *The Happiness Diet*. This is the only diet book I’ve encountered that I can actually recommend to patients without reservation.”—Bonnie Maslin, PhD, Psychologist and author of *Picking Your Battles* “A lively, thorough, and iron-clad case for real food. You will never eat an egg-white omelet or soy protein shake again.”—Nina Planck, author of *Real Food* and *Real Food for Mother and Baby* “The book includes food lists, shopping tips, brain-building recipes, smart slimming strategies, and other useful tools to lose weight and keep the blues at bay.”—AM New York

How Not to Die Michael Greger, M.D., FACLM, Gene Stone, 2015-12-08 From the physician behind the wildly popular NutritionFacts website, How Not to Die reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the

disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

Self-doubt and self-loathing are responsible for our dysfunctional relationships with food and our destructive health habits, which inevitably lead to poor nutrition, unwanted weight, and dangerously low self-esteem. Learning to recognize your own worth is the first step to finding the waistline—and the life—you deserve. Drawing on their revelatory research, the latest science on nutrition and weight loss, and thousands of patients' accounts, Dr. Guttersen and Dr. Dedomenico have developed the Love Diet, an accessible, practical, and proven plan to transform your body, emotionally, mentally, and physically, from the inside out.
