*Narratives of Qualitative Research* Josh Tenenber,2024-05-21 Narratives of Qualitative Research uses a novel form of writing about how to do qualitative research called a praxis narrative. Each narrative is told from the author's perspective in carrying out one of his past research studies in the social sciences. Told chronologically and in a first-person voice, the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars. Rather than a set of idealizations and universalized pronouncements, the author reveals what really goes on when one is in the thick of complex and challenging research studies, the points of trouble along with the successes. This will be relevant to researchers who have already undertaken one or more empirical research studies (though not necessarily using qualitative approaches) and now find themselves facing something new: a new analytic method, a new theoretical lens, a new form of data collection, a new domain of research questions, a new rhetorical approach. This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research. The reader is invited to follow along as the author makes visible his praxis of qualitative research. Unlike more conventional texts, in this unique alternative, the reader can follow the author's journey through his research studies as a way to reorient their conception of qualitative research and their own praxis of it. This is fascinating reading for qualitative researchers and students taking qualitative research courses, across the social sciences, education, and behavioural sciences.

**EG-ICE 2021 Workshop on Intelligent Computing in Engineering** Abualdenien, Jimmy,Borrmann, André,Ungureanu, Lucian-Constantin,Hartmann, Timo,2021-08-06 The 28th EG-ICE International Workshop 2021 brings together international experts working at the interface between advanced computing and modern engineering challenges. Many engineering tasks require open-world resolutions to support multi-actor collaboration, coping with approximate models, providing effective engineer-computer interaction, search in multi-dimensional solution spaces, accommodating uncertainty, including specialist domain knowledge, performing sensor-data interpretation and dealing with incomplete knowledge. While results from computer science provide much initial support for resolution, adaptation is unavoidable and most importantly, feedback from addressing engineering challenges drives fundamental computer-science research. Competence and knowledge transfer goes both ways. Der 28. Internationale EG-ICE Workshop 2021 bringt internationale Experten zusammen, die an der Schnittstelle zwischen fortgeschrittener Datenverarbeitung und modernen technischen Herausforderungen arbeiten. Viele ingenieurwissenschaftliche Aufgaben erfordern Open-World-Resolutionen, um die Zusammenarbeit mehrerer Akteure zu unterstützen, mit approximativen Modellen umzugehen, eine effektive Interaktion zwischen Ingenieur und Computer zu ermöglichen, in mehrdimensionalen Lösungsräumen zu suchen, Unsicherheiten zu berücksichtigen, einschließlich fachspezifischen Domänenwissens, Sensordateninterpretation durchzuführen und mit unvollständigem Wissen umzugehen. Während die Ergebnisse aus der Informatik anfänglich viel Unterstützung für die Lösung bieten, ist eine Anpassung unvermeidlich, und am wichtigsten ist, dass das Feedback aus der Bewältigung technischer Herausforderungen die computerwissenschaftliche Grundlagenforschung vorantreibt. Kompetenz und Wissenstransfer gehen in beide Richtungen.
