*The Politics of Digital India* Pradip Ninan Thomas, 2019-07-11 Transforming India into a digital state has been an objective of successive governments in India. However, the digital, by its very nature, is a capricious, multi-dimensional entity. Its operationalization across multiple sectors in India has highlighted the fact that the digital compact with publics in India is a two-edged sword. On the one hand, devices such as mobile phones have enabled access and efficiencies, and on the other, they have increased the scope for surveillance capitalism and the expansion of governmentality. The digital is at the same time a resource, commodity, and process that is absolutely fundamental to most if not all productive forces across multiple sectors. As a part of the Media Dynamics in South Asia series, this volume explores the making of digital India and specifically deals with the contradictions of an imperfect democracy, internal compulsions, and external pressures that continue to play crucial roles in the shaping of the same. Mindful of the key roles played by political economy and context and based on conversations with theory and practice, it makes a case for critical understanding of the digital embrace in India.

*Secured Techno- Economic Growth of India* Dr. P. Sekhar, The book explores sector-wise dimensions of security and how security undermines India's capacity to provide opportunities and services to help people sustain livelihoods. In addition, it focuses on some non-traditional security issues

relative to each sector and their security implications for India. While India will continue to grow at a healthy rate, it is important for India to provide a stable economic environment in which we can grow rapidly and attract investments. The object of economic activity in any country is to promote the well-being and standard of living of the people. This book is an exhaustive effort to overview India as a nation which has a sound economic and social infrastructure. The economic infrastructure includes the roads, airports, railways, ports, telecom and power. Education and training, tourism and health services are included in the social infrastructure. It also reflects on the fact that despite being a highly industrialized country, agriculture is the main occupation of the people of India. This book examines growth experience in various states region and sectors of the India's and Growth components of India. This Book describes policies, roles and responsibilities, and the concept of operations for assessing, prioritizing, protecting, and restoring critical infrastructure and key resources (CIKR) of the India and its territories and possessions during actual or potential security risks. Hence the book attempts to identify principal drivers of the economy in India and their contribution to economic growth. The sectors are- Industry, Power, Education, Agriculture, Healthcare, Telecom, Banking, Real-estate, Transport, Tourism etc. The entire growth process will come to a screeching halt if security concerns are not timely and adequately addressed and the value addition comes with prevention, response, restoration, and

recovery efforts when there is full participation of government and industry partners
